Foreword

Like every other organization and individual in the United States, the FBI has struggled to comprehend the events of September 11, 2001. Apart from investigating the crime scenes in New York City; Somerset County, Pennsylvania; and Arlington County, Virginia (the Pentagon); following leads, and addressing a myriad of concerns resulting from these attacks, the FBI through its Uniform Crime Reporting (UCR) Program has struggled with how to report the data to the public. Begun in 1929, the UCR Program captures criminal offenses, which include murder and nonnegligent manslaughter, forcible rape, aggravated assault, robbery, burglary, larceny-theft, and motor vehicle theft, reported to local or state law enforcement agencies. In its original design, the creators of the Program probably could not conceive of heinous attacks of domestic or international terrorism being committed within the confines of this Nation. Theirs was a national crime data collection system based on the cooperation of city, county, and state law enforcement agencies voluntarily reporting crimes that were a product of the society of the time. However, that society has evolved into a more complex, global society of the twenty-first century that is faced with fighting crimes that previously had been unimaginable. The FBI recognizes that the UCR Program must evolve to be able to capture the crimes of this modern era. As it currently exists, the UCR Program is limited in its ability to report the offenses committed at the World Trade Center, in the airways above Pennsylvania, and at the Pentagon. Recognizing the limitations of the Program, yet also recognizing that many agencies and researchers will have a specific, nontraditional application for the statistical data associated with these offenses, the FBI has compiled a special report, which can be found in Section V of this publication. For the most part, the data associated with the events of September 11, 2001, are not included in the standard tables found in *Crime in the United States*. The number of deaths is so great that combining it with the traditional crime statistics will have an outlier effect that falsely skews all types of measurements in the Program's analyses.

September 11 will always be remembered as a tragic day in the history of this Nation. However, the attacks did serve as a wake-up call to law enforcement and the American public with regard to the shortcomings in the measures we take to protect our country from harm. It has reminded us that we must transform these measures to meet new realities. The UCR Program recognizes that it, too, must transform and equip itself to contend with ever-changing realities. In the coming years, the Program will address these issues and recommit itself to the task of serving, in the best way possible, this Nation and its law enforcement agencies.

Crime Factors

Each year when *Crime in the United States* is published, many entities—news media, tourism agencies, and other groups with an interest in crime in our Nation—use reported Crime Index figures to compile rankings of cities and counties. These rankings, however, are merely a quick choice made by the data user, and they provide no insight into the many variables that mold the crime in a particular town, city, county, state, or region. Consequently, these rankings lead to simplistic and/or incomplete analyses which often create misleading perceptions adversely affecting cities and counties, along with their residents. To assess criminality and law enforcement's response from jurisdiction to jurisdiction, one must consider many variables, some of which, while having significant impact on crime, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if one is going to make an accurate and complete assessment of crime in that jurisdiction. Several sources of information are available that may assist the responsible researcher in exploring the many variables that affect crime in a particular locale. The U.S. Bureau of the Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its racial and ethnic makeup, its composition by age and gender, education levels, and prevalent family structures are all key factors in assessing and comprehending the crime issue.

Local chambers of commerce, planning offices, or similar entities provide information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/ economic base, its dependence upon neighboring jurisdictions, its transportation system, its economic dependence on nonresidents (such as tourists and convention attendees), its proximity to military installations, correctional facilities, state penitentiaries, prisons, jails, etc., all contribute to accurately gauging and interpreting the crime known to and reported by law enforcement.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors. Although information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, it cannot alone be used as an assessment of the emphasis that a community places on enforcing the law. For example, one city may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible about how to understand and quantify the nature and extent of crime in the United States and in any of the nearly 17,000 jurisdictions represented by law enforcement contributors to this Program. Valid assessments are possible only with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. Some factors that are known to affect the volume and type of crime occurring from place to place are:

Population density and degree of urbanization.
Variations in composition of the population, particularly youth concentration.
Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
Modes of transportation and highway system.
Economic conditions, including median income, poverty level, and job availability.

Cultural factors and educational, recreational, and religious characteristics.
Family conditions with respect to divorce and family cohesiveness.
Climate.
Effective strength of law enforcement agencies.
Administrative and investigative emphases of law enforcement.
Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
Citizens' attitudes toward crime.
Crime reporting practices of the citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. Although many of the listed factors equally affect the crime of a particular area, the UCR Program makes no attempt to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, metropolitan areas, states, or colleges and universities solely on the basis of their population coverage or student enrollment.* Until data users examine all the variables that affect crime in a town, city, county, state, region, or college or university, they can make no meaningful comparisons.

Data users are cautioned against comparing crime trends presented in this report and those estimated by the National Crime Victimization Survey (NCVS), administered by the Bureau of Justice Statistics. Because of differences in methodology and crime coverage, the two programs examine the Nation's crime problem from somewhat different perspectives, and their results are not strictly comparable. The definitional and procedural differences can account for many of the apparent discrepancies in results from the two programs.

The national Uniform Crime Reporting (UCR) Program would like to hear from you.

The staff at the national UCR Program are continually striving to improve their publications. We would appreciate it if the primary user of this publication would complete the evaluation form at the end of this book and either mail it to us at the indicated address or fax it: 304-625-5394.

SECTION I

Summary of the Uniform Crime Reporting (UCR) Program

The Uniform Crime Reporting Program is a nationwide, cooperative statistical effort of nearly 17,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. During 2001, law enforcement agencies active in the UCR Program represented 92 percent of the total population as established by the Bureau of the Census. The coverage amounted to 93 percent of the United States population in Metropolitan Statistical Areas (MSAs), 87 percent of the population in cities outside metropolitan areas, and 88 percent in rural counties.

Since 1930, the FBI has administered the Uniform Crime Reporting Program and issued periodic assessments of the nature and type of crime in the Nation. The Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management; however, its data have over the years become one of the country's leading social indicators. The American public looks to Uniform Crime Reports for information on fluctuations in the level of crime, and criminologists, sociologists, legislators, municipal planners, the media, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee completed a plan for crime reporting that became the foundation of the UCR Program in 1929.

Seven main classifications of crime were chosen to gauge fluctuations in the overall volume and rate of crime. These seven classifications that eventually became known as the Crime Index included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data without regard for local statutes were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the Criminal Justice Information Systems Committees of the IACP and the National Sheriffs' Association (NSA). The IACP, as it has since the Program began, represents the thousands of police departments nationwide. The NSA encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

To function in an advisory capacity concerning UCR policy and to provide suggestions on UCR data usage, a Data Providers' Advisory Policy Board (APB) was established in August 1988. The Board operated until 1993 when a new Board, designed to address all FBI criminal justice information services, was approved. The Board functions in an advisory capacity concerning UCR policy and data collection and use. The UCR Subcommittee of the Board ensures continuing emphasis on UCR-related issues.

The Association of State Uniform Crime Reporting Programs and committees focus on UCR within individual state law enforcement associations and are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when needed.

Redesign of UCR

Although the UCR Program remained virtually unchanged throughout the years in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s. Recognizing the need for improved statistics, law enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive three-phase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to underwrite the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the UCR Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control issues, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study that examined the potential of UCR and concluded with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the recommendations that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July 1984. A survey of law enforcement agencies overlapped phases one and two.

Phase two ended in early 1985 with the production of a draft, *Blueprint for the Future of the Uniform Crime Reporting Program*. The study's Steering Committee reviewed the draft report at a March 1985 meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April 1985, the phase two recommendations were presented at the eighth National UCR Conference. Various considerations for the final report were set forth, and the overall concept for the revised Program was unanimously approved. The joint IACP/NSA Committee on UCR also issued a resolution endorsing the *Blueprint*.

The final report, the *Blueprint for the Future of the Uniform Crime Reporting Program*, was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet future informational needs. There were three recommended areas of enhancement to the UCR Program. First, offenses and arrests would be reported using an incident-based system. Second, data would be collected on two levels. Agencies in level one would report important details about those offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies that would collect expanded detail on all significant offenses would be included in level two. The third proposal involved introducing a quality assurance program.

To begin implementation, the FBI awarded a contract to develop new offense definitions and data elements for the redesigned system. The work involved (a) revising the definitions of certain Index offenses, (b) identifying additional significant offenses to be reported, (c) refining definitions for both, and (d) developing data elements (incident details) for all UCR offenses in order to fulfill the requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an experimental site for implementing the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED with the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, FBI automated data processing personnel developed Automated Data Capture Specifications for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate software revisions needed by the state. SLED completed its testing of the new Program in late 1987.

Following the completion of the pilot project conducted by SLED, the FBI produced a draft of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

During the conference, three overall recommendations were passed without dissent: first, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in directing and implementing the new Program.

Information about the redesigned UCR Program, called the National Incident-Based Reporting System, or NIBRS, is contained in three documents. *Data Collection Guidelines* contains a system overview and descriptions of the offenses, offense codes, reports, data elements, and data values used in the system. *Data Submission Specifications* is for the use of state and local systems personnel who are responsible for preparing magnetic media for submission to the FBI. *Error Message Manual* contains designations of mandatory and optional data elements, data element edits, and error messages.

A NIBRS edition of the *UCR Handbook* was published to assist law enforcement agency data contributors implementing NIBRS within their departments. This document is geared toward familiarizing local and state law enforcement personnel with the definitions, policies, and procedures of NIBRS. It does not contain the technical coding and data transmission requirements presented in the other three NIBRS publications.

NIBRS collects data on each single incident and arrest within 22 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information are gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a by-product of current records systems. The integrity of UCR's long-running statistical series will, of course, be maintained.

It became apparent during the development of the prototype system that the level one and level two reporting proposed in the *Blueprint* might not be the most practical approach. Many state and local law enforcement administrators indicated that the collection of data on all pertinent offenses could be handled with more ease than could the extraction of selected ones. Although "Limited" participation, equivalent to the *Blueprint's* level one, remains an option, most reporting jurisdictions, upon implementation, go immediately to "Full" participation, meeting all NIBRS' data submission requirements.

Implementation of NIBRS is occurring at a pace commensurate with the resources, abilities, and limitations of the contributing law enforcement agencies. The FBI was able to accept NIBRS data as of January 1989, and to date, the following 22 state programs have been certified for NIBRS participation: Arkansas, Colorado, Connecticut, Delaware, Idaho, Iowa, Kansas, Kentucky, Massachusetts, Michigan, Nebraska, North Dakota, Ohio, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, West Virginia, and Wisconsin. In addition, the Metro Transit Police Department in Washington, D.C. was certified to submit NIBRS data to the national Program in 2001.

Twelve state programs and several local law enforcement agencies in two nonprogram states are in various stages of testing NIBRS. Eight other state agencies, as well as agencies in the District of Columbia and Guam, are in various stages of planning and development.

Recent Developments

QUALITY ASSURANCE REVIEW—Initially implemented in June 1997 as a pilot program designed to augment the current national UCR Program, the Quality Assurance Review (QAR) conducted by the CJIS Audit Unit (CAU) became a permanent function in January 2000. The purpose of the QAR is to ensure that each state UCR Program adheres to summary and incident-based reporting methods that are consistent with UCR standards in order to achieve uniform crime reporting nationwide. In 2001, the QAR incorporated a statistical sampling methodology to select records for data quality review and to project the number of discrepant crime reports a state UCR Program submits to the national UCR Program. Agencies are encouraged to avail themselves of the opportunity to assess the integrity of their data and to receive assistance in complying with Program requirements. The CAU in 2001 performed audits of agencies in 11 states: Alabama, Arizona, Connecticut, Florida, Kansas, Maryland, Missouri, New Mexico, Oklahoma, South Carolina, and Wyoming.

NIBRS—The detailed, accurate, and meaningful data produced by NIBRS benefit local agencies. Armed with comprehensive crime data, local agencies can better make their case to acquire and effectively allocate the resources needed to fight crime. Currently, 4,192 law enforcement agencies contribute NIBRS data to the national UCR Program. The data submitted by these agencies represent 17 percent of the U.S. population and 15 percent of the crime statistics collected by the UCR Program.

Recently, the *Handbook For Acquiring A Records Management System (RMS) That Is Compatible With The National Incident-Based Reporting System (NIBRS)* was developed under the sponsorship of the FBI's Criminal Justice Information Services (CJIS) Division and the BJS. This handbook provides comprehensive, step-by-step guidance to local law enforcement agencies that are, or are considering, implementing an automated incident-based records management system that is compatible and compliant with NIBRS. The handbook provides instructions on planning for and conducting a system acquisition and preparing the agency for conversion to the new system and to NIBRS. It includes implementation tips from other agencies and vendors and presents relevant examples. The handbook is a companion document to a cost model that helps law enforcement agencies estimate the costs of implementing and operating such a system. The handbook is available on the FBI Internet site at www.fbi.gov/ucr/ucr.htm.

The CJIS Division's Programs Support Section is currently working on the conceptual design of a new set of publications to exhibit NIBRS data. Each component of the NIBRS Publication Series will demonstrate that the NIBRS data set provides richer and more detailed information about crime across a variety of geographic units than has been previously available. Recognizing that there is a responsibility on the part of the national Program to demonstrate the utility of NIBRS, each component of the NIBRS Publication Series will:

- Demonstrate the potential uses of NIBRS.
- Convey a change in philosophical approach to crime analysis and publication.
- Provide for the development of tools to assist others in using and analyzing NIBRS data.

The Measurement of White-Collar Crime Using Uniform Crime Reporting (UCR) Data, a report in the series, is available on the FBI's Internet site at www.fbi.gov/ucr/ucr.htm and is just one example of the analysis possible with NIBRS data.

CRIME CLOCK

Every 2.7 seconds One Crime Index Offense

Every 3.0 seconds One Property Crime

Every 4.5 seconds One Larceny-theft

Every 14.9 seconds One Burglary

Every 25.7 seconds One Motor Vehicle Theft

Every 22.0 seconds One Violent Crime

Every 34.8 seconds One Aggravated Assault

Every 1.2 minutes One Robbery

Every 5.8 minutes One Forcible Rape

Every 32.9 minutes One Murder

The Crime Clock should be viewed with care. The most aggregate representation of UCR data, it conveys the annual reported crime experience by showing a relative frequency of occurrence of Index offenses. It should not be taken to imply a regularity in the commission of crime. The Crime Clock represents the annual ratio of crime to fixed time intervals.

SECTION II
Crime Index Offenses Reported

Crime Index Total

Definition

The Uniform Crime Reporting (UCR) Program's Crime Index is composed of selected offenses used to gauge fluctuations in the volume and rate of crime reported to law enforcement. These selected offenses include the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault, and the property crimes of burglary, larceny-theft, and motor vehicle theft. The crime classifications were selected at the inception of the UCR Program in 1929 because they were considered by law enforcement and criminologists of the time to be the most serious and the most commonly reported crimes occurring in all areas of the Nation. Arson was added to the Index in 1979 by congressional mandate, and the UCR Program established the Modified Crime Index to include arson. More information regarding the Crime Index can be found in Appendix II of this report.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	11,608,070	4,124.8
	2001	11,849,006	4,160.5
Percent change		+2.1	+0.9

Special Note Regarding the Events of September 11, 2001

Due to the unique nature and the statistical implications inherent in the events of September 11, 2001, the crimes committed in those attacks are not included in the UCR Program's offense rate, trend, or clearance data. Information regarding the September attacks are provided in a special report in this publication. (See Section V.)

Table 2.1

Crime Index Total by Month

Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	8.2	8.5	8.0	7.7	7.7
February	7.3	7.5	7.2	7.3	6.8
March	8.0	8.2	8.0	8.2	7.9
April	8.0	8.0	7.9	8.0	8.1
May	8.4	8.4	8.4	8.7	8.6
June	8.5	8.5	8.6	8.6	8.5
July	9.1	9.0	9.1	9.1	9.0
August	9.0	9.0	9.2	9.1	8.9
September	8.6	8.4	8.5	8.5	8.5
October	8.7	8.5	8.7	8.8	9.1
November	7.9	7.8	8.2	8.0	8.3
December	8.3	8.2	8.4	7.9	8.5

National Offenses, Trends, and Rates

The estimated number of Crime Index offenses for 2001 was 11,849,006. This number reflects an increase of 2.1 percent from the 2000 estimate, the first increase since 1991. However, when looking at 5- and 10-year trends, the 2001 figure represents a 10.2-percent decrease from the 1997 figure and also a 17.9-percent decline from the 1992 level. (See Table 1.)

In 2001, violent crime comprised 12.1 percent and property crime accounted for 87.9 percent of the Crime Index total. The property crime of larceny-theft, which comprised 59.7 percent of the Crime Index, was the most frequently occurring of all Index crimes, with an estimated 7,076,171 offenses. The violent crime of murder, which accounted for 0.1 percent of the Crime Index, occurred least frequently with an estimated total of 15,980 offenses. (See Table 1.)

An estimated monetary value of $17.1 billion in stolen property was reported in 2001. Thefts of motor vehicles accounted for the greatest monetary loss, followed by thefts of jewelry and precious metals; currency, notes, etc.; and televisions, radios, stereos, etc.

An estimated 32.4 percent of property reported stolen in 2001 was recovered. Property types with the greatest percentage of recoveries were motor vehicles, clothing and furs, livestock, and consumable goods. (See Table 24.)

The Crime Index rate per 100,000 inhabitants in 2001 was 4,160.5, a 0.9-percent increase from the 2000 rate. In addition, this number reflected a 15.6-percent decrease from the 1997 rate and a 26.5-percent decline from the 1992 rate. (See Table 1.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeast comprised 18.9 percent of the Nation's population in 2001 and posted 13.7 percent of the Crime Index offenses reported to the UCR Program. (See Table 3.) The Northeast was the only region to experience decreases in the number of offenses and the rate per 100,000 inhabitants in 2001. This region showed a 1.5-percent decrease in Crime Index offenses from 2000 and a 1.9-percent decline in the rate per 100,000 inhabitants. (See Table 4.)

The Midwest

The Midwest, which accounted for 22.7 percent of the U.S. population, recorded 21.7 percent of the Nation's Crime Index offenses in 2001. (See Table 3.) This region experienced an increase in both the volume (1.6 percent) and the rate of Crime Index offenses per 100,000 persons (1.1 percent) over the prior year's volume and rate. (See Table 4.)

The South

The South, the Nation's most populous region in 2001, comprised 35.8 percent of the total population and experienced 40.9 percent of the total Crime Index offenses. (See Table 3.) The number of offenses reported in this region increased 1.9 percent from the 2000 level. The Crime Index rate per 100,000 inhabitants increased 0.3 percent. (See Table 4.)

The West

The West, which constituted 22.6 percent of the population, accounted for 23.7 percent of the Nation's Crime Index offenses. (See Table 3.) In 2001, this region had a 5.1-percent increase in the number of offenses compared to 2000 levels and a 3.0-percent increase in rate. (See Table 4.)

Community Types

The UCR Program's data are often presented in aggregations representing three types of communities: Metropolitan Statistical Areas (MSAs) which made up approximately 80 percent of the total U.S. population in 2001, cities outside MSAs which comprised approximately 8 percent of the Nation's population, and rural counties which accounted for approximately 12 percent of the U.S. population during 2001. (See Appendix III and Table 2.)

In 2001, the Nation's MSAs experienced an Index crime rate of 4,474.9 per 100,000 persons. Cities outside of MSAs had a crime rate of 4,450.4 per 100,000 inhabitants, and rural counties had a crime rate of 1,892.4 per 100,000 persons. (See Table 2.)

Population Groups Trends and Rates

The population group classifications used by the UCR Program comprise six city and two county designations. (See Appendix III for more information on population groups.) In 2001, the Nation's cities collectively experienced an increase of 2.0 percent in the total number of crimes reported and had a rate of 5,124.8 Index crimes per 100,000 inhabitants. Additionally, suburban counties and rural counties experienced increases in total crimes reported—2.4 percent and 1.9 percent, respectively—with rates of 3,038.9 and 1,979.2 Crime Index offenses per 100,000 persons, respectively. (See Tables 12 and 16.)

Within city groupings, the largest increase of reported crime, 4.1 percent, was in cities with populations of 250,000 to 499,999. The smallest change in volume from 2000, a 0.5 percent increase, occurred in cities with populations of 1 million and over. In 2001, cities with populations spanning 500,000 to 999,999 had a rate of 7,328.0 Crime Index offenses per 100,000 inhabitants, the highest among the Nation's cities. Cities with populations of 10,000 to 24,999 had the lowest rate of offenses per 100,000 inhabitants—3,875.4. (See Tables 12 and 16.)

Clearances

Clearances occur either by arrest or by exceptional means, i.e. when circumstances beyond the control of law enforcement prevent the placing of formal charges against the offender. (More information regarding clearances can be found in Section III of this report.) In 2001, 19.6 percent of Crime Index offenses were cleared overall. Law enforcement nationwide cleared 16.2 percent of property crimes and 46.2 percent of violent crimes. (See Table 25.)

Among the Crime Index offenses in 2001, murder was the offense cleared most often—62.4 percent. Burglary offenses experienced the lowest percentage of clearances—12.7 percent. (See Table 25.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as clearance by arrest, even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Nationally, 18.6 percent of the total clearances for 2001 involved only persons under the age of 18. The Crime Index offense with the highest percentage of juvenile clearances was larceny-theft (21.9 percent). The offense with the lowest percentage of juvenile clearances (5.0 percent) was murder and nonnegligent manslaughter. Arson is typically an offense with a large involvement of juvenile offenders; of arson offenses cleared, 45.5 percent involved only juvenile offenders. (See Table 28.)

Arrests

Total Arrests

The estimated total of Crime Index offense arrests for 2001 was 2,245,597, approximately 16.4 percent of the U.S. total estimated arrests. Of that total, approximately 27.9 percent were arrests made for violent crimes and 72.1 percent were arrests for property crimes. Larceny-theft arrests accounted for 71.7 percent of all property crime arrests. Aggravated assaults made up the greatest portion, 76.2 percent, of violent crime arrests. (See Table 29.)

Arrest Trends

The total Crime Index arrests for all ages for 2001 declined slightly—0.7 percent—from 2000 levels. In viewing the data by age, the total number of adults arrested increased 1.0 percent from the 2000 figure, and the total number of juvenile arrests declined 5.0 percent when compared to the previous year's number.

Arrests for arson offenses increased more than arrests for any other Index crime category in 2001. The number of arson arrests was up 14.7 percent from the prior year's figure as arson arrests of adults increased 22.8 percent and arson arrests for juveniles increased 8.1 percent from 2000 to 2001. (See Table 36.)

Looking at a 5-year trend, overall, the number of Crime Index arrests in 2001 decreased 17.7 percent from 1997 arrests. Violent crime arrests decreased 11.4 percent, and property crime arrests fell 20.0 percent in that 5-year period. In 2001, juvenile and adult arrests for Crime Index offenses also decreased (28.1 percent and 13.2 percent, respectively) when compared to 1997 arrest data. (See Table 34.)

Ten-year trends in Crime Index offense arrests showed an overall 22.5-percent decrease. Juvenile arrests in that time frame fell 30.7 percent, and adult arrests declined 19.1 percent. (See Table 32.)

The number of males arrested for Crime Index offenses in 2001 decreased 1.0 percent from the number arrested in 2000. The number of females arrested in 2001 rose slightly (0.2 percent) from the 2000 level. Additionally, the number of juvenile males arrested in 2001 dropped 6.6 percent, and the percentage of juvenile females declined 1.3 percent when compared to the prior year's number. (See Table 37.)

When comparing 1997 to 2001 arrest data, the 5-year trend indicated that the number of males arrested decreased 19.1 percent, and the number of females arrested declined 13.6 percent. The number of juvenile males arrested decreased 31.2 percent in 2001 from the 1997 total, and the number of juvenile females arrested dropped 19.3 percent. (See Table 35.)

The number of males arrested in 2001 fell 26.8 percent when compared to the number arrested in 1992. The number of females arrested decreased 7.9 percent in that same 10-year period. Additionally, the number of juvenile males arrested dropped 37.7 percent, and the number of juvenile females arrested declined 5.5 percent. (See Table 33.)

Distribution

In 2001, statistics showed that 73.8 percent of all persons arrested for Crime Index offenses were over the age of 18, and 26.2 percent were under age 18. Of the total number of juveniles arrested, 36.9 percent were under age 15. (See Table 38.) Additionally, 73.3 percent of all persons arrested for Crime Index offenses in 2001 were males, and 26.7 percent were females. (See Table 42.) Of the persons arrested, 64.4 percent were white, 33.1 percent were black. The remainder were of other races. (See Table 43.)

Violent Crime Total

Definition

According to the Uniform Crime Reporting definitions, violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. All violent crimes involve force or threat of force.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	1,425,486	506.5
	2001	1,436,611	504.4
Percent change		+0.8	- 0.4

National Trends, Distributions, and Rates

For the first time since 1992, data reported to the UCR Program indicated a slight increase in the violent crime estimate for the Nation. A comparison of the 2001 violent crime estimate of 1,436,611 with the 2000 estimate demonstrated a 0.8-percent rise. However, the 2001 number was substantially lower than the violent crime volumes of both 5 and 10 years ago. Violent crime estimates in 2001 were 12.2 percent lower than the figure in 1997 and 25.7 percent below the 1992 estimate. Within the violent crime category, robbery volume rose 3.7 percent, and murder volume increased 2.5 percent. Forcible rape recorded the smallest increase of all violent crimes at 0.3 percent. The estimated number of aggravated assaults represented a slight decrease for the year, 0.5 percent.

Proportionally, aggravated assault accounted for the largest share of violent crimes, 63.1 percent. Robbery constituted 29.4 percent of total violent crimes, forcible rape comprised 6.3 percent, and murder made up 1.1 percent of the total.

Computing the violent crime rate per 100,000 persons for 2001 resulted in an overall estimate of 504.4 offenses per 100,000 individuals; this figure marked a 0.4-percent decrease from the 2000 rate. Aggravated assault occurrences registered a rate of 318.5 per 100,000 inhabitants, a decrease of 1.7 percent from the 2000 rate. Robbery posted a rate of 148.5, an increase of 2.4 percent over the previous year's rate. Forcible rape was measured at a rate of 31.8 offenses per 100,000 persons, indicating a decrease of 0.8 percent in the forcible rape rate since 2000. Murder and nonnegligent manslaughter had a rate of 5.6 per 100,000 population, a 1.3-percent increase from the previous year's rate.

A comparison of the 2001 violent crime rate with those recorded 5 and 10 years ago indicated a 17.4-percent decrease since 1997 and a 33.4-percent drop since 1992. National crime estimates and rates for the past 20 years are documented in Table 1.

Table 2.2

Violent Crime Total by Month
Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	8.1	8.4	8.2	7.7	7.6
February	7.2	7.2	7.1	7.4	7.0
March	8.2	8.1	7.9	8.4	8.3
April	8.0	8.0	8.1	8.3	8.5
May	8.9	8.7	8.8	9.1	9.0
June	8.7	8.5	8.5	8.6	8.6
July	9.2	9.1	9.3	9.0	9.0
August	9.2	9.2	9.1	8.9	8.7

November	7.8	7.7	8.0	7.6	7.9
December	7.6	7.8	8.0	7.7	7.9

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. A map of the United States delineating the regions is included in Appendix III. Estimated crime volume, rates, and percent changes by region are published in Table 4.

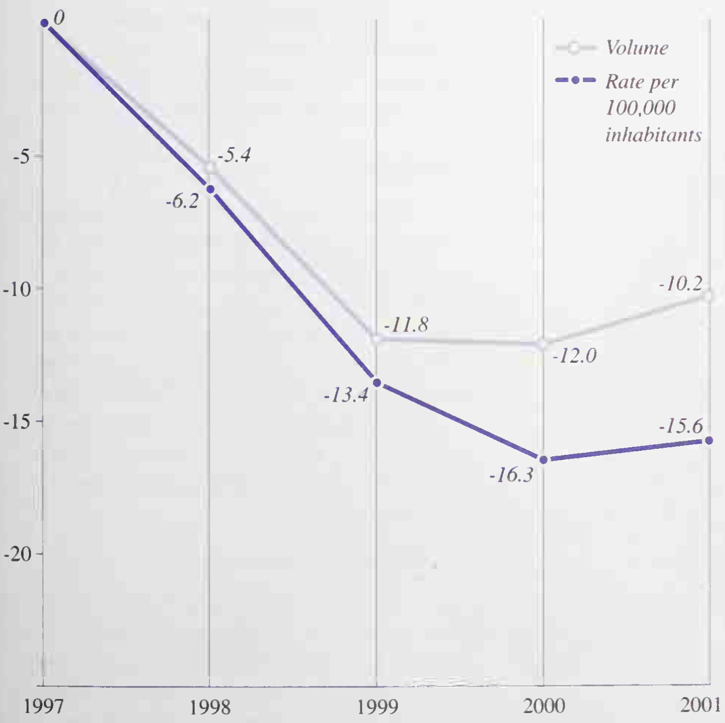
The Northeast

During 2001, 16.1 percent of violent crime occurred in the Northeastern States, which claimed 18.9 percent of the population. (See Table 3.) The region registered a 2.7-percent decrease in the estimated volume of violent crime. The Northeast experienced 429.7 violent offenses per 100,000 people, a decrease of 3.1 percent since 2000. However, the number of murders within the region increased 5.6 percent, and the murder rate per 100,000 increased 4.4 percent over the previous year's rate. (See Table 4.)

Figure 2.2

Crime Index

Percent change from 1997



The Midwest

The Midwest, which contained 22.7 percent of the U.S. population, reported 19.5 percent of the total violent crime that occurred in 2001. The region had a 1.6-percent rise in violent crime volume over the prior year's estimated volume. The region recorded a violent crime rate of 432.0 per 100,000 persons, an increase of 1.1 percent over the 2000 rate. The number of murders within the region increased 3.4 percent, and the murder rate per 100,000 persons increased 2.9 percent. (See Tables 3 and 4.)

The South

During 2001, 41.1 percent of all violent crimes occurred in the South, which was the Nation's most heavily populated region with 35.8 percent of the U.S. population. (See Table 3.) The Southern States recorded a rate of 579.9 violent crime offenses per 100,000 persons—a drop of 0.3 percent from the 2000 figure. Regarding the volume of violent crime occurrences, the South experienced an overall 1.3-percent rise. However, this region was the only one to report a decrease in the number of murders (-1.5 percent) and a decline in the murder rate (-3.0 percent). (See Table 4.)

The West

Approximately 22.6 percent of the population resided in the West, which reported 23.3 percent of total violent crimes in 2001. (See Table 3.) The Western Region registered 520.3 violent crimes per 100,000 persons, a decline from the prior year's figure of 0.3 percent. However, the West reported a small increase in the volume of violent crimes (1.7 percent) including an 8.0-percent increase in the number of murders and a 5.9-percent increase in the murder rate. (See Table 4.)

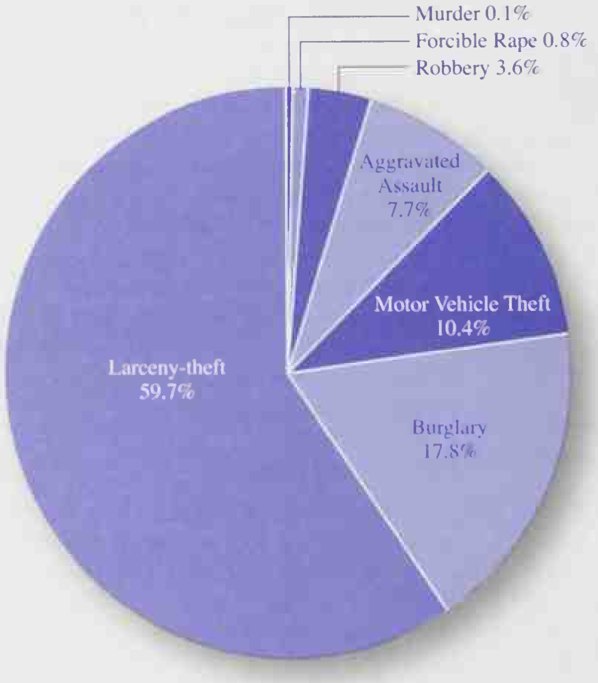
Community Types

Metropolitan Statistical Areas, or MSAs, are those community types made up of a central city or urbanized area of at least 50,000 inhabitants, the county containing that city or area, and any other adjacent suburban counties with close cultural and economic ties to the area. In 2001, approximately 80 percent of the U.S. population resided in an MSA, and this community type accounted for 88.7 percent of the Nation's total violent crime. Within MSAs, violent crime was measured at a rate of 560.0 offenses per 100,000 persons in 2001. Cities outside metropolitan statistical areas, which accounted for 8 percent of the population of the Nation, recorded a rate of 392.8 violent crimes per 100,000 people. Collectively, these cities experienced 6.2 percent of the country's violent crime volume. The Nation's rural counties, accounting for 12 percent of the Nation's population, registered a violent crime rate of 211.0 offenses per 100,000 inhabitants, and they accounted for the remaining 5.1 percent of violent crime. (Based on Table 2.)

Figure 2.3

Crime Index Offenses

Percent distribution [1]2001



---

[1] Due to rounding, the percentages do not add to 100.0 percent.

Population Groups Trends and Rates

Cities in the United States, when viewed as a collective group, reported an increase of 0.4 percent in the volume of violent crime when compared to the previous year's data. The Nation's cities with populations of 100,000 to 499,999 experienced the greatest rise in violent crime, 1.8 percent. Those communities with populations under 10,000 reported a minimal increase of 0.1 percent. Cities of 25,000 to 49,999 in population recorded a decrease of 0.7 percent in violent crime, and cities within the 500,000 to 999,999 population range reported a 0.3-percent decline. Rural and suburban counties both showed increases in violent crime volume, 0.6 and 0.5 percent, respectively. Crime trends for cities and counties can be found in Table 12.

Weapons Distribution

Data concerning weapons usage are collected for the crimes of murder, robbery, and aggravated assault. Personal weapons such as hands, fists, feet, etc. were used in 31.1 percent of those crimes. Firearms were involved in 26.2 percent of incidents. Knives or cutting instruments were used in 14.9 percent of violent crimes. Other dangerous weapons were employed in the remaining 27.8 percent of offenses. (See Tables 19 and 2.10.) Weapon information is not collected for forcible rape.

Clearances

For UCR purposes, a clearance is counted when a crime is solved either by arrest or by exceptional means, i.e., when some reason outside the control of law enforcement precludes making an arrest. In the United States in 2001, 46.2 percent of all violent crimes were cleared. Within this category, 62.4 percent of murders were cleared, 56.1 percent of aggravated assaults, 44.3 percent of forcible rapes, and 24.9 percent of robberies were cleared. (See Table 25.)

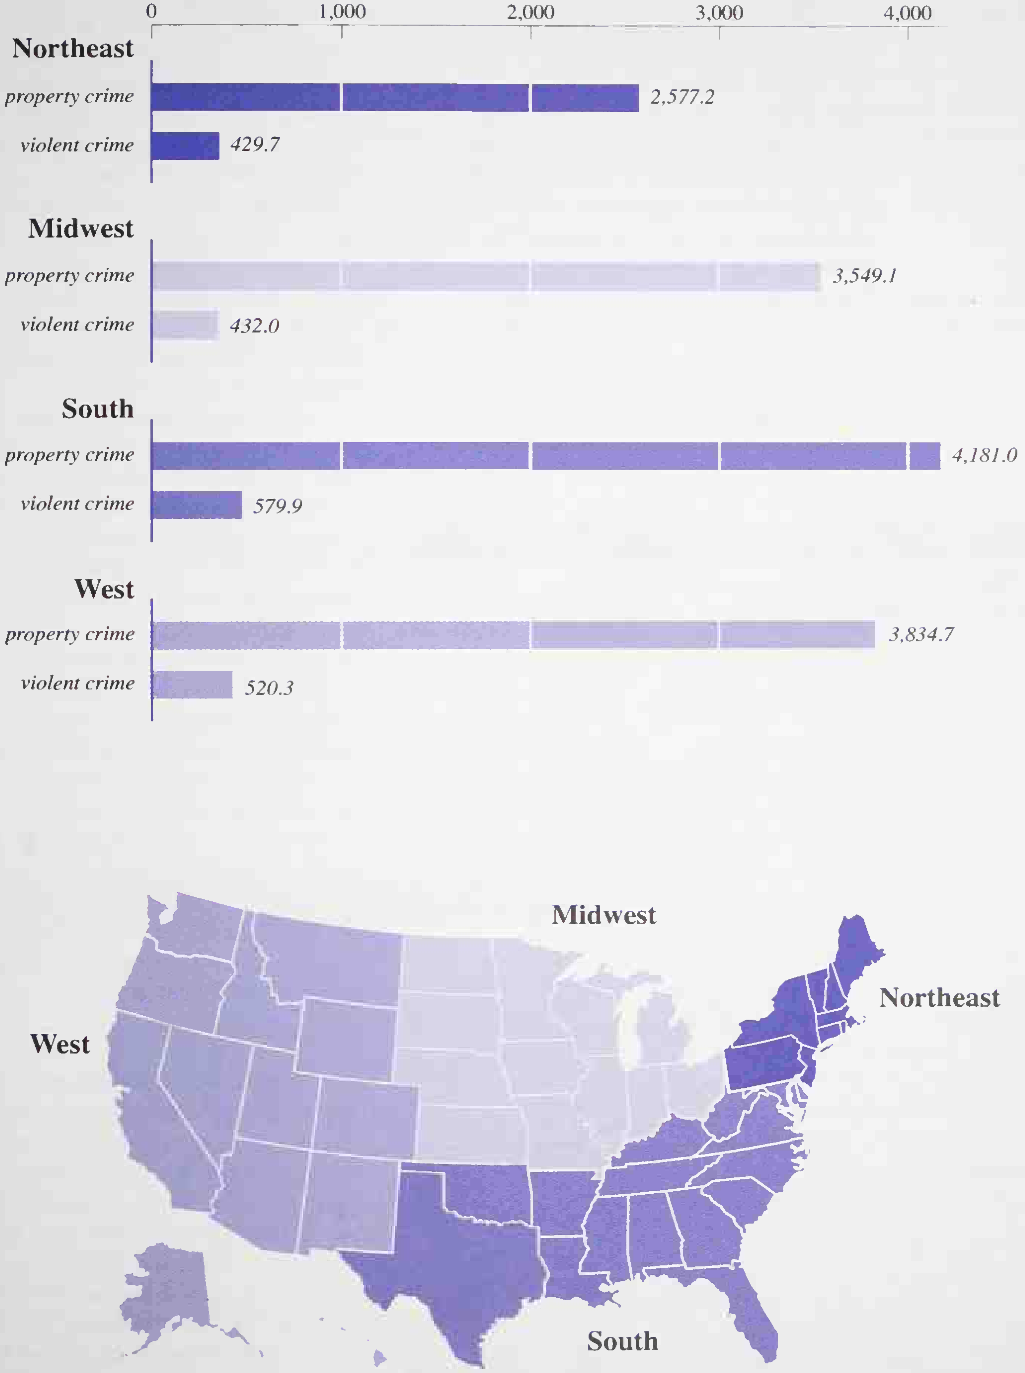
Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as cleared by arrest, even though a physical arrest may not have occurred. In

Figure 2.4

Regional Crime Rates 2001

Violent and property crimes, per 100,000 inhabitants



addition, as defined by the Program, clearances involving both adult and juvenile offenders are classified as adult clearances. Therefore, juveniles who accompany an adult in the commission of an offense were not included in these figures.

Nationally, 12.1 percent of violent crime clearances involved persons under 18 years of age. Among violent crimes, robbery had the highest juvenile clearances, 14.4 percent. Clearances for the offense of forcible rape involved only juveniles in 12.4 percent of cases. Juveniles were the perpetrators in 11.8 percent of aggravated assault cases cleared. The crime of murder posted the lowest juvenile clearances, 5.0 percent. (See Table 28.) The topic of clearances is discussed further in Section III.

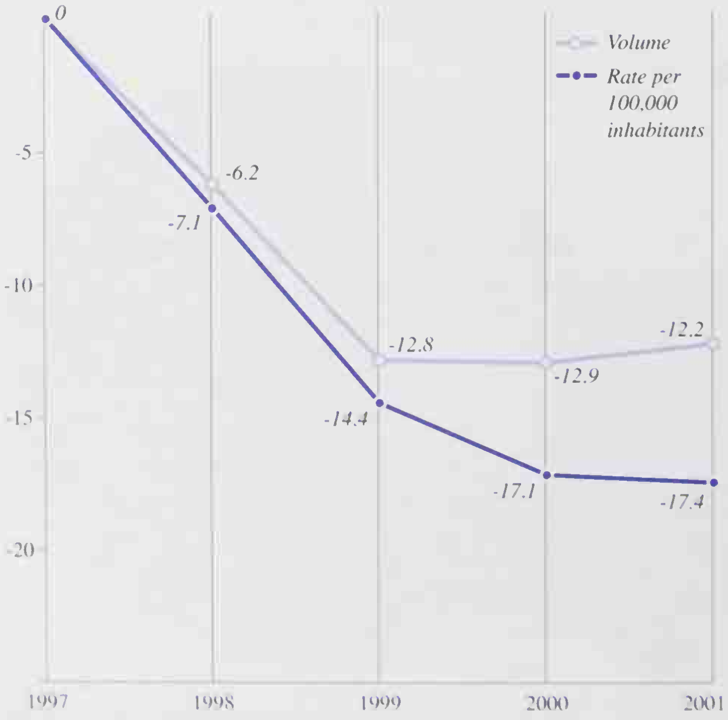
Arrests

In 2001, there were an estimated 627,132 arrests for violent crimes. Approximately 4.6 percent of total estimated arrests for that year involved a crime of violence. Aggravated assault accounted for 76.2 percent of estimated violent crime arrests; robbery, 17.3 percent; forcible rape, 4.3 percent; and murder, 2.2 percent. (See Table 29.)

Figure 2.5

Violent Crime

Percent change from 1997



Violent crime arrests in 2001 increased 0.1 percent from the previous year's figure. However, three of the four violent crime offenses showed decreases in arrests for 2001. Murder arrests were down 2.6 percent, forcible rape arrests declined 2.3 percent, aggravated assault arrests fell 0.1 percent. Robbery alone showed an increase in arrests, 2.1 percent. Five- and 10-year comparisons of total violent crime arrests indicated an 11.4-percent decrease from the number of arrests in 1997, and a 10.7-percent decline from the 1992 number. (See Tables 32, 34, and 36.)

The Nation recorded a violent crime arrest rate of 225.6 per 100,000 inhabitants in 2001. The Western Region had the highest violent crime arrest rate at 289.1 per 100,000 persons. The South followed with 202.1, the Northeast with 198.7, and the Midwest with 187.2 arrests per 100,000 inhabitants. (See Table 30.)

Collectively, the Nation's cities registered a rate of 255.9 violent crime arrests per 100,000 people. Within this group, cities with more than 250,000 in population reported an arrest rate of 359.0. The lowest rate was recorded by law enforcement agencies in cities of 10,000 to 24,999 inhabitants, 167.9 arrests per 100,000 persons. Suburban counties reported a violent crime arrest rate of 167.6 per 100,000 people, and rural counties registered a rate of 137.1. (See Table 31.) The topic of arrests is discussed in greater detail in Section IV.

Arrestees

The number of persons under 18 years of age arrested for violent crime decreased 1.9 percent, and arrests of adults increased 0.5 percent in 2001. When considering gender, males accounted for 82.7 percent of total arrests. Arrestees were most often adults (84.6 percent) and most often white (60.2 percent). Blacks made up 37.6 percent, and other races accounted for the remainder of violent crime arrests. (See Tables 36, 38, 42, and 43.)

Murder

Definition

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	15,586	5.5
	2001	15,980	5.6
Percent change		+2.5	+1.3

National Offenses and Trends

Approximately 15,980 persons were murder victims in 2001. This estimate indicated a 2.5-percent increase over the 2000 approximation, and it was the second consecutive annual increase in the number of murders occurring nationwide. However, the 2001 estimate represented a 12.2-percent decrease from the 1997 estimate and a 32.7-percent drop from the estimate recorded for 1992. The 2001 estimate yielded a rate of 5.6 murders for every 100,000 U.S. inhabitants. That rate is 1.3 percent higher than the rate estimated for 2000. (See Table 1.)

Table 2.3

Murder by Month[1]

Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any murder tables (Tables 2.3-2.15). See special report, Section V.

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected from the Nation's four regions reflect the following:

The Northeast

The Northeast, with 18.9 percent of the Nation's population, accounted for 14.3 percent of the murders during 2001. With an estimated 2,278 murders, the Northeastern States registered a 5.6-percent rise in murder volume from the previous year's figure. The rate per 100,000 inhabitants showed a 4.4-percent increase in the murder rate for the region— 4.2 murders per 100,000 persons. (See Tables 3 and 4.)

The Midwest

The Midwest, which represented 22.7 percent of the U.S. population in 2001, accounted for 21.3 percent of the Nation's murders. The region had an estimated 3,405 murders, an increase of 3.4 percent from the 2000 number. The Midwestern States experienced 5.3 murders per 100,000 inhabitants, an increase of 2.9 percent over the murder rate recorded for 2000. (See Tables 3 and 4.)

The South

The Southern Region of the Nation accounted for 35.8 percent of the population and 42.4 percent of the murders committed in 2001. The Southern States experienced an estimated 6,780 murders, which represented a 1.5-percent drop for this region from the previous year's volume. The region posted a murder rate of 6.7 per 100,000 inhabitants, a 3.0-percent decline from the 2000 rate. The South was the only region to report a decline in both murder volume and rate. (See Tables 3 and 4.)

Figure 2.6

Total[2]	13,752	10,503	3,214	35

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any murder tables (Tables 2.3-2.15). See special report, Section V.

[2] Total number of murder victims for whom supplemental homicide data were received.

The West

This region accounted for 22.6 percent of the population and 22.0 percent of murders in 2001. An estimated 3,517 murders occurred in the Western States during 2001, representing an 8.0-percent increase in murder from the 2000 volume. The West experienced a 5.9-percent rise in the murder rate from the previous year's figure, with 5.5 murders per 100,000 people. (See Tables 3 and 4.)

Community Types

Metropolitan Statistical Areas, or MSAs, are those community types made up of a central city of at least 50,000 inhabitants, the county containing that city, and adjacent areas with strong economic or cultural ties to the central city. MSAs accounted for approximately 80 percent of the U.S. population in 2001, and they experienced 87.0 percent of total estimated murders. Murder occurred at a rate of 6.1 per 100,000 inhabitants of MSAs for 2001. Those cities outside of metropolitan areas, which accounted for 8 percent of the Nation's population, reported an estimated 3.5 murders per 100,000 people and 5.0 percent of the murder volume. The Nation's rural counties, with 12 percent of the population, reported 8.0 percent of the total murders and 3.7 murders per 100,000 people. (See Table 2.)

[2] Because of rounding, the percentages may not add to total.

[3] Does not include unknown ages.

Population Groups Trends and Rates

Collectively, the Nation's cities experienced a 3.5-percent increase in the number of murders over the previous year's estimate. Cities with populations of 250,000–499,999 recorded the largest increase in murder, 10.2 percent. Cities with 25,000–49,999 inhabitants experienced the only decrease in the number of murders, down 5.5 percent from the 2000 estimate. (See Table 12.)

Considering murder rates per 100,000 individuals, cities with 500,000–999,999 in population reported the highest murder rate at 14.3. Those cities with populations of 10,000–24,999 posted the lowest rate at 2.8 per 100,000 people. Suburban counties recorded a murder rate of 3.8; rural counties registered a rate of 3.6 murders per 100,000 inhabitants. (See Table 16.)

Supplementary Homicide Reports

During 2001, UCR contributing agencies submitted supplemental information concerning 13,752 homicides. The Supplementary Homicide Report (SHR) supplies data on the age, sex, and race of both the victim and the offender, the type of weapon used, the relationship of the victim to the offender, and the circumstance surrounding the incident.

Victims

Based upon the 2001 SHR data, the victims of homicide were most often male (76.6 percent) and adult (89.6 percent). By race, 49.8 percent of murder victims were white, and 47.5 percent were black. The remaining victims, 2.7 percent, were of other races (Asian or Pacific Islander and American Indian or Alaskan Native). Of the total murder victims where age and sex were known, 9.1 percent of males and 14.8 percent of females were under 18 years of age. (See Table 2.5.)

Table 2.7

Murder Victim/Offender Relationship
by Age, 2001
[Single victim/single offender]

		Age of offender		
Age of victim	*Total*	*Under 18*	*18 and over*	*Unknown*
Total	6,987	369	5,974	644
Under 18	767	113	610	44
18 and over	6,085	252	5,265	568
Unknown	135	4	99	32

Of the homicides for which supplemental data were received, the victim-offender relationship was unknown for 44.6 percent of the victims. Approximately 42.3 percent of the victims knew their assailants (29.2 percent were acquainted with their killers and 13.1 percent were related to them). Another 13.1 percent of murder victims were known to have been murdered by a stranger. The 2001 SHR data indicated that nearly a third of female victims were slain by a husband or boyfriend, 32.2 percent. Male homicide victims were killed by

[2] Total number of murder victims for whom supplemental homicide data were received.

a wife or girlfriend in 2.8 percent of the incidents. (Based on Table 2.12.)

Offenders

Reviewing the supplemental data for which age, sex, and race of offenders were known revealed that 90.3 percent of murder offenders were male, and 91.7 percent were over the age of 18. Considering those offenders for which race was known, 50.3 percent of murder offenders were black and 47.2 percent were white. Persons of other races comprised 2.5 percent of offenders. (Based Table 2.6.)

Supplemental data for 2001 indicated that of those incidents with one victim and one offender, 93.6 percent of black homicide victims were killed by a black offender, and 85.4 percent of white victims were slain by white offenders. (See Table 2.8.)

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any murder tables (Tables 2.3-2.15). See special report, Section V.

[2] Total number of murder victims for whom supplemental homicide data were received.

Weapons

Reviewing those incidents in which the murder weapon was known demonstrated that 69.5 percent involved the use of a firearm. Within the firearm category, handguns were used in 77.9 percent of homicides, shotguns were used in 5.7 percent, and rifles in 4.5 percent. Other or unknown firearms accounted for 12.0 percent. Knives or cutting instruments were employed in 14.3 percent of homicides for which the weapon was known. Personal weapons such as hands, fists, or feet, etc. were used in 7.4 percent of murders. Blunt objects were the weapon used in 5.3 percent of murders. Other dangerous weapons (such as poison, explosives, etc.) accounted for the remainder. (See Table

2.10.) Table 20 contains a breakdown by state of weapons used in homicides.

Circumstances

Supplemental information concerning the circumstance of homicides showed that the victims were involved in an argument with the offender in 28.0 percent of the incidents. A homicide occurred in connection with another felony (e.g., robbery, arson, narcotic drug laws) in 16.6 percent of incidents. In 0.5 percent of homicide cases, investigators suspected that a felony had been in progress. The circumstance was unknown in 32.4 percent of homicides. (See Table 2.12.)

Clearances

For UCR purposes, a crime is cleared when it is solved either by arrest or by exceptional means. An exceptional clearance is counted when circumstances outside the control of law enforcement (such as the death of the offender) preclude making an arrest.

Table 2.16

2000	164	138	123	4	7	4	15	8	3
2001	215	176	136	10	13	17	25	6	8

[1] The killing of a felon, during the commission of a felony, by a private citizen.

Murder, the most serious offense, was cleared more often than any other Index offense, 62.4 percent.

Murder was also the offense that had the lowest percentage of clearances involving only juveniles, 5.0 percent. (See Table 28.)

By population groups, cities with 25,000–49,999 inhabitants recorded the highest percentage of murders cleared at 77.9 percent. Cities with 250,000 inhabitants or more cleared 56.5 percent of murders, the lowest percentage among population groups. Law enforcement agencies cleared 66.9 percent of murders in suburban counties; 77.5 percent of murders were cleared in rural counties. (See Table 25.)

Arrests

Nationally, there were an estimated 13,653 arrests for murder during 2001. Of those arrested, 51.3 percent were under the age of 25, 41.2 percent fell into the 18–24 age group, and 10.2 percent were under the age of 18. (See Tables 29, 38, and 41.)

In 2001, total arrests for murder decreased 2.6 percent when compared with the previous year's data. (See Table 36.) Five- and 10-year trends in murder arrests showed a drop of 21.2 percent from the 1997 arrest total and a decrease of 34.2 percent from the 1992 figure. (See Tables 32 and 34.)

Male arrests for murder fell 2.0 percent in 2001 when compared to the previous year's figure; however, male arrests declined 23.3 percent from 1997 and 37.2 percent from 1992. Female arrests in 2001 fell 6.8 percent from the prior year, 1.7 percent from 1997 data, and 6.3 percent from 1992 figures. (See Tables 33, 35, and 37.)

Arrests of juveniles for murder fell 2.2 percent during 2001, and arrests of adults decreased 2.6 percent from the 2000 report. Juvenile murder arrests for 2001 represented a 47.3-percent decrease from the total juvenile murder arrests in 1997, and a 62.0-percent decrease from the 1992 total. (See Tables 32, 34, and 36.)

Murder arrestees were most often male (87.5 percent) and adult (89.8 percent). By race, the number of arrestees was nearly evenly split between black arrestees and white arrestees at 48.7 percent and 48.4 percent, respectively. The remaining arrestees were Asian or Pacific Island-

Forcible Rape

Definition

Forcible rape, as defined in the Uniform Crime Reporting Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	90,178	32.0
	2001	90,491	31.8
Percent change		+0.3	-0.8

National Rates and Trends

The UCR Program has traditionally defined rape victims as females. Approximately 90,491 forcible rapes of females were recorded during 2001. Based on that volume, 62.2 of every 100,000 females were victims of forcible rape in 2001 compared to 62.7 in the previous year. These figures indicated a slight percentage increase in the number of rapes (0.3 percent), but a decrease in the rate of female rapes (0.8 percent).

The 2001 female forcible rape rate of 62.2 continued a downward trend. In 1999, there were an estimated 64.1 rapes for every 100,000 females in the Nation; in 1997, there were 70.3 victims for each 100,000 females; for 1992, the estimate was 83.7.

Table 2.18

Forcible Rape by Month

Percent Distribution, 1997-2001

November	7.4	7.6	7.9	7.5	7.6
December	6.7	7.1	7.2	6.9	7.4

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeast Region reported the lowest percentage of the Nation's female rapes at 13.4 percent and the lowest forcible rape rate at 44.0 per 100,000 females. The Northeastern figures showed increases of 1.6 percent in the number of rapes and 1.2 percent in the rate of rapes over the prior year's numbers.

The Midwest

The Midwestern States reported 25.1 percent of the forcible rapes occurring in the Nation in 2001, an increase for the region of 1.5 percent from the prior year's report. A regional rate of 68.6 rape incidents for 100,000 females showed a 1.0-percent increase from the 2000 rate.

The South

Regionally, the highest percentage of female rapes, 37.8 percent, occurred in the South. The data indicated a modest decline of 0.6 percent in the number of forcible rape occurrences from the 2000 figure. The estimated rate of 65.8 rapes per 100,000 females calculated to a 2.2-percent decline in the South's female rape rate from the 2000 rate.

The West

The West experienced 23.7 percent of the Nation's rape offenses. The incidence of female forcible rape in the Western States showed a slight decline of 0.1 percent from the 2000 estimate, and the rape rate of 65.2 per 100,000 females indicated a decrease of 2.1 percent when compared to the prior year's rate. (See Tables 3 and 4.)

Community Types

In estimating the data by community types, cities outside metropolitan areas reported the highest rate of female rapes in 2001, 67.7 incidents per 100,000 female inhabitants. This estimate was a decrease from the 69.0 rate recorded in 2000. The Nation's Metropolitan Statistical Areas reported a nominal decrease in the female rape rate, down to 64.4 from the 65.0 recorded the prior year. Rural counties reported the lowest rate of forcible rapes of females in the Nation; however, the rate of 43.8 did indicate a minimal increase from the 2000 rate of 43.4 per 100,000 females. (See Table 2.)

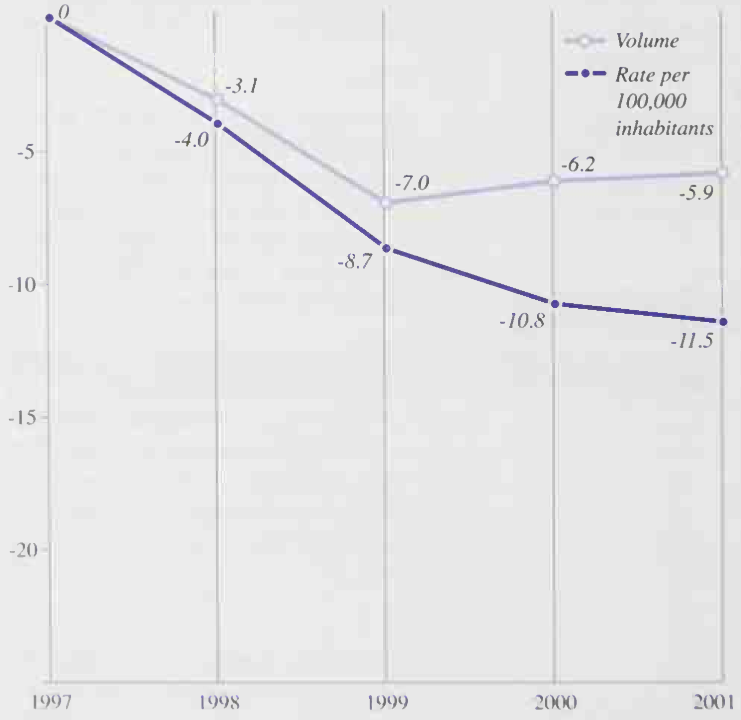
Percent change from 1997



Clearances

For UCR purposes, an offense is cleared when at least one person is arrested and charged or when circumstances beyond the control of law enforcement preclude an arrest for a crime that has been solved, e.g., the victim refuses to cooperate with the prosecution.

Nationally, 44.3 percent of rapes were cleared during 2001 versus 46.1 percent cleared in 2000. Regionally, law enforcement in the Northeast cleared 50.1 percent; in the Midwest, 39.3 percent; in the South, 46.0 percent; and in the West, 43.5 percent of female rapes during 2001. (See Table 26.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as a clearance by arrest even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Nationally, incidents involving only juveniles accounted for 12.4 percent of the overall number of clearances for forcible rape in 2001. The highest percentage of juvenile clearances, 15.7 percent, occurred in cities with populations of 10,000 to 24,999. The lowest percentage of juvenile clearances for forcible rape, 8.8 percent, was recorded in the Nation's eight cities of 1 million and over in population. (See Table 28.)

Arrests

In 2001, law enforcement arrested an estimated 27,270 persons for forcible rape. (See Table 29.) Forcible rape arrests for 2001 were

2.3 percent below the 2000 number, 12.1 percent lower than the 1997 figure, and 28.2 percent lower than the 1992 number. (See Tables 32, 34, and 36.) Two-, 5-, and 10-year trend analyses showed juvenile arrests for forcible rape were down 1.4 percent from the 2000 figure. They were 14.1 percent lower than the 1997 report and 24.5 percent below the 1992 figure. (See Tables 32, 34, and 36.)

Approximately 45.4 percent of persons arrested for forcible rape in 2001 were under the age of 25, 62.7 percent of arrestees were white, and 98.8 percent were males. (See Tables 41, 42, and 43.)

UCR Classifications

The UCR Program counts each offense in which a female of any age is forcibly raped or upon whom an assault to rape or attempt to rape is made. Of the total rapes reported for 2001, 90.0 percent were classified as rapes, and the remainder were attempts. (See Table 19.) Statutory rapes of female victims where no force is used and the victim is under the age of consent are categorized as *other sex offenses*. Sexual attacks on males are classified as assaults or other sex offenses depending on the nature of the crime and the extent of injury. The UCR Program classifies sex offenses (except forcible rape) as Part II offenses and, as such, collects only an aggregate total on these crimes. (See Appendix II.)

Robbery

Definition

The Uniform Crime Reporting Program defines robbery as the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	408,016	145.0
	2001	422,921	148.5
Percent change		+3.7	+2.4

Since the underlying motive for robbery is to obtain money or property from a person, every instance of this offense involves at least one victim who has suffered physical and/or psychological trauma. Despite the actual or threatened violence inherent in this very personal crime, for UCR purposes robbery is considered to be a crime against property. Accordingly, law enforcement officials report one offense for each separate robbery occurrence.

National Trends, Rates, and Distributions

The 422,921 robberies estimated for 2001 marked the first increase in this offense nationwide since 1991. This estimate indicated a 3.7-percent increase from the 2000 figure. However, the number of robberies recorded for 2001 was 37.1 percent below the 1992 number.

Table 2.19

Robbery by Month
Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	9.2	9.5	8.9	8.6	8.2
February	7.6	7.5	7.3	7.1	6.5
March	7.9	8.0	7.7	7.7	7.6
April	7.6	7.6	7.6	7.5	7.4
May	8.2	7.9	8.1	8.1	8.1
June	8.0	7.7	8.1	7.9	8.1
July	8.6	8.5	8.7	8.7	8.7
August	8.8	8.7	8.8	9.0	8.7
September	8.5	8.5	8.3	8.5	8.5
October	8.8	9.0	8.8	9.1	9.7
November	8.2	8.3	8.6	8.7	9.1
December	8.6	8.8	9.2	9.0	9.5

The 2001 robbery rate for the Nation was 148.5 offenses per 100,000 inhabitants, an increase of 2.4 percent over the previous year's rate. A 10-year comparison, however, revealed that the 2001 rate was 43.7 percent lower than the 1992 rate. (See Table 1.)

Robbery accounted for 29.4 percent of all violent crimes occurring in the United States, and 3.6 percent of all Crime Index offenses. (Based on Table 1.)

Robbery by Weapon

In 2001, robbers used firearms in 42.0 percent of the reported offenses. Thirty-nine percent of robberies involved strong-arming the victim. Offenders used knives or cutting instruments in 8.7 percent of the offenses, and the remaining 10.4 percent of offenses involved other weapons. (See Tables 2.22 and 15.) A state-by-state breakdown of weapons used in robberies is provided in Table 21.

Dollar Loss

Robbers stole more than $532 million from their victims in 2001. The average loss for each instance of robbery nationwide was $1,258. The number of banks robbed during 2001 increased 19.4 percent over the number reported for 2000; those institutions incurred an average loss of $4,587 per incident. Commercial houses—a classification that includes supermarkets, department stores, restaurants, taverns, finance companies, hotels, motels, etc.—lost an average of $1,881 to robbers per incident. The estimated average loss per incident resulting from robberies at residences was $1,364, followed by streets/highways at $957, and gas or service stations at $686. Losses resulting from convenience store robberies averaged $618. (See Table 23.)

Robbery by Type

Robberies of persons on streets and highways accounted for 44.3 percent of robberies during 2001. Together, robberies of commercial establishments, gas stations, convenience stores, and banks accounted for 26.3 percent of the total robbery offenses reported. Robberies of residences comprised 12.6 percent of the total. The remainder were classified as miscellaneous. (See Table 2.20.)

Regional Offense Distributions and Rates

The U.S. is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeast, which contained 18.9 percent of the population, experienced 19.1 percent of the Nation's robberies during 2001. The number of robberies declined in the region by 3.6 percent, and the rate per 100,000 inhabitants declined 4.0 percent from the previous year's rate. That region reported the greatest percentage of strong-arm robberies, 46.9 percent, in 2001. (See Tables 2.22, 3, and 4.)

The Midwest

Claiming 22.7 percent of the population in 2001, the Midwest accounted for 19.6 percent of total robberies. The number of robberies occurring in the region increased 1.8 percent from the 2000 number, and the rate per 100,000 inhabitants increased 1.3 percent. (See Tables 3, and 4.)

The South

With 35.8 percent of the population, the Southern States reported 38.4 percent of total robberies. The volume of robbery offenses within the region increased 6.3 percent from the prior year's volume, and the rate per 100,000 inhabitants increased 4.6 percent over the 2000 rate. That region also reported the highest percentage of robberies involving firearms, 46.9 percent. (See Tables 2.22, 3, and 4.)

The West

In 2001, approximately 22.6 percent of the U.S. population resided in the Western States. That region reported 22.9 percent of all robbery offenses. From 2000, the number of robbery offenses increased 7.6 percent in 2001, and the rate per 100,000 in population rose 5.5 percent. (See Tables 3, and 4.)

Population Groups Trends and Rates

All population groups registered increases for the offense in 2001. Cities with fewer than 10,000 inhabitants reported the largest increase in robbery offenses, 8.2 percent. The Nation's 10 cities with more than 1 million residents reported the smallest increase at 0.1 percent. Additional data for population groups can be found in Table 12.

Considering the robbery rate per 100,000 inhabitants, the highest rate was recorded by cities with 1 million and over in population, 426.7. The lowest rate, 16.7 robberies per 100,000 people, was recorded for rural counties. Rates for population groups can be found in Table 16.

Miscellaneous	15.1	15.2	18.6	20.3	21.6	27.4	17.5

[1] Because of rounding, the percentages may not add to total.

Clearances

Law enforcement agencies cleared 24.9 percent of all robberies nationwide through arrest or exceptional means in 2001. Clearance rates ranged from the 41.0 percent reported by law enforcement agencies in rural counties to 18.5 percent recorded by those in cities from 500,000 to 999,999 in population. (See Table 25.)

Regionally, the Northeast had the highest clearance rate for robbery at 30.2 percent. The South registered a clearance rate of 24.7 percent. The clearance rate for the Western States was 24.4 percent, followed by the Midwest at 21.2 percent. (See Table 26.)

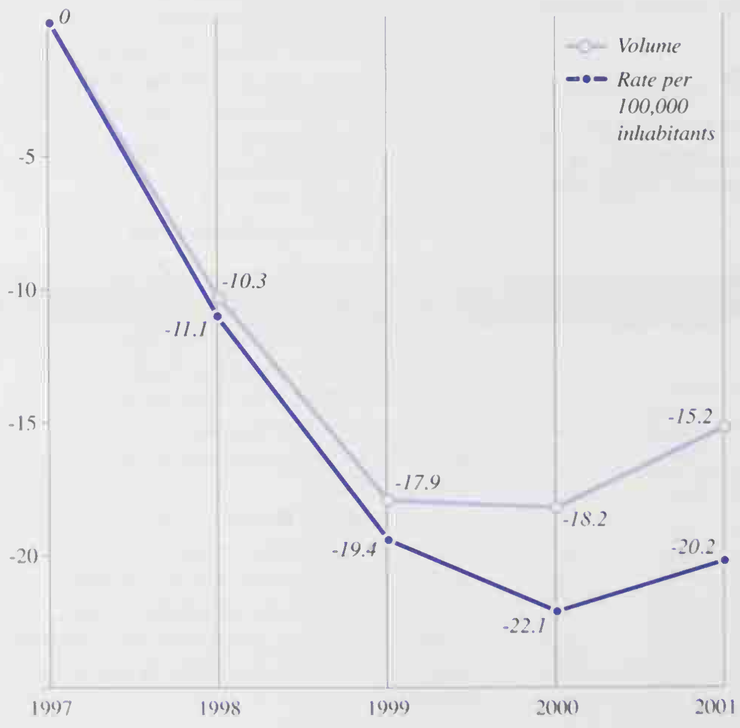
Clearances and Juveniles

Juvenile offenders, those under 18 years of age, comprised 14.4 percent of robbery clearances in 2001. Juveniles accounted for 16.6 percent of clearances in cities with populations of 25,000 to 49,999 inhabitants and 9.1 percent of clearances in rural counties. Table 28 provides juvenile clearance data.

Figure 2.9

Robbery

Percent change from 1997



Arrests

Total Arrests

Law enforcement officers arrested an estimated 108,400 persons for robbery in 2001. Robbery arrests accounted for 4.8 percent of all arrests for Index crimes and 17.3 percent of violent crime arrests. (See Table 29.)

Arrest Trends

Robbery arrests for 2001 increased 2.1 percent nationwide over those for 2000. Arrests of adults (18 years and older) rose 3.9 percent. However, arrests for juveniles (under age 18)

Table 2.22

Total	100.0	42.0	8.7	10.4	39.0
Northeastern States	100.0	34.6	10.6	7.9	46.9
Midwestern States	100.0	45.1	6.1	9.9	38.9
Southern States	100.0	46.9	7.8	11.8	33.6
Western States	100.0	36.7	10.4	9.7	43.1

[1] Because of rounding, the percentages may not add to total.

decreased 3.5 percent, with arrests of those under 15 years of age falling 11.0 percent. (See Table 36.)

When one looks at arrest data by gender, arrests of males rose 2.0 percent over 2000 data and those of females increased 2.9 percent. Juvenile arrests declined for youths of both sexes, decreasing 3.5 percent for males and 4.0 percent for females. (See Table 37.)

The 5-year trend showed an overall 18.0-percent decrease in the number of persons arrested for robbery: male and female arrests decreased 18.1 percent and 17.4 percent, respectively since 1997. Juvenile arrests also declined for both sexes from 1997 to 2001, male arrests dropping 34.0 percent and female arrests falling 39.8 percent. (See Tables 34 and 35.)

Ten-year trend data showed that when comparing robbery arrests of 2001 with those of 1992, overall arrests were down 25.6 percent, with arrests of males declining 26.8 percent and arrests of females dipping 14.0 percent. Arrests of male juveniles fell 32.5 percent from 1992, and arrests of female juveniles dropped 28.9 percent. (See Tables 32 and 33.)

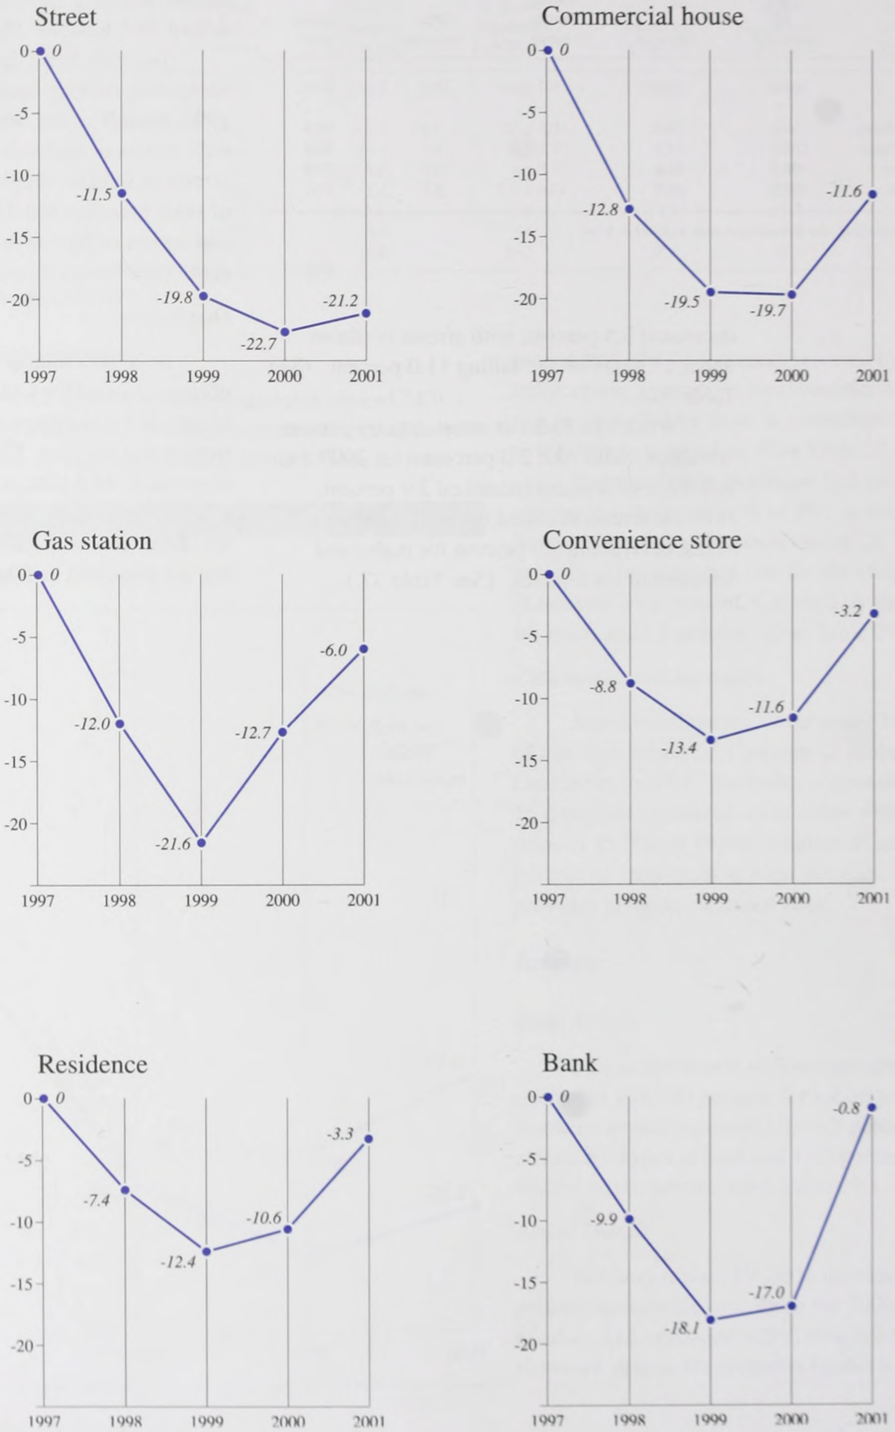
Distribution

In 2001, a total of 62.0 percent of the persons arrested for robbery were under 25 years of age. The majority of the arrestees, 89.9 percent, were males. By race, 53.8 percent of arrestees were black, 44.5 percent were white, and 1.7 percent were other races. (See Tables 41, 42, and 43.) Breakdowns of male and female arrestees by age are presented in Tables 39 and 40.

Figure 2.10

Robbery Categories

Percent change from 1997



Aggravated Assault

Definition

According to the Uniform Crime Reporting Program, an aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	911,706	324.0
	2001	907,219	318.5
Percent change		-0.5	-1.7

National Trends, Rates, and Distributions

With an estimated 907,219 offenses nationally, aggravated assaults accounted for 63.1 percent of the violent crimes in 2001. The number of aggravated assault offenses in 2001 was the lowest since 1987. A 2-, 5-, and 10-year trend analysis showed that the estimated total represented a 0.5-percent decline from 2000 data, an 11.3-percent decrease from the 1997 level, and a 19.5-percent decline from the 1992 total. (See Table 1.)

There were 318.5 reported victims of aggravated assault per 100,000 inhabitants in 2001. Two-, 5-, and 10-year trend data showed that the rate was 1.7 percent lower than in 2000, 16.6 percent lower than it was in 1997, and 27.9 percent lower than in 1992. (See Table 1.)

Table 2.23

Aggravated Assault by Month

Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	7.5	7.9	7.9	7.6	7.5
February	7.0	7.0	7.0	7.4	7.0
March	8.3	8.1	8.0	8.5	8.4
April	8.2	8.3	8.3	8.4	8.6
May	9.3	9.1	9.1	9.3	9.1
June	9.0	8.9	8.8	8.6	8.6
July	9.5	9.4	9.5	9.0	9.0
August	9.4	9.4	9.2	8.9	8.7
September	8.8	8.7	8.5	8.6	8.8
October	8.4	8.3	8.6	8.7	8.8
November	7.5	7.4	7.7	7.5	7.8
December	7.2	7.4	7.5	7.5	7.7

In 2001, personal weapons such as hands, fists, and feet were used in 27.9 percent of the aggravated assaults; firearms in 18.3 percent; and knives or cutting instruments in 17.8 percent. Blunt objects or other dangerous weapons were used in the remaining 36.0 percent. (See Table 2.24.)

Three of the four weapon categories showed increases in usage when comparing 2001 figures to those from 2000, with personal weapons (hands, fists, feet, etc.) showing the only decrease, 2.3 percent. The increases included firearms, 1.4 percent; other weapons, 0.6 percent; and knives or other cutting instruments, 0.1 percent. (See Table 15.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, 42.7 percent of the aggravated assault volume occurred in the South, the Nation's most populous region. The Western Region followed with 23.6 percent, the Midwest Region with 18.8 percent, and the Northeast Region with 15.0 percent. (See Table 3.)

Regionally, the aggravated assault rates ranged from 253.2 per 100,000 inhabitants in the Northeast to 380.0 per 100,000 in the South. The rates were down in all but one region. The Northeast, West, and South recorded rate decreases of 3.0, 2.7, and 2.0, respectively; however, the rate in the Midwest increased 1.0 percent. (See Table 4.)

Community Types

In 2001, the Nation's Metropolitan Statistical Areas (MSAs) experienced a rate of 343.6 aggravated assaults per 100,000 inhabitants. Cities outside MSAs had a rate of 295.0 aggravated assaults per 100,000 inhabitants, and rural counties had a rate of 168.4 aggravated assaults. (See Table 2.)

Population Groups Trends

By population group, the largest decrease in aggravated assaults, 2.9 percent, was reported in cities with 25,000 to 49,999 inhabitants, followed by cities of under 10,000 in population with a 1.4-percent decline from 2000 data. Cities with 50,000 to 99,999 inhabitants showed a 1.1-percent drop, cities with populations of 250,000 and over had a 0.8-percent decline, and cities with a population of 10,000 to 24,999 experienced a 0.4-percent fall. An increase of 0.2 percent occurred in cities with populations of 100,000 to 249,999 in 2001. Rural counties showed an increase of less than one percent (0.5), and suburban counties experienced a 1.1-percent decline in aggravated assaults. (See Table 12.)

Table 2.24

Aggravated Assault, Types of Weapons Used
Percent Distribution by Region, 2001

Region	*Total all weapons*[1]	*Firearms*	*Knives or cutting instruments*	*Other weapons (clubs, blunt objects, etc.)*	*Personal weapons*
Total	100.0	18.3	17.8	36.0	27.9
Northeastern States	100.0	13.9	18.4	33.7	34.0
Midwestern States	100.0	19.4	17.2	35.3	28.1
Southern States	100.0	20.0	19.5	38.7	21.9
Western States	100.0	16.8	15.2	32.7	35.3

[1] Because of rounding, the percentages may not add to total.

Clearances

Overall, law enforcement agencies nationwide cleared 56.1 percent of reported aggravated assaults in 2001. Law enforcement in cities with less than 10,000 in population reported the highest percentage of clearances for aggravated assaults, 65.7 percent. Those in rural and suburban counties recorded clearance percentages of 64.9 and 61.7, respectively. (See Table 25.)

Aggravated assaults involving personal weapons such as hands, fists, or feet were cleared 63.8 percent of the time. Aggravated assaults using a knife or cutting instrument were cleared 61.9 percent of the time. Incidents that involved firearms were cleared 41.1 percent of the time. Aggravated assaults using other weapons were cleared 55.3 percent of the time. (See Table 27.)

Geographically, the Northeastern States had the highest percentage of aggravated assaults cleared by arrest—64.4 percent. The Western States followed with 57.8 percent, the Southern States with 53.7 percent, and the Midwestern States with 52.2 percent of aggravated assaults cleared by arrest. (See Table 26.)

Clearances and Juveniles

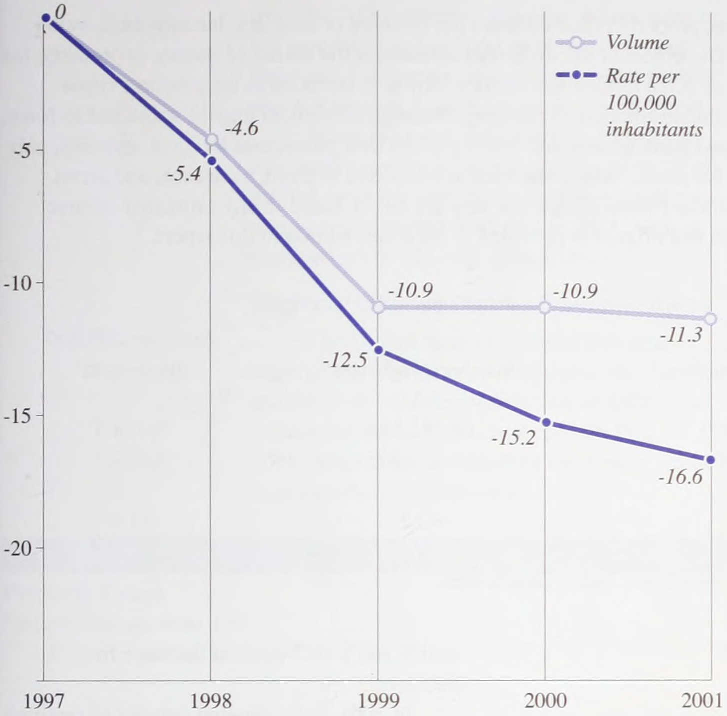
When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as a clearance by arrest even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Of the aggravated assault clearances reported both nationally and collectively in the Nation's cities, 11.8 percent involved only persons under the age of 18. In suburban counties, 12.4 percent of aggravated assault clearances involved only juveniles; in rural counties, 10.1 percent of aggravated assault clearances were of persons under the age of 18. (See Table 28.)

Figure 2.11

Aggravated Assault

Percent change from 1997



Arrests

Approximately 477,809 persons were arrested for aggravated assault in 2001. Of reported arrests, 79.9 percent were of males and the remaining 20.1 percent were of females. (See Tables 29 and 42.) Sixty-four percent of arrestees for aggravated assault were white, 33.7 percent were black, and the remaining 2.3 percent were of all other races. (See Table 43.)

Total aggravated assault arrests were down 0.1 percent in 2001 from the 2000 figure. (See Table 36.) A comparison of the 5-year figures from 1997 to 2001 showed a 9.4-percent decrease in the total arrests, a 13.2-percent decrease in juvenile arrests, and an 8.8-percent decline in adult arrests. (See Table 34.) Ten-year trend data showed a decline of 4.4 percent in the total arrests, a 13.8-percent decrease in juvenile arrests, and a 2.8-percent drop in adult arrests. (See Table 32.)

Property Crime Total

Definition

In the UCR Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. Arson is included in the property crime category since it involves the destruction of property, although its victims may be subjected to force. However, because of limited participation and varying collection procedures by local agencies, only limited data are available for arson. Arson statistics are included in trend, clearance, and arrest tables throughout *Crime in the United States*, but they are not included in any estimated volume data. More information on this offense is provided in the arson section in this report.

Trend

	Year	*Number of offenses*[1]	*Rate per 100,000 inhabitants*[1]
	2000	10,182,584	3,618.3
	2001	10,412,395	3,656.1
Percent change		+2.3	+1.0

[1] Does not include arson. See Crime Index Tabulations.

National Distributions

Volume

There were an estimated 10,412,395 property crimes reported in 2001. This number reflects an overall increase of 2.3 percent from the offenses reported in 2000, the first year-to-year increase since 1991. In a 5- and 10-year trend analysis, the 2001 volume showed a 9.9-percent decrease when compared to the 1997 volume and a 16.7-percent decrease from the 1992 level.

Table 2.25

Property Crime Total by Month
Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	8.2	8.6	8.0	7.8	7.8
February	7.3	7.5	7.2	7.3	6.8
March	8.0	8.2	8.0	8.2	7.8
April	8.0	8.0	7.9	7.9	7.9
May	8.4	8.4	8.3	8.6	8.4
June	8.4	8.5	8.6	8.6	8.4
July	9.1	8.9	9.1	9.1	9.0
August	9.0	9.0	9.2	9.2	9.0
September	8.5	8.4	8.5	8.5	8.4
October	8.8	8.5	8.7	8.8	9.2
November	8.0	7.9	8.2	8.1	8.5
December	8.3	8.2	8.4	8.0	8.7

In 2001, the estimated number of reported motor vehicle thefts represented the largest increase among the property crimes—5.7 percent. Burglary and larceny-theft offenses increased 2.9 percent and 1.5 percent, respectively. (See Table 1.) Although arson is a property crime, it is excluded from the property crime totals.

Rate

The Nation experienced an overall property crime rate of 3,656.1 offenses per 100,000 inhabitants, a 1.0-percent increase from the 2000 rate. The 2001 property crime rate showed a decline of 15.3 percent when compared to the 1997 rate, and a decrease of 25.4 percent when compared to the 1992 rate. The 2001 property crime rate marked the first year-to-year increase since 1991.

Distribution

In 2001, property crimes comprised 87.9 percent of the Crime Index total. Larceny-theft accounted for the highest volume of offenses—68.0 percent of the Nation's estimated property crimes and 59.7 percent of the Crime Index offenses.

In 2001, the estimated dollar loss attributed to property crime losses (excluding arson) was $16.6 billion, an increase of 5.6 percent from the 2000 estimate. Burglary losses were up 9.0 percent from the 2000 level; larceny-theft increased 1.9 percent, and motor vehicle theft rose 6.8 percent from the prior year's estimates.

Arson offenses, which are excluded from estimated property crime tabulations because of limited coverage and law enforcement participation, were estimated at 68,967 in 2001, with an average loss of $11,098. (See Table 2.32.)

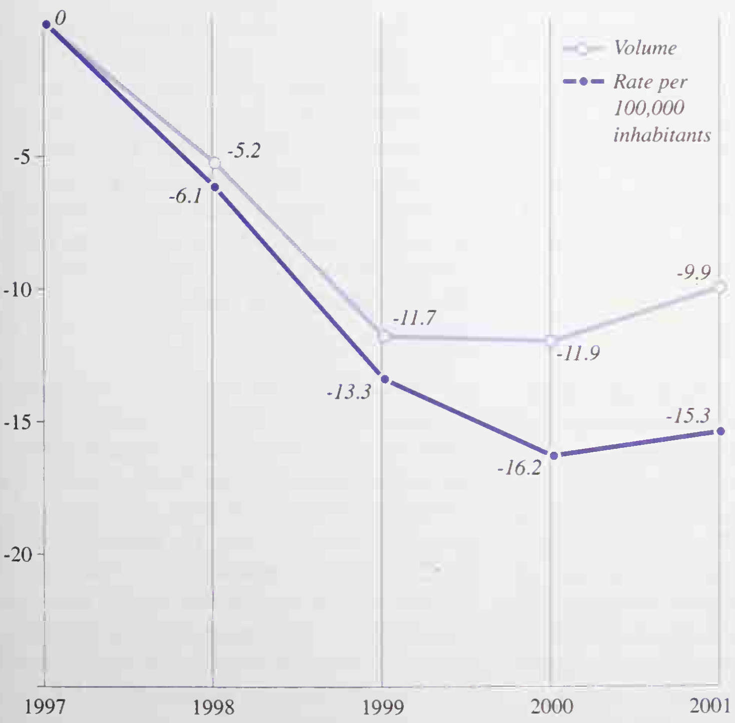
Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (More information on UCR area definitions can be found in Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

Figure 2.12

Property Crime

Percent change from 1997



The Northeast

The Northeast accounted for 13.3 percent of the total number of property crimes reported in 2001. (See Table 3.) This region was the only region to experience decreases in both the number of property crime offenses and the rate per 100,000 inhabitants. The Northeast had a 1.3-percent decline in offenses when compared to the 2000 total, and a 1.7-percent decline in the property crime rate per 100,000 persons. (See Table 4.)

The Midwest

The Midwest accounted for 22.0 percent of the total property crime offenses reported in 2001. (See Table 3.) This region recorded an increase in both volume (1.6 percent) and the rate per 100,000 inhabitants (1.2 percent) over the prior year's volume and rate. (See Table 4.)

The South

The South accounted for 40.9 percent of the total property crimes reported during 2001. (See Table 3.) This region experienced a 1.9-percent rise in the volume of property crimes and a slight increase (0.3 percent) in the rate per 100,000 inhabitants. (See Table 4.)

The West

The West reported 23.7 percent of the total property crimes during 2001. (See Table 3.) The region reflected a 5.6-percent increase in the volume of property crimes compared to the 2000 volume and a 3.5-percent rise in the property crime rate per 100,000 inhabitants. (See Table 4.)

Community Types

The UCR Program designates three types of communities when presenting crime data: Metropolitan Statistical Areas (MSA), cities outside MSAs, and rural counties. In 2001, MSAs accounted for 85.6 percent of the total estimated property crime offenses and reported an estimated rate of 3,914.9 offenses per 100,000 persons. Cities outside of MSAs accounted for 8.9 percent of the total estimated property crime offenses and had an estimated rate of 4,057.6 offenses per 100,000 inhabitants. Rural counties accounted for 5.6 percent of the total 2001 property crimes and had an estimated rate of 1,681.4 offenses per 100,000 persons. (See Table 2.)

Population Groups Trends and Rates

The Nation's cities collectively, reported an increase of 2.3 percent in the number of property crimes reported in 2001 over the prior year's number. All city groups experienced increases in the number of property crimes reported, the largest increase (4.5 percent) recorded in cities with populations of 250,000 to 499,999. The smallest increase, 0.7 percent, was reported in cities of 1 million or more inhabitants. (See Table 12.)

Clearances

Clearances occur either by arrest or by exceptional means, i.e., when elements beyond the control of law enforcement prevents the placing of formal charges against the offender. (More information regarding clearances can be found in Section III of this report.) In 2001, overall clearances for property crime offenses totaled 16.2 percent. (See Table 25.)

Regionally, clearances of property crimes during 2001 were as follows: the Northeast, 19.8 percent; the Midwest, 15.9 percent; the South, 16.1 percent; and the West, 14.8 percent. In the Nation's cities collectively, 16.2 percent of property crimes were cleared during the year. Among the individual city population groups, the highest property crime clearance percentage in 2001 was reported in cities with 10,000 to 24,999 population—21.2 percent. The lowest percentage of property crimes cleared—10.8 percent—was experienced in cities with populations of 500,000 to 999,999. Additionally, suburban and rural counties each reported property clearance percentages of 15.2 percent and 18.1 percent, respectively. (See Tables 25 and 26.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as a clearance by arrest, even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Nationally, juveniles accounted for 21.1 percent of the overall property crime clearances in 2001. The highest percentage of juvenile clearances—24.0 percent—occurred in cities with populations of 50,000 to 99,999. The lowest percentage of juvenile clearances—17.1 percent—was recorded in the Nation's rural counties. (See Table 28.)

Arrests

Total Arrests

The number of estimated property crime arrests for 2001 was 1,618,465. This figure made up 72.1 percent of the estimated Part I crime (Crime Index offenses) arrests and 11.8 percent of the Nation's total estimated arrests during 2001. The greatest percentage of arrests made for property crimes was for larceny-theft offenses—71.7 percent. The smallest percentage of arrests—1.2 percent—was made for arson offenses. (See Table 29.)

Arrest Rates

The U.S. experienced a rate of 581.8 property crime arrests per 100,000 inhabitants in 2001. The highest property crime arrest rate—608.4 arrests per 100,000 inhabitants—occurred in the Midwest. The lowest property crime arrest rate—481.1 per 100,000 people—was reported in the Northeast. (Table 30 provides breakdowns of arrests for all of the regions.)

The Nation's cities collectively experienced a rate of 691.2 property crime arrests per 100,000 inhabitants. The highest rate—758.8 per 100,000 people—occurred in cities with populations of 250,000 and over. The lowest rate—618.8 per 100,000 people—occurred in cities with populations under 10,000. Suburban and rural counties reported property crime arrest rates of 358.0 and 289.2 per 100,000 inhabitants, respectively. (See Table 31.)

Arrest Trends

Overall, property crime arrests declined slightly—1 percent—from 2000 to 2001. However, among the individual property crimes, arrests increased 0.4 percent for burglaries, 2.7 percent for motor vehicle thefts, and 14.7 percent for arson offenses. The number of arrests for larceny-thefts declined 1.9 percent; however, with its considerable volume, this decrease offset the increases in arson, burglary, and motor vehicle theft arrests and resulted in an overall decline in property crime arrests for 2001. (See Table 36.)

Regarding arrests of juveniles, overall property crime arrests of juveniles decreased 5.6 percent in 2001 when compared to the 2000 figure. Conversely, property crime arrests for adults increased 1.3 percent. (See Table 36.)

Five-year trends in property crime arrest data indicated a 20.0-percent decline in arrests from 1997 to 2001. A 10-year comparison of total property crime arrests between 1992 and 2001 showed a 26.2-percent decrease. Tables 32 and 34 provide more information regarding trend data.

Distribution

In 2001, 69.6 percent of all persons arrested for property crimes were over the age of 18, and 30.4 percent were under age 18. (See Table 38.) Additionally, 69.6 percent of all persons arrested for property crimes in 2001 were males, and 30.4 percent were females. (See Table 42.) Of the persons arrested for property crime offenses, 66.0 percent were white, 31.4 percent were black, and the remainder were other races (Asian or Pacific Islander and American Indian or Alaskan Native). (See Table 43.)

Burglary

Definition

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	2,050,992	728.8
	2001	2,109,767	740.8
Percent change		+2.9	+1.6

National Offenses, Trends, and Distributions

The number of estimated burglaries for the Nation in 2001 rose 2.9 percent over those reported the previous year. In a 5- and 10-year trend analysis, the estimated 2,109,767 burglaries in 2001 represented a 14.3-percent decline from 1997 totals and a 29.2-percent drop from 1992 estimates. (See Table 1.) When compared to the 1982 estimate, the year with the highest burglary estimate during the last two decades, the 20-year trend showed that the 2001 burglary total was significantly lower, down 38.8 percent. (Based on Table 1.)

The national burglary rate of 740.8 per 100,000 inhabitants for 2001 represented a 1.6-percent increase from the previous year's rate. However, this rate was significantly lower than the totals from 5 and 10 years ago. The 2001 rate was 19.4 percent lower than the 1997 rate and 36.6 percent below the 1992 level. (See Table 1.) In a 20-year comparison, the 2001 rate was 50.2 percent less than the 1982 rate. (Based on Table 1.)

Table 2.26

Burglary by Month

Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	8.4	8.9	8.3	8.1	7.8
February	7.2	7.5	7.2	7.2	6.6
March	7.9	8.2	7.9	8.0	7.6
April	7.8	8.0	7.7	7.8	7.7
May	8.3	8.3	8.2	8.5	8.3
June	8.2	8.2	8.4	8.4	8.2
July	9.1	9.0	9.0	9.2	9.0
August	9.0	9.0	9.1	9.2	9.1
September	8.7	8.4	8.7	8.6	8.6
October	8.8	8.4	8.6	8.7	9.3
November	8.2	7.9	8.4	8.3	8.8
December	8.6	8.2	8.5	8.1	8.9

For those agencies that reported statistics for all 12 months of 2001, the data showed that forcible entry accounted for 63.3 percent of burglaries, unlawful entry comprised 30.2 percent, and attempted forcible entry accounted for 6.5 percent. (See Table 19.)

The majority of burglaries, 65.2 percent, were residential. Most residential burglaries, 61.0 percent, occurred during the day, and most nonresidential burglaries, 58.0 percent, occurred at night. Burglaries totaled an estimated $3.3 billion for an average loss per burglary of $1,545. Residential burglaries averaged $1,381, and nonresidential burglaries averaged $1,615 in 2001. (See Table 23.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. A map of the United States delineating the regions is included in Appendix

III. Estimated crime volume, rates, and percent changes by region are published in Table 4.

The Northeast

The fewest burglaries occurred in the Northeastern States, 12.0 percent. (See Table 3.) The Northeast was the only region of the country to experience a decrease in burglary over the previous year's volume with a drop of 1.2 percent. The Northeast was also the only region to report a decrease in the burglary rate, 470.0 per 100,000 in population, down 1.6 percent from the 2000 rate. (See Table 4.)

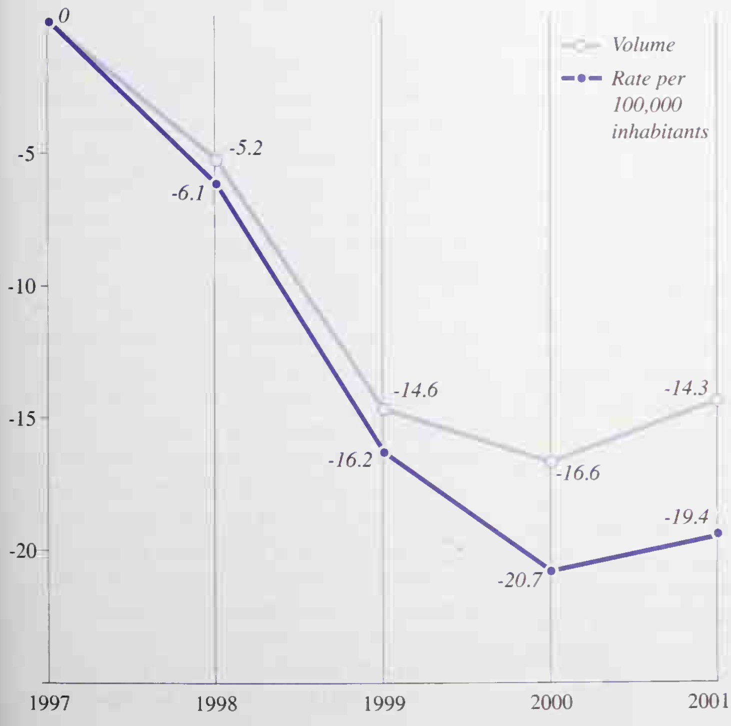
The Midwest

The Midwestern States accounted for 20.8 percent of burglaries in 2001. (See Table 3.) The burglary total represented a 2.6-percent increase over the previous year's total. The burglary rate of 677.7 per 100,000 persons denoted a 2.1-percent increase in the region's rate since 2000. (See Table 4.)

Figure 2.13

Burglary

Percent change from 1997



The South

Proportionately, most burglaries were reported in the Southern States, 44.7 percent. (See Table 3.) The increase in the number of estimated burglaries from 2000 was 4.1 percent in these states collectively. The burglary rate for the region, 926.8 per 100,000 inhabitants, increased by 2.5 percent from the 2000 rate. (See Table 4.)

The West

Western States accounted for 22.5 percent of the estimated burglaries for 2001. (See Table 3.) This total represented a 2.9-percent increase over the 2000 level. States in this region reported a slight upward trend in the burglary rate, 736.4 per 100,000, an increase of 0.9 percent over the rate from the previous year's rate. (See Table 4.)

Community Types

Metropolitan Statistical Areas (MSAs), which made up approximately 80 percent of the total U.S. population in 2001, recorded a rate of 768.8 burglaries per 100,000 persons. For cities outside MSAs, which comprised approximately 8.0 percent of the Nation's population, the rate was 764.3 burglaries per 100,000 inhabitants, and in rural counties, which accounted for approximately 12 percent of the U.S. population during 2001, the rate was 540.1. MSAs comprised 82.9 percent of the estimated burglary volume; other cities made up 8.2 percent; and rural counties, 8.8 percent. (See Table 2.)

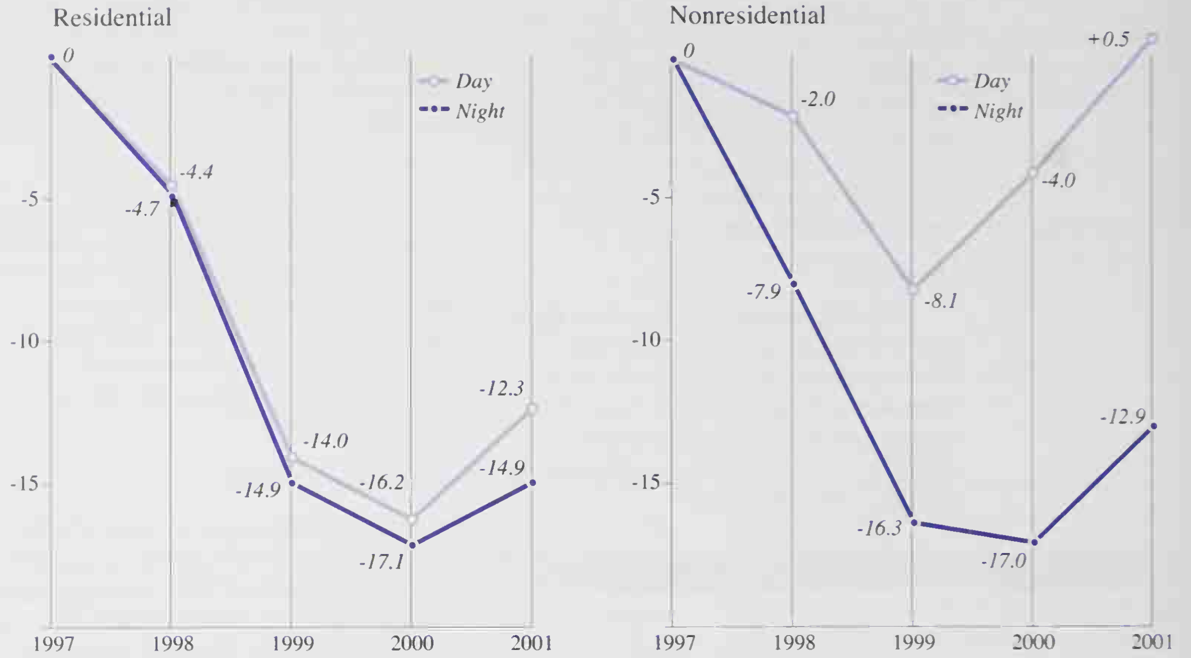
Population Groups Trends and Rates

Cities as a whole showed a 2.7-percent increase in burglaries in 2001 over burglaries reported in 2000. Among the population groups, cities with populations of 500,000 to 999,999 saw the largest 1-year increase at 6.3 percent. Cities with populations of 1 million and over in population reported an overall 0.3-percent decrease in burglaries. Both suburban and rural counties showed an increase in reported burglaries, 3.1 percent and 1.9 percent, respectively. (See Table 12.) Collectively, cities recorded a rate of 846.2 burglaries per 100,000 inhabitants. Suburban counties registered a rate of 649.1 per 100,000 persons, and rural counties

Figure 2.14

Burglary

Percent change from 1997



noted a rate of 567.1 per 100,000 inhabitants. (See Table 16.)

Clearances

Clearances occur either by arrest or by exceptional means, i.e., when circumstances beyond the control of law enforcement prevent the placing of formal charges against the offender. (More information regarding clearances can be found in Section III of this report.) In the Nation in 2001, 12.7 percent of burglary offenses were cleared. (See Table 25.) The highest percentage of reported clearances involved unlawful entry, 14.1 percent, followed by forcible entry, 12.3 percent, and attempted forcible entry, 10.7 percent. (See Table 27.)

Law enforcement in the Northeast Region cleared 16.7 percent of burglary offenses. Those in the South cleared 12.7 percent of total burglaries; in the West, 12.1 percent; and in the Midwest, 11.1 percent. (See Table 26.)

Among the Nation's population groups, cities with populations under 10,000 revealed the highest proportion of burglary offenses cleared at 16.4 percent. Those cities with populations of 500,000 to 999,999 cleared the fewest of their burglary offenses, 8.3 percent. Total clearances for all cities was 12.3 percent. (See Table 25.)

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as cleared by arrest, even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances. In 2001, 18.5 percent of all burglary clearances involved only juveniles. Communities with populations of fewer than 10,000 had the highest percentage of burglary clearances that involved only juvenile offenders, 21.9 percent. Cities with 500,000 to 999,999 inhabitants had the lowest juvenile clearances for burglary at 14.1 percent. (See Table 28.)

Arrests

The estimated number of arrests nationwide for burglary for 2001 was 291,444, an arrest rate of 103.3 per 100,000 inhabitants. (See Tables 29 and 30.) Law enforcement agencies in the West recorded the highest rate of burglary arrests, 124.9 per 100,000. Those in the Southern States had an arrest rate of 108.9 per 100,000 persons, followed by the Northeast, 82.2, and the Midwest, 78.0. (See Table 30.) Among the population groups, arrest rates ranged from a high of 131.1 recorded for cities of 100,000 to 249,999 to a low of 84.9 reported by suburban counties. (See Table 31.)

Arrest Trends

Overall, arrests for burglary increased 0.4 percent when compared to the previous year's figure. However, the number of burglary arrests nationwide was considerably lower than the number from 5 and 10 years ago. Burglary arrests were down 18.7 percent from the 1997 figure and 32.7 percent from the 1992 figure. Arrests of juveniles for burglary showed a decrease of 5.6 percent from the 2000 total, 30.3 percent from the 1997 total, and a drop of 40.1 percent from the 1992 total. Arrests of adults in 2001 rose 3.4 percent from the previous year's total; however, the 2001 total is 12.1 percent lower than the 1997 level and 28.7 percent below the 1992 number. (See Tables 32, 34, and 36.)

Distribution

By age of arrestees, 31.0 percent of burglary arrestees were juveniles, and 11.7 percent of the total arrestees were under age 15. (See Table 41.) By gender, males comprised the majority of burglary arrestees, 86.4 percent, in 2001. Of these arrests, 31.6 percent were males under age 18. (Based on Table 39.) For females, 13.6 percent were arrested for burglary and of those, 27.4 percent were juveniles. (Based on Table 40.)

By race, 69.4 percent of burglary arrestees were white, 28.5 percent were black, and other races accounted for the remaining 2.1 percent. Whites made up 68.1 percent, blacks 29.9 percent, and other races comprised 2.0 percent of adult arrestees. For individuals under age 18 arrested for burglary, 72.3 percent were white, 25.2 percent were black, and 2.5 percent were of all other races. (See Table 43.)

Larceny-Theft

Definition

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, confidence games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

Trend

	Year	*Number of offenses*	*Rate per 100,000 inhabitants*
	2000	6,971,590	2,477.3
	2001	7,076,171	2,484.6
Percent change		+1.5	+0.3

National Trends, Rates, and Distributions

In 2001, the estimated number of larceny-theft offenses in the Nation exceeded 7 million and cost the Nation an estimated $5.2 billion in losses. Law enforcement agencies reported the estimated 7,076,171 offenses in the following categories:

- Pocket-picking
- Purse-snatching
- Shoplifting
- Thefts from Motor Vehicles (Except theft of motor vehicle parts and accessories)
- Theft of Motor Vehicle Parts and Accessories
- Theft of Bicycles
- Theft from Buildings
- Theft from Coin-Operated Device or Machine
- All Other Larceny-Theft not Specifically Classified.

Table 2.27

Larceny-theft by Month
Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	8.0	8.4	7.8	7.6	7.7
February	7.2	7.5	7.2	7.3	6.8
March	8.0	8.2	8.0	8.2	7.9
April	8.0	8.1	8.0	7.9	8.0
May	8.4	8.4	8.4	8.6	8.6
June	8.6	8.6	8.7	8.8	8.6
July	9.2	9.0	9.1	9.2	9.0
August	9.1	9.0	9.2	9.2	9.1
September	8.5	8.4	8.5	8.5	8.4
October	8.8	8.5	8.7	8.8	9.1
November	7.9	7.8	8.1	8.0	8.3
December	8.3	8.2	8.3	7.9	8.6

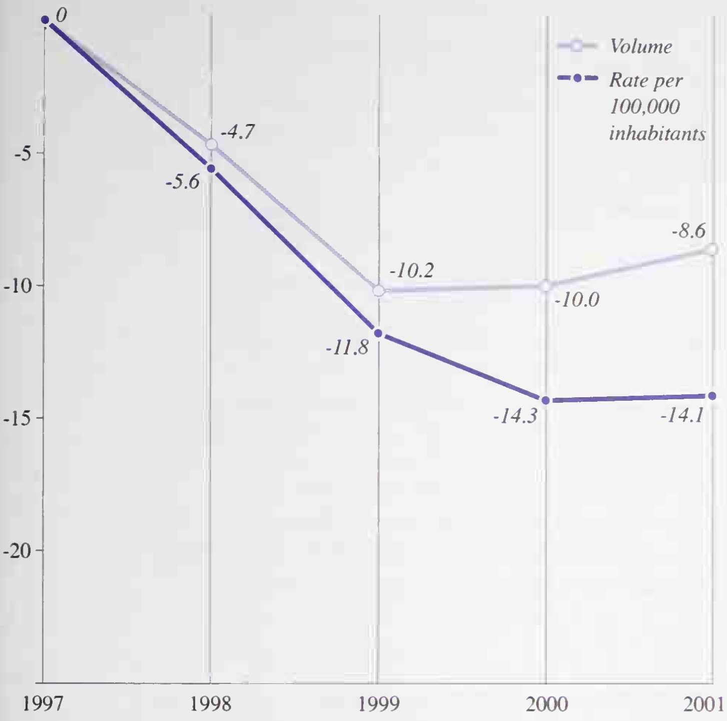
Examples of thefts in the all other category include thefts from fenced enclosures, boats, and airplanes; and of animals, lawnmowers, hand tools, and farm and construction equipment, as well as incidents of taking gasoline from a self-service gasoline station without paying.

The estimated 7,076,171 larceny-theft offenses reported to law enforcement in the Nation translated into a larceny every 4.5 seconds and accounted for 59.7 percent of all Crime Index offenses and 68.0 percent of all property crimes. The 2001 estimate was up 1.5 percent from the 2000 estimate of 6,971,590 offenses. However, when looking at the offense over a 5-year and 10-year span, larceny-thefts

Figure 2.15

Larceny-theft

Percent change from 1997



decreased 8.6 percent when compared to the 7,743,760 estimated offenses reported in 1997, and 10.6 percent compared to the 7,915,199 offenses reported in 1992. (See Table 1.)

Table 2.28

Larceny-theft

Percent Distribution by Region, 2001

Type	*United States total*	*North-eastern states*	*Mid-western states*	*Southern states*	*Western states*
Total[1]	100.0	100.0	100.0	100.0	100.0
Pocket-picking	0.5	1.1	0.3	0.4	0.4
Purse-snatching	0.5	1.0	0.4	0.4	0.6
Shoplifting	13.8	15.0	12.8	13.3	14.7
From motor vehicles (except accessories)	25.8	21.1	23.9	24.8	31.2
Motor vehicle accessories	10.2	7.9	10.7	10.1	11.2
Bicycles	4.1	5.9	4.5	3.4	4.2
From buildings	13.3	16.8	14.8	11.4	13.7
From coin-operated machines	0.7	0.6	0.6	0.8	0.7
All others	31.0	30.6	31.9	35.4	23.3

[1] Because of rounding, the percentages may not add to total.

In 2001, the Nation experienced a rate of larceny-thefts of 2,484.6 per 100,000 population. This figure was a slight increase of 0.3 percent over the 2000 estimated rate but a 14.1-percent decrease in comparison to the 1997 rate and a 19.9-percent decrease when compared to the 1992 rate. (See Table 1.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following: The South, the most populous region, had 40.7 percent of all larceny offenses. The West had 22.9 percent of the total, the Midwest, 22.8 percent, and the Northeast, 13.6 percent of all larcenies. (See Table 3.)

When 2001 regional volumes are compared to the 2000 figures, the lone decrease in volume occurred in the Northeast, with a 1.4-percent drop. Of the regions posting increases, the volume of larceny-thefts in the West rose 4.8 percent. In the Midwest, the volume of larceny-theft offenses increased 1.1 percent, and in the South, the volume was up 0.9 percent. Among the geographic regions in 2001, the South had a rate per 100,000 inhabitants of 2,826.7, and the West had a rate of 2,518.5. The Midwest reported a rate of 2,491.5 per 100,000 inhabitants, and the Northeast, a rate of 1,788.4 per 100,000 population. The larceny-theft rate per 100,000 inhabitants was up 2.7 percent and 0.6 percent in the West and Midwest, respectively; the rate declined 0.6 percent in the South and 1.8 percent in the Northeast. (See Table 4.)

Community Types

By community types, Metropolitan Statistical Areas had a rate of 2,647.0 larceny offenses per 100,000 inhabitants. Cities outside MSAs had a rate of 3,087.7, and rural counties experienced a rate of 1,014.0 per 100,000 population. (See Table 2.)

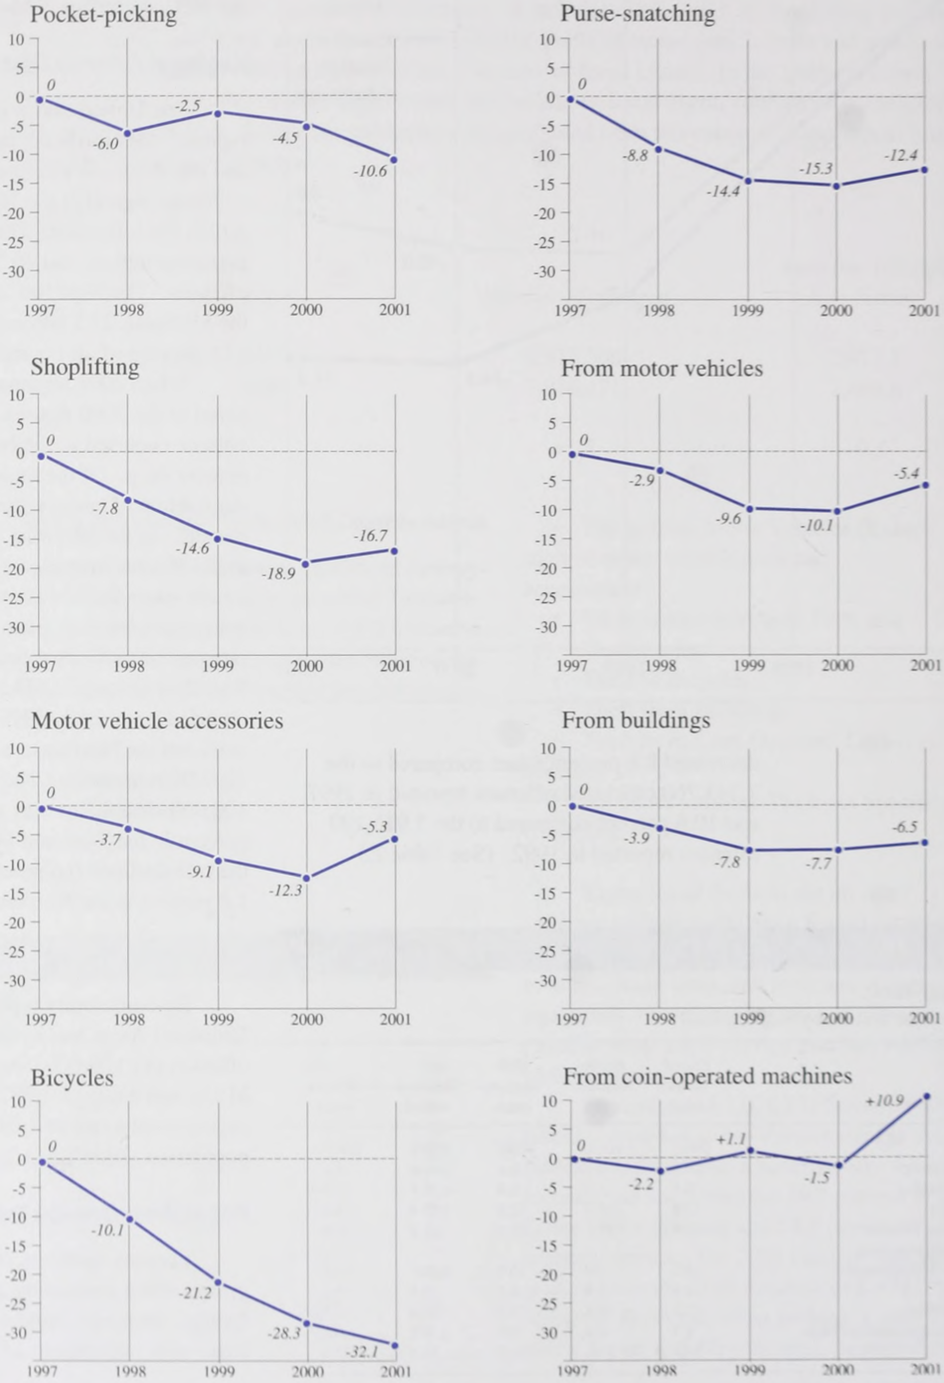
Population Groups Trends and Rates

Larceny-thefts increased in all population groups when comparing 2001 and 2000 volume figures. Increases ranged from 3.2 percent in cities with populations of 250,000 to 499,999 to

Figure 2.16

Larceny-theft categories

Percent change from 1997



0.5 percent each in cities with 1 million and over inhabitants and cities of 10,000 to 24,999 in population. (See Table 12.) Among cities, those with populations of 500,000 to 999,999 had the highest rate per 100,000 inhabitants at 3,968.8, and cities with a population of 10,000 to 24,999 had the lowest rate at 2,646.9 per 100,000 inhabitants. Suburban counties had a rate of 1,754.8; rural counties had a rate at 1,062.0 per 100,000 inhabitants. (See Table 16.)

Distribution

Nature

Thefts from motor vehicles accounted for 25.8 percent and shoplifting 13.8 percent of all larcenies in 2001. Thefts from buildings made up 13.3 percent of the total; 10.2 percent of larcenies were thefts of motor vehicle accessories. Stolen bicycles comprised 4.1 percent of larcenies. The remainder of larceny-thefts were distributed among coin-operated machines, pocket-pickings, purse-snatchings, and all other larceny-thefts. (See Table 23.)

Loss by Dollar Value

An estimated $5.2 billion in property was lost because of larceny-theft in 2001, an increase from the 2000 estimate of $5.1 billion. The average dollar value per offense was $730, an increase from the $727 in 2000. (See Table 23.)

In 2001, thefts from buildings was the larceny-theft offense with the highest average loss, $1,037. For thefts from motor vehicles, the average value loss was $719, and for thefts of motor vehicle accessories, $451. Purse-snatchings had an average value loss of $331, and thefts of bicycles an average loss of $318. Pocket-picking resulted in an average value loss of $305, and in thefts from coin-operated machines, the loss was $286. The category with the lowest average loss, $182, was shoplifting. For the all other category, the average dollar loss was $1,024. (See Table 23.)

Losses over $200 accounted for 39.4 percent of larceny-thefts, up 3.8 percent from 2000 figures; losses under $50 made up 37.6 percent of larceny-theft offenses, which was up 1.8 percent from 2000; and the remaining 23.0 percent were losses ranging from $50–$200, a 0.5-percent rise from 2000 data. Thefts of items over $200 had an average value of $1,770, thefts of items from $50–$200 had an average value of $115, and thefts of items under $50 had an average value of $18. (See Table 23.)

Trends by Category

Reported thefts from coin-operated machines increased 12.6 percent from 2000 data. Other categories with volume increases from 2000 to 2001 were thefts of motor vehicle accessories, 8.0 percent; thefts from motor vehicles, 5.2 percent; purse-snatchings, 3.4 percent; shoplifting, 2.7 percent; and thefts from buildings, 1.2 percent. However, pocket-picking offenses declined 6.4 percent from the 2000 figure, and thefts of bicycles were down 5.4 percent. (See Table 23.)

Among the larceny types, the sole category with an increase in offenses from 1997 to 2001 was thefts from coin-operated machines, with a 10.9-percent growth. The other larceny-theft categories all posted a reduction in the number of offenses. Thefts of bicycles dropped 32.1 percent when comparing 1997 and 2001 data. Other categories with decreases from 1997 to 2001 were shoplifting, 16.7 percent; purse-snatching, 12.4 percent; and pocket-picking, 10.6 percent. The number of thefts from buildings fell 6.5 percent; thefts from motor vehicles decreased 5.4 percent; and thefts of motor vehicle accessories fell 5.3 percent. (See Figure 2.16.)

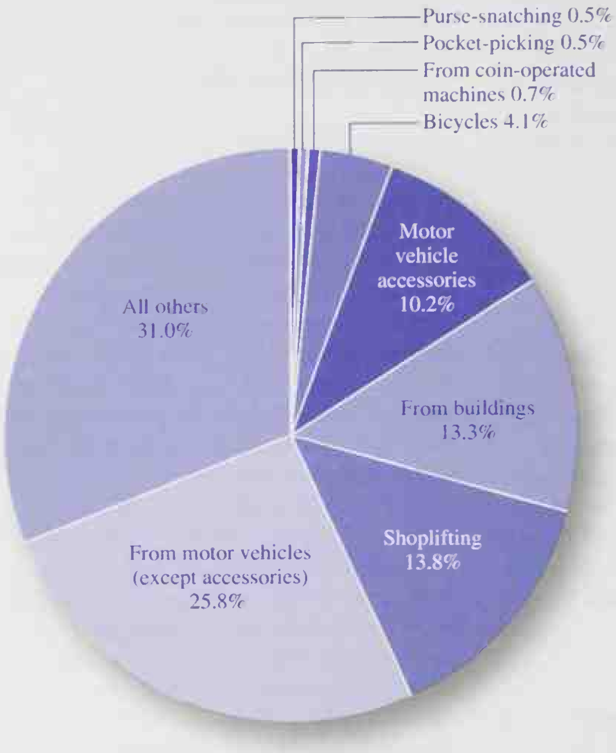
Clearances

Of the larceny-thefts reported to law enforcement in 2001, 17.6 percent were cleared by arrest or exceptional means. By population group, cities with 10,000 to 24,999 inhabitants had the highest number of clearances among the Nation's cities, 22.5 percent, and cities with 500,000 to 999,999 inhabitants cleared the least of their larceny-theft offenses, 11.6 percent. Law enforcement in rural counties cleared 17.8 percent of larceny-thefts, and law enforcement in suburban counties cleared 16.0 percent. (See Table 25.)

Figure 2.17

Larceny-theft

Percent distribution[1] 2001



---

[1] Due to rounding, the percentages do not add to 100.0 percent.

Nearly 22 percent (21.9) of all larceny-theft clearances were of juveniles (persons under 18 years of age). By population group, cities with populations of 50,000 to 99,999 inhabitants had the largest percentage of clearances involving only juveniles—25.3. (See Table 28.)

Arrests

The number of estimated arrests for larceny-thefts in the Nation in 2001 was 1,160,821, or 8.5 percent of the 13.7 million total estimated arrests for the United States. Larceny arrests accounted for 71.7 percent of the 1.6 million estimated arrests for all property crimes, and 51.7 percent of the estimated 2.2 million arrests for all Crime Index offenses in 2001. (See Table 29.)

Larceny-theft arrests in 2001 were down 1.9 percent from the 2000 figure. Larceny-theft arrests of juveniles declined 6.3 percent from the 2000 figure. Adult arrests for larceny-thefts showed a slight increase, 0.2 percent, from the 2000 number. (See Table 36.) Arrests of juvenile males went down 9.2 percent, and arrests of juvenile females declined 1.3 percent. (See Table 37.)

In 2001, juvenile arrests accounted for 29.6 percent of all larceny-theft arrests, and adult arrests comprised 70.4 percent. (See Table 38.) Of the juveniles arrested for larceny-theft, 68.9 percent were white, 27.8 percent were black, 2.0 percent were Asian or Pacific Islander, and 1.4 percent were American Indian or Alaskan Native. (See Table 43.)

Males accounted for 63.5 percent of the total arrests for larceny-theft, and females accounted for 36.5 percent of the arrests. (See Table 42.) By race, 66.1 percent of arrestees for larceny-theft in 2001 were white, 31.2 percent were black, 1.5 percent were Asian or Pacific Islander, and the remaining 1.2 percent were American Indian or Alaskan Native. (See Table 43.)

Motor Vehicle Theft

Definition

Defined in the Uniform Crime Reporting Program as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

Trend

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
2000	1,160,002	412.2
2001	1,226,457	430.6
Percent Change	+5.7	+4.5

National Trends, Rates, and Distributions

The estimated 1,226,457 motor vehicle thefts in the Nation in 2001 represent a 5.7-percent increase from the previous year's estimate. When compared to 5 and 10 years ago, the level of motor vehicle theft was down 9.4 percent from the 1997 level and declined 23.9 percent from the 1992 level. For 2001, the Nation's motor vehicle theft rate was 430.6 per 100,000 inhabitants. This rate was up 4.5 percent from the 2000 rate but was 14.8 percent lower than in 1997 and 31.8 percent below the 1992 level. (See Table 1.) By vehicle type, 336.9 automobiles and 86.5 trucks and buses were stolen per 100,000 inhabitants. The theft rate for all other vehicles was 33.4. (See Table 19.)

The average value of motor vehicles reported stolen in 2001 was $6,646. With the estimated total value of all motor vehicles stolen at $8.2 billion, approximately 62.0 percent of that amount was recovered. (See Tables 1, 23, and 24.)

Table 2.29

Motor Vehicle Theft by Month

Percent Distribution, 1997-2001

Month	*1997*	*1998*	*1999*	*2000*	*2001*
January	9.0	9.1	8.5	8.1	8.1
February	7.6	7.9	7.3	7.4	6.9
March	8.2	8.5	7.9	8.0	7.7
April	7.9	7.9	7.7	7.6	7.6
May	8.2	8.3	8.0	8.2	8.0
June	8.1	8.1	8.2	8.3	8.2
July	8.7	8.7	8.8	8.9	9.0
August	8.7	8.8	9.0	9.1	8.8
September	8.3	8.3	8.5	8.5	8.5
October	8.6	8.4	8.8	8.7	9.3
November	8.2	7.9	8.5	8.5	8.8
December	8.3	8.1	8.8	8.6	9.2

Regional Offense Distributions and Rates

The U.S. is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeastern States accounted for 14.0 percent of all motor vehicle thefts in 2001. (See Table 3.) The region experienced a slight drop, 0.6 percent, in the estimated volume of motor vehicle thefts from the 2000 estimate. The Northeast, with a rate of 318.8 motor vehicle thefts per 100,000 persons, was the only region of the Nation that experienced a decline in the motor vehicle theft rate with a 1.0-percent drop. (See Table 4.)

The Midwest

The Midwestern States reported 20.0 percent of the total estimated motor vehicle thefts. (See Table 3.) The total number of vehicle thefts in 2001 was a 3.4-percent increase from the previous year's number. The region had a rate of 379.9 vehicles stolen per 100,000 in population, accounting for a 2.9-percent increase over the 2000 rate. (See Table 4.)

The South

The Southern States reported the highest percentage of motor vehicle thefts among the Nation's four regions with 35.5 percent of the total estimate. (See Table 3.) This region saw a 4.0-percent increase from the 2000 estimate. The rate of 427.6 thefts per 100,000 in population was a 2.4-percent increase over the previous year's rate. (See Table 4.)

The West

The Western States accounted for 30.5 percent of the Nation's motor vehicle thefts. (See Table 3.) This region had the largest rise in the volume of vehicle thefts—12.9 percent—over the 2000 total. The West reported the highest motor vehicle theft rate at 579.7 offenses per 100,000 persons. This rate represents a 10.6-percent rise from the 2000 rate. (See Table 4.)

Community Types

Metropolitan Statistical Areas (MSAs) had a rate of 499.1 motor vehicle thefts per 100,000 persons and accounted for 92.6 percent of all motor vehicle theft offenses; cities outside MSAs, a rate of 205.5 vehicles stolen and 3.8 percent of offenses; and rural counties had a rate of 127.3 motor vehicle thefts per 100,000 persons and accounted for 3.6 percent of all stolen vehicle offenses. (See Table 2.)

Population Groups and Rates

All population groups experienced an increase in reported motor vehicle thefts with those cities 250,000 to 499,999 in population having the greatest increase at 11.3 percent. Cities with 1 million and over inhabitants registered the smallest increase at 2.5 percent. All county groups also saw increases in motor vehicle thefts as suburban counties experienced a 6.0-percent rise and rural counties had a 3.6-percent increase. (See Table 12.)

The highest rate of motor vehicle thefts, 1,072.4 per 100,000 inhabitants, was in cities with populations of 250,000 to 499,999. (See Table 16.) When broken down by vehicle type, cities with populations of 250,000 to 499,999 recorded the highest rate of automobile theft, 834.8 per 100,000 inhabitants. For trucks and buses, cities of 1 million and more in population had the highest theft rate at 279.0 per 100,000 inhabitants. When one examines the other vehicles category, cities of 1 million and over also had the highest theft rate with 58.0 per 100,000 in population. Rural counties had the lowest theft rate of automobiles at 78.5 and also for trucks and buses at 23.9. Cities of 10,000 to 24,999 had the lowest rate of other types of vehicles stolen at 23.9 per 100,000 persons. (See Table 19.)

Clearances

Nationally, clearances of motor vehicle thefts in 2001 totaled 13.6 percent. (See Table 25.) Clearances were highest in the Midwest and South at 15.6 percent. Motor vehicle thefts were cleared at 13.9 percent in the Northeast and 10.8 percent in the West. (See Table 26.)

All cities reporting combined to clear 12.8 percent of motor vehicle thefts. The Nation's smallest cities, those under 10,000 in population, reported the highest clearance percentage at 26.2, and the largest cities, those with 1 million and over in population, had the lowest percentage at 10.0. At the county level, 28.0 percent of motor vehicle thefts were cleared in

Table 2.30

Motor Vehicle Theft

Percent Distribution by Region, 2001

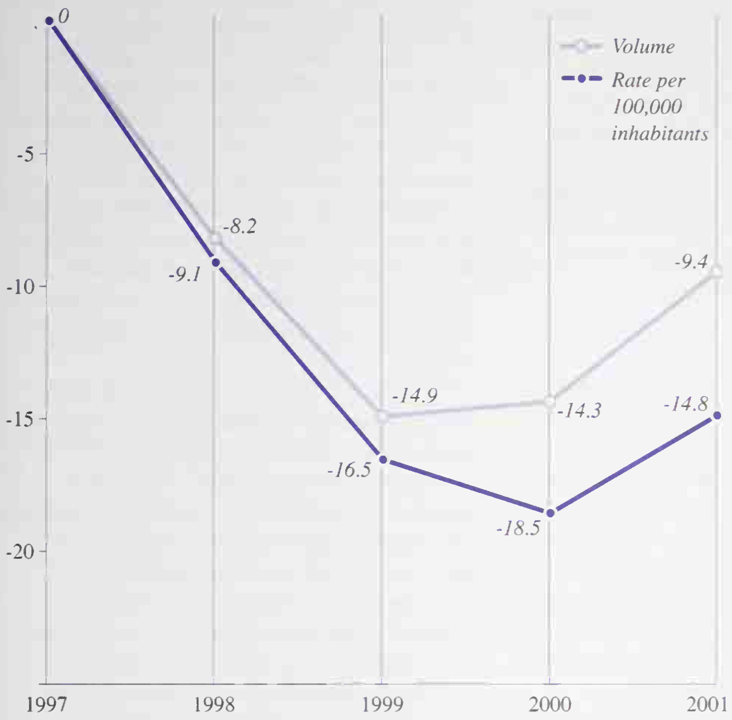
Region	*Total*[1]	*Autos*	*Trucks and buses*	*Other vehicles*
Total	100.0	73.7	18.9	7.3
Northeastern States	100.0	87.9	6.0	6.1
Midwestern States	100.0	77.7	15.2	7.1
Southern States	100.0	70.9	20.1	8.9
Western States	100.0	70.1	23.8	6.1

[1] Because of rounding, the percentages may not add to total.

Figure 2.18

Motor Vehicle Theft

Percent change from 1997



rural counties, and 15.4 percent were cleared in suburban counties. (See Table 25.)

In the Nation, 14.1 percent of automobile thefts were cleared, 11.6 percent of truck and bus thefts were cleared, and 13.1 percent of thefts of other vehicle types were cleared. Law enforcement in rural counties recorded the highest number of clearances for automobiles stolen, 32.1 percent, as well as for stolen trucks and buses, 28.3 percent. Cities 250,000 to 499,999 in population had the highest number of clearances in the other vehicles category at 21.0 percent. (See Table 27.)

Arrests

An estimated 147,451 persons were arrested for motor vehicle theft in the Nation in 2001. (See Tables 29.) The Nation's cities collectively had a rate of 62.1 arrests per 100,000 inhabitants compared to a National rate of 53.3. Among the population groups, those cities with 250,000 and over in population had the highest arrest rate at 113.8 per 100,000 in population, and rural counties had the lowest arrest rate at 28.2. (See Table 31.)

Regionally, the Western States reported the highest rate of arrests per 100,000 persons at 70.2. The Midwestern States had a rate of 64.0, followed by the Southern States at 41.5 and the Northeastern States at 35.3. (See Table 30.)

By gender, males comprised 83.6 percent of all arrestees for motor vehicle theft. (See Table 42.) By race, whites accounted for 57.5 percent of motor vehicle theft arrestees, and blacks made up 39.8 percent. Asian or Pacific Islander, at 1.8 percent, and American Indian or Alaskan Native, at 0.9 percent, accounted for the remainder of arrestees. (See Table 43.)

Arrest Trends

Although the number of arrests were up 2.7 percent over the previous year's figure, motor vehicle theft arrests were down 11.8 percent from the 1997 number and down 30.3 percent from the 1992 number. Nationally, adult arrestees for motor vehicle theft in 2001 increased 5.2 percent from the 2000 total. However, the 2001 total of adult arrestees was 2.9 percent below the 1997 level and 13.1-percent below the 1992 level. Juvenile arrests were down 2.2 percent; they fell significantly over the past decade, with a 25.7-percent decline from the 1997 figure and a 51.3-percent drop from the 1992 figure. (See Tables 32, 34, and 36.)

Arson

Definition

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling, house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

National Coverage

In 2001, 12,242 law enforcement agencies submitted 1–12 months of arson data covering a total of 76,760 arson offenses. Of those agencies, 12,155 contributed supplementary details such as types of structure and estimated value of property damaged. Their reports covered 68,967 arsons. (See Table 2.32.) Reports covering all 12 months in 2001 were submitted to the UCR Program by 8,528 agencies providing law enforcement services to 65.2 percent of the U.S. population.

Table 2.31

Arson Rate

by Population Group, 2001
[8,528 agencies; 2001 estimated population 185,693,054;
rate per 100,000 inhabitants]

Population group	*Rate*
Total	35.5
Total cities	38.8
Group I (cities 250,000 and over)	61.7
(cities 1,000,000 and over)	55.7
(cities 500,000 to 999,999)	57.4
(cities 250,000 to 499,999)	73.2
Group II (cities 100,000 to 249,999)	38.3
Group III (cities 50,000 to 99,999)	31.5
Group IV (cities 25,000 to 49,999)	25.2
Group V (cities 10,000 to 24,999)	20.8
Group VI (cities under 10,000)	26.5
Suburban counties	32.1
Rural counties	19.1
Suburban area[1]	26.7

[1] Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Collected by the UCR Program since 1979, arson is a unique offense because it is not always investigated by law enforcement. In some communities, arson offenses are investigated by fire marshals within the local fire department. In such cases, the incidents are less likely to be reported to the UCR Program. Because the level of reporting may be lower than for the other Crime Index offenses, arson data should not be regarded as a comprehensive accounting of the national arson problem. Rather, these statistics serve as an indicator of the types of arson incidents occurring in the Nation.

Due to the limited reporting, the UCR Program does not estimate for arson; therefore, arson offenses are not included in tables containing offense estimates. Arson totals reported by individual law enforcement agencies are displayed in Tables 8–11. In these tables, the arson offenses are tallied separately and included in the Modified Crime Index. In addition, arson is not included in the national rate calculations; instead, arson rates are computed separately and presented in Table 2.31. Two-year arson trends are shown in Tables 12–15, and arson clearance data appear in Table 2.32 and Tables 25–28.

Characteristics

Type

Structural arson was the most frequently reported type of arson in 2001, accounting for 42.2 percent of the arson total. Mobile properties (motor vehicles, trailers, etc.) were targeted in 32.5 percent of reported arson offenses, and other types of properties (crops, timber, etc.) comprised the remaining 25.4 percent of offenses. (See Table 2.32.)

Among structural arsons, 60.6 percent were of residential properties of which 42.1 percent were of single-occupancy dwellings. Property that was either uninhabited or abandoned at the time of the arson accounted for 19.3 percent of structure-related arsons. Nationally, structural arsons showed a 2.3-percent decrease from 2000 to 2001. Mobile properties

Table 2.32

Other	17,498	25.4		1,361	3,175	18.1	56.2

[1] Because of rounding, the percentages may not add to total.

[2] Includes offenses cleared by arrest or exceptional means.

and other types of fires, however, showed increases of 12.1 percent and 0.1 percent, respectively. (See Table 15.) The bulk of mobile property arsons, 94.5 percent, involved motor vehicles. (See Table 2.32.)

Dollar Loss

In 2001, the average dollar loss for property damaged or destroyed in reported arsons was $11,098 per incident. Structural losses averaged $20,128, and mobile property losses averaged $6,974 per incident. Average losses for properties categorized as "Other" were estimated at $1,361 per arson. (See Table 2.32.)

Population Groups Trends and Rates

Because population coverage for arson data is lower than for other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. The rates for 2001 presented in Table 2.31 are based on data provided by the 8,528 law enforcement agencies that supplied monthly arson reports for all 12 months of 2001.

For 2001, the rate of arsons was computed at 35.5 offenses per 100,000 population. The Nation's cities registered a collective arson rate of 38.8 per 100,000 inhabitants. The highest rate overall, 73.2, was recorded by cities with 250,000 to 499,999 inhabitants. The lowest rate was posted by rural counties, 19.1. (See Table 2.31.)

Collectively, the Nation's cities reported a 1.0-percent increase in the number of reported arsons in 2001; the largest increase, 7.0 percent, was in cities with populations of 50,000 to 99,999. The greatest decline in arson among cities, 7.8 percent, was seen in cities of 500,000 to 999,999 in population. Both rural and suburban counties showed an increase in volume of 3.3 percent and 4.0 percent, respectively. (See Table 12.)

By arson type, rural counties saw the largest increase in structural arson, up 8.1 percent from 2000. Cities 500,000 to 999,999 in population experienced the greatest decrease, down 14.4 percent. Cities of 250,000 to 499,999 recorded the largest increase in mobile arson, up 22.5 percent from 2000; all population groups experienced an increase in this arson category. Other types of arsons increased in cities of 50,000 to 99,999 by 13.6 percent, whereas cities of 500,000 to 999,999 inhabitants recorded a 14.9-percent decline from the prior year's data. (See Table 15.)

Clearances

In 2001, the Nation's law enforcement agencies cleared 16.0 percent of reported arson offenses. Cities collectively cleared 15.6 percent of all arsons; the highest clearance figure, 25.0 percent, was recorded by agencies in cities under 10,000 in population. Rural counties cleared 24.8 percent, and suburban counties cleared 14.9 percent of arsons reported in their jurisdictions. (See Table 25.)

The Northeastern States cleared 19.9 percent of reported arson offenses in that region, and the Southern States recorded clearances of 17.8 percent. The Midwestern States cleared 14.8 percent of arsons reported in that region, and the Western States cleared 13.7 percent. (See Table 26.)

Among population groups, clearances of structural arson offenses ranged from 30.4 percent for cities with populations under 10,000 in population to 16.0 percent for cities with 250,000 to 499,999 inhabitants. Clearances of mobile vehicle arsons ranged from 16.7 percent for both rural counties and cities under 10,000 in population to 3.8 percent for the Nation's cities with 1 million or more in population. Clearances of arsons of other types of property ranged from 26.0 percent in rural counties to 11.1 percent in cities of 1 million or more inhabitants. (See Table 27.)

Table 2.32 shows clearance data only for those 12,155 agencies that furnished breakdowns by type for the structural and mobile classifications. As can be seen, the highest percentage of arson clearances in 2001 involved incidents of structural fires, 22.1 percent. The lowest percentage of arson clearances involved incidents of mobile vehicle fires at 7.1 percent. Juvenile involvement in arson was higher than for any other Index offense. In 2001, juvenile clearances accounted for 45.2 percent of all arsons cleared.

Arrests

Total Arrests

An estimated 18,749 persons were arrested for arson in 2001. (See Table 29.) Based upon the actual number of arrests reported by the 8,528 agencies submitting 12 months of data, the national arrest rate for arson was calculated at 6.6 per 100,000 persons. The West reported an arrest rate of 8.3 per 100,000 individuals, the highest regional arrest rate for this offense; the South recorded a rate of 6.0; the Northeast, 5.9; and the Midwest, 5.6. (See Table 30.)

By population group, law enforcement in cities collectively arrested arson offenders at a rate of 7.0 per 100,000 inhabitants; in rural counties, the arrest rate was 5.2; and in suburban counties, 6.1. Law enforcement in cities with 250,000 or more people had the highest rate of arrests for arson, reporting a rate of 8.7 per 100,000 inhabitants. (See Table 31.)

Arrest Trends

Nationwide, 2001 arson arrests increased 14.7 percent over the previous year's figure. Arrests of juveniles (persons under the age of 18) increased 8.1 percent, and adult arrests increased 22.8 percent. (See Table 36.)

In comparing data from 1997 to those of 2001, overall arson arrests declined 3.1 percent for the 5-year period. Though juvenile arrests also dropped 9.3 percent, adult arrests for arson rose 4.1 percent. (See Table 34.) By gender, arrests of females and juvenile females showed increases since 1997 of 12.2 percent and 5.2 percent, respectively. Arson arrests of males decreased for juveniles by 11.0 percent and for males of all ages by 5.5 percent. (See Table 35.)

For the 10-year period 1992–2001, arson arrests declined 6.3 percent, with those for juveniles and adults decreasing 7.4 percent and 5.2 percent, respectively. When analyzing arrest trends by age and gender, arrests of juvenile females and females of all ages showed increases—4.0 percent and 14.6 percent, respectively—as opposed to the declines seen in arrests of juvenile males and males of all ages—8.7 percent and 9.4 percent, respectively. (See Tables 32 and 33.)

Distribution

In 2001, nearly half of all persons arrested for arson, 49.5 percent, were juveniles. In particular, those under 15 years of age accounted for 31.7 percent of the arson arrest total. Males comprised 84.1 percent of all arson arrestees. By race, 76.9 percent of arson arrestees were white, 20.7 percent were black, and the remaining 2.4 percent were of other races. (See Tables 41–43.)

Hate Crime

Definition

A hate crime, also known as a bias crime, is a criminal offense committed against a person, property, or society which is motivated, in whole or in part, by the offender's bias against a race, religion, disability, sexual orientation, or ethnicity/national origin.

Background

In response to mounting national concern over crimes motivated by bias, Congress enacted the *Hate Crime Statistics Act of 1990* on April 23 of that year. This law required the Attorney General to collect data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity." The Attorney General delegated the responsibilities of developing the procedures for and implementing, collecting, and managing hate crime data to the Director of the FBI, who in turn assigned the tasks to the Uniform Crime Reporting (UCR) Program. In September 1994, the Violent Crime Control and Law Enforcement Act amended the Hate Crime Statistics Act to include both physical and mental disabilities as potential bias factors, and the actual collection of disability-bias data began in January 1997. Additionally, the Church Arson Prevention Act of 1996 mandated that hate crime data collection become a permanent part of the UCR Program.

The program developers recognized that hate crimes are not separate, distinct crimes; instead they are traditional offenses motivated by the offender's bias. After much consideration, they decided that hate crime data could be derived by capturing the additional element of bias in those offenses already being reported to the UCR Program. Appending the collection of hate crime statistics to the established UCR data collection procedures would fulfill the directives of the Hate Crime Statistics Act, avoid placing an undue additional reporting burden on law enforcement and, in time, develop a substantial body of data about the nature and frequency of bias crimes occurring throughout the Nation. Accordingly, the program collects details about an offender's bias motivation associated with the following offense types: murder and nonnegligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, robbery, burglary, larceny-theft, motor vehicle theft, arson, and destruction/damage/vandalism of property. (The national Hate Crime program also collects additional offense types reported by those agencies participating in the National Incident-Based Reporting System and publishes them in tables as "other" or "crimes against society.")

Participation

During 2001, 11,987 law enforcement agencies participated in the Hate Crime program. Of those agencies, approximately 17.6 percent submitted hate crime incident reports to the FBI. These figures indicate a slight increase in the number of agencies submitting data in 2000, when 11,690 agencies participated in the program, and 16.2 percent reported that at least one hate crime had occurred. (See Table 2.36.) During 2001, law enforcement reported 9,726 incidents compared to 8,063[1] incidents reported for the prior year. The following hate crime abstract is based on the data received from those law enforcement agencies that provided 1 to 12 months of hate crime reports during 2001.

Hate Crime Data Collection

The UCR Program data collection guidelines stipulate that a hate crime may have multiple offenses, victims, and offenders within one incident. Thus, in 2001, the 9,726 hate crime incidents reported to the FBI involved 11,447 separate offenses, 12,016 victims, and 9,231 known offenders. Of the total reported single-bias incidents, 44.9 percent were motivated by racial bias, 21.6 percent were driven by prejudice against an ethnicity or national origin, 18.8 percent resulted from a bias against a particular religion, and 14.3 percent involved a sexual-orientation bias. (Based on Table 2.33.)

A *victim*, according to the UCR definition, may be either a person, a business, an institu-

Multiple-Bias Incidents[3]	**9**	**21**	**22**	**13**

[1] The term *victim* may refer to a person, business, institution, or society as a whole.

[2] The term *known offender* does not imply that the identity of the suspect is known, but only that the race of the suspect has been identified, distinguishing him/her from an unknown offender.

[3] A *multiple-bias incident* is a hate crime in which more than one offense type was committed as a result of more than one bias motivations.

tion, or society as a whole. When aggregating the number of hate crime offenses committed against *individuals*, the program counts one offense for each person. The offense types of murder, rape, aggravated assault, simple assault, and intimidation are possible crimes against persons. When counting crimes against *property*, the program allots one offense for each distinct incident regardless of the number of victims. Robbery, burglary, larceny, motor vehicle theft, arson, and destruction/damage/vandalism are the offense types that are possible crimes against property.

Law Enforcement Reports

During 2001, 64.6 percent of reported victims were the targets of crimes against persons, and 34.7 percent of victims were the targets of crimes against property. (Crimes against society comprised 0.6 percent of reports.) Intimidation continued to be the most frequently reported hate crime against individuals and accounted for 55.9 percent of all crimes against persons. Destruction/damage/vandalism of property was the most frequently reported crime against property. Of the 4,175 targets of crimes against property, 83.4 percent were vandalized. (Based on Table 2.34.)

Among all hate crime offenses, intimidation was the most frequently reported offense: it

Table 2.34

Other[4]	27	27	28	26
Crimes against society[4]	**75**	**75**	**75**	**84**

[1] The actual number of incidents is 9,726. However, the column figures will not add to the total because incidents may include more than one offense type, and these are counted in each appropriate offense type category.

[2] The term *victim* may refer to a person, business, institution, or society as a whole.

[3] The term *known offender* does not imply that the identity of the suspect is known, but only that the race of the suspect has been identified, distinguishing him/her from an unknown offender. The actual number of known offenders is 9,231. However, the column figures will not add to the total because some offenders are responsible for more than one offense, and they are, therefore, counted more than once in this table.

[4] Includes additional offenses collected in NIBRS.

Table 2.35

Race of Known Offenders, 2001[1]

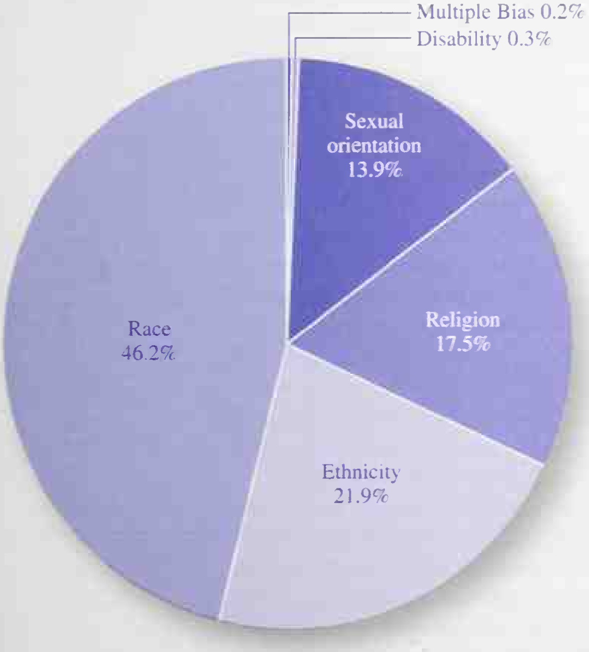
Known offender's race	
Total	9,231
White	6,049
Black	1,882
American Indian/Alaskan Native	59
Asian/Pacific Islander	84
Multiple Races, Group	403
Unknown Race	754

[1] The term *known offender* does not imply that the identity of the suspect is known, but only that the race of the suspect has been identified, distinguishing him/her from an unknown offender.

Figure 2.19

Bias-motivated Offenses

Percent distribution 2001



accounted for 37.9 percent of the total. Damage/destruction/vandalism of property made up 26.4 percent of total offenses; simple assault, 18.8 percent; and aggravated assault, 10.9 percent. (Based on Table 2.34.)

Approximately forty-six percent (46.2) of all single-bias hate crime victims were targets of racial prejudice. Of these victims, 66.8 percent were attacked because of an anti-black bias motivation, and 19.2 percent were attacked due to an anti-white bias motivation. Religious intolerance accounted for 17.7 percent of all victims of reported single-bias hate crimes; of these, 56.5 percent were targeted because of an anti-Jewish motivation, and 26.2 percent were targets due to a prejudice against the Islamic religion. Sexual-orientation bias led to attacks on 13.9 percent of single-bias victims; among these victims, anti-male homosexual bias made up 69.3 percent of the total. Anti-ethnicity or national origin was the underlying motivation for attacks on 22.0 percent of the total single-bias victims; 30.8 percent were victims of anti-Hispanic bias, and 69.2 percent were classified as victims of anti-other ethnicity/national origin. (Based on Table 2.33.)

In 2001, the majority of known hate crime offenders were white, 65.5 percent; 20.4 percent were black, 8.2 percent were of unknown race, and the remainder were of other races or multiple races. (Based on Table 2.35.)

---

[1] The total number of hate crime incidents for 2000 was updated after the publication of *Crime in the United States 2000.*

Crime Index Tabulations

The tabular portions of this section organize crime data into various categories based upon population. Data are presented for the Nation as a whole; geographic divisions; individual states; Metropolitan Statistical Areas (MSAs); and cities, towns, and counties. Within these classifications, the statistics on crime volumes are also computed as rates of occurrence per 100,000 U.S. inhabitants.

Although the exact number of crimes occurring within the United States is unknown, criminal activity can be gauged by studying those crimes reported to law enforcement. The reader is cautioned, however, that many factors affect crime volumes and crime types and can cause them to vary from time to time and from place to place. Population, for example, is used in computing crime rates. Since current, permanent population counts are used in their construction, crime rates do not account for transient or seasonal populations. Short-term population variables, such as an influx of day workers, tourists, shoppers, etc. impact all communities to some degree. Other factors contributing to the amount of crime in a given area are discussed in Section I, Crime Factors.

One tool law enforcement administrators can use in analyzing the volume of local crime and the performance of the law enforcement agencies is national data. An analysis, however, should not be based solely on data presented in this publication. A true assessment of a community's crime problem or the effectiveness of law enforcement operations can be made only by including in that assessment all the variables that mold local crime conditions.

Table 1 sets forth national estimates of volume and rate per 100,000 population for all Crime Index offenses covering the past two decades. Table 2 shows estimates of crime volume and rates for 2001 for the Nation as a whole, MSAs, rural counties, and cities and towns outside metropolitan areas. Definitions of these community types can be found in Appendix III.

Data showing the regional distribution of estimated Index crimes along with proportional population estimates are provided in Table 3. A map of the United States illustrating the regions and divisions employed by the UCR Program appears in Appendix III.

Table 4 offers a 2-year trend in the volume and rate estimates by region, geographic division, and state. The incidence and rate of Crime Index offenses for each state and for individual MSAs are shown in Tables 5 and 6. Table 7 offers breakdowns for the offenses of robbery (by location), burglary (by time of day), and larceny-theft (by type) over the past 5 years.

Offenses known to police for cities over 10,000 in population are presented in Table 8, and Table 9 records Index Crimes occurring on college and university campuses, although no population is assigned to educational institutions.

Offenses reported by suburban and rural counties are broken down by state in Tables 10 and 11. Tables 12–19 offer crime trends and rates by population groupings. A description of the population groups defined by the UCR Program can be found in Appendix III.

Data concerning weapons used in the violent crimes of murder, robbery, and aggravated assault are presented in Tables 20–22. Tables 23 and 24 analyze the value of property lost through the crimes of robbery, burglary, and larceny-theft, and offer breakdowns by type and value of property stolen and recovered.

Note

Because the UCR Program does not estimate for arson, arson offenses are not included in the tables containing offense estimates. Arson totals reported by individual law enforcement agencies are displayed in Tables 8–11. Two-year arson trends are shown in Tables 12–15. An in-depth discussion of table construction methodology can be found in Appendix I.

---

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

[2] Populations are Bureau of the Census provisional estimates as of July 1 for each year except 1990 and 2000 which are decennial census counts.

[3] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[5] The 2000 crime figures have been adjusted. See Crime Trends, Appendix I, for details.

---

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

[2] Populations are Bureau of the Census 2001 provisional estimates as of July 1, 2001, and 2000 decennial counts.

[3] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[5] The 2000 crime figures have been adjusted. See Crime Trends, Appendix I, for details.

[6] Limited data for 2001 were available for the states of Illinois and Kentucky; therefore, it was necessary that their crime counts be estimated. See Offense Estimation, Appendix I, for details.

[7] Includes offenses reported by the Zoological Police.

[8] Less than one-tenth of 1 percent.

Offense totals are based on all reporting agencies and estimates for unreported areas.

Forcible rape		*Robbery*		*Aggravated assault*		*Burglary*		*Larceny-theft*		*Motor vehicle theft*		*Arson*[3]

---

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

[2] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[4] Includes offenses reported by the Zoological Police.

[5] Limited data for 2001 were available for Illinois and Kentucky; therefore, it was necessary that their crime counts be estimated. See Offense Estimation, Appendix I, for details. Offense totals are based on all reporting agencies and estimates for unreported areas.

---

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

[2] Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[4] Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

[5] Aggravated assault figures were found to be outside statistical parameters.

[6] The population for the city of Mobile, Alabama, includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

[7] The data for anthrax assaults were not available.

---

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

[2] The 2000 crime figures have been adjusted.

Note: Because of rounding, offenses may not add to total.

---

[1] The Modified Crime Index total is the sum of the Crime Index offenses including arson. Arson is shown only if 12 months of arson data were received. If 12 months of arson data were not received, there is no Modified Crime Index total shown.

[2] Complete arson figures for 2001 for Alabama, Massachusetts, and Montana were not available.

[3] The population for the city of Mobile, Alabama, includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

[4] Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

[5] The data for anthrax assaults were not available.

[6] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

[7] Limited data for 2001 were available for Illinois and Kentucky.

[8] Aggravated assault figures were found to be outside established statistical parameters.

[9] The murder and nonnegligent homicide figure includes the 2,823 homicides reported as a result of the events of September 11, 2001. See special report, Section V.

---

[1] The student enrollment figures provided by the United States Department of Education are for the 1999 school year, the most recent available. The enrollment figures include full-time and part-time students. See Appendix I for details.

[2] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Arson is not included in the property crime total. Arson is shown only if 12 months of arson data were received.

[4] Complete arson figures for 2001 for Alabama and Massachusetts were not available.

[5] Student enrollment figures were not available.

[6] Limited data for 2001 were available for Illinois and Kentucky.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

---

[1] The Modified Crime Index total is the sum of the Crime Index offenses including arson. Arson is shown only if 12 months of arson data were received. If 12 months of arson data were not received, there is no Modified Crime Index total shown.

[2] Complete arson figures for 2001 for Alabama, Massachusetts, and Montana were not available.

[3] Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

[4] Limited data for 2001 were available for Illinois and Kentucky.

[5] The murder and nonnegligent homicide figure is the number of homicides reported as a result of the events of September 11, 2001. See special report, Section V.

---

[1] The Modified Crime Index total is the sum of the Crime Index offenses including arson. Arson is shown only if 12 months of arson data were received. If 12 months of arson data were not received, there is no Modified Crime Index total shown.

[2] Complete arson figures for 2001 for Alabama and Montana were not available.

[3] Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

[4] Limited data for 2001 were available for Illinois and Kentucky.

[5] Figures reported are the number of crimes occurring in New Jersey.

[6] Figures reported are the number of crimes occurring in New York.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any trend tables (Tables 12-15). See special report, Section V.

[2] The Modified Crime Index total is the sum of the Crime Index offenses including arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[5] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Programs administered by the Delaware State Bureau of Investigation for 2000 and the Illinois State Police for 2000 and 2001 were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[6] Includes state police agencies with no county breakdowns.

[7] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any trend tables (Tables 12-15). See special report, Section V.

[2] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

[3] The Modified Crime Index total is the sum of the Crime Index offenses including arson.

[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[5] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[6] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Programs administered by the Delaware State Bureau of Investigation for 2000 and the Illinois State Police for 2000 and 2001 were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any trend tables (Tables 12-15). See special report, Section V.

[2] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Programs administered by the Delaware State Bureau of Investigation for 2000 and the Illinois State Police for 2000 and 2001 were not in accordance with national UCRguidelines; therefore, the figures were excluded from the forcible rape category.

[3] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all Metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any rate tables (Tables 16-19). See special report, Section V.

[2] Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson data appear in the arson narrative.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[5] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were estimated for inclusion in the forcible rape, violent crime, and Crime Index total categories. See Appendix I for details.

[6] Includes state police agencies with no county breakdowns.

[7] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any rate tables (Tables 16-19). See special report, Section V.

[2] Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear in the arson narrative.

[3] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

Table 20

Murder[1]

by State, 2001

Type of Weapon

---

[1] The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

[2] Total number of murders for which supplemental homicide data were received.

[3] No supplemental homicide data were received from the District of Columbia.

[4] Supplemental homicide data from Florida were not processed due to limited submission of circumstance data.

[5] Limited supplemental homicide data for 2001 were received from Illinois and Kentucky.

Table 21

Robbery

by State, 2001

Type of Weapon

State	Total robberies[1]	Firearms	Knives or cutting instruments	Other weapons	Strong-arm	Agency count	Population

SECTION III

Crime Index Offenses Cleared

Offenses reported to the national UCR Program can be cleared either by arrest or by exceptional means. The administrative closing or "clearing" of a case by a local law enforcement agency does not necessarily mean that an offense can be cleared according to UCR procedures. In order for an offense to be cleared within the Program's guidelines, certain criteria must be met.

Cleared by Arrest

In the UCR Program, a reporting law enforcement agency clears, or solves, an offense only when all of the following conditions are met. At least one person must be:

- Arrested.
- Charged with the commission of an offense.
- Turned over to the court for prosecution.

The number of offenses and not the number of persons arrested are counted in the clearances. Therefore, the arrest of one person may clear many crimes. Conversely, the arrest of many persons may clear just one offense. In addition, clearances recorded in a particular calendar year such as 2001 may include offenses that occurred in previous years.

Cleared by Exceptional Means

When elements beyond law enforcement's control prevent the agency from placing formal charges against the offender, the offense is cleared exceptionally for UCR purposes. For an offense to be cleared exceptionally, all of the following criteria must be met. The agency must have:

- Identified the offender.
- Gathered enough evidence to support an arrest, make a charge, and turn over the offender to the court for prosecution.
- Identified the offender's exact location so that law enforcement could make an arrest.
- Encountered a circumstance outside the control of law enforcement that prohibits the agency from arresting, charging, and prosecuting an offender.

Examples of exceptional clearances include but are not limited to the death of the offender (suicide, justifiably killed by police or private citizens, etc.); the victim's refusal to cooperate with the prosecution after the identification of the offender; or the denial of extradition because the offender committed a crime in another jurisdiction and is being prosecuted. Furthermore, the recovery of property does not clear a case for UCR purposes.

2001 National Clearances

Law enforcement agencies nationwide recorded a 19.6-percent Crime Index clearance rate. (The Crime Index offenses include murder, forcible rape, robbery, aggravated assault, burglary, motor vehicle theft, and larceny-theft.) The Modified Crime Index total (the Crime Index offenses plus arson) showed a 19.6-percent clearance rate for the year and included a 16.0-percent clearance rate for arson.

Violent crimes (murder, forcible rape, robbery, and aggravated assault) often undergo a more vigorous investigative effort than crimes against property. Additionally, victims and/or witnesses often identify the perpetrators. Consequently, violent crimes tend to have higher clearance rates than property crimes. That tendency continued in 2001 with 46.2 percent of violent crimes cleared compared to 16.2 percent of property crimes cleared (excluding arson). Looking at violent crime clearances, the murder clearance rate was 62.4 percent, the aggravated assault clearance rate was 56.1 percent, the forcible rape clearance rate was 44.3 percent, and the robbery clearance rate was 24.9 percent. A review of the clearances for property crimes indicates that the larceny-theft clearance rate was 17.6 percent, the motor vehicle theft clearance rate was 13.6 percent, and the burglary clearance rate was 12.7 percent. (See Table 25.)

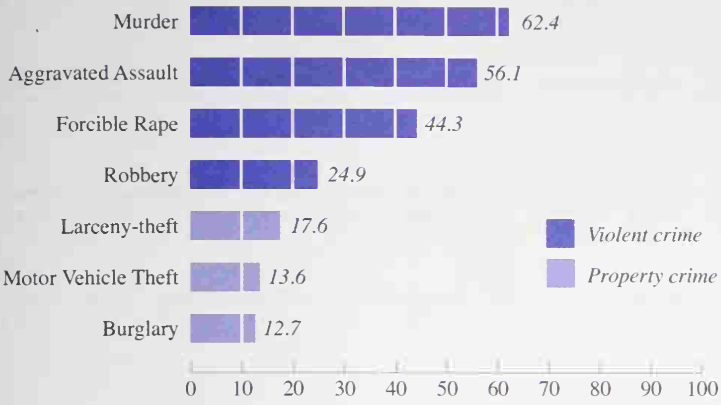
2001 Regional Clearances

By region, law enforcement agencies in the Northeast recorded the highest Crime Index clearance rate in the Nation—23.6 percent. The

Figure 3.1

Crimes cleared by arrest

Percent of crimes cleared by arrest, 2001



South had a 19.5-percent clearance rate, the West had a 18.7-percent clearance rate, and the Midwest cleared 18.5 percent of reported offenses. Violent crime clearance rates reported by region were 51.7 percent in the Northeast, 47.2 percent in the West, 45.1 percent in the South, and 41.9 percent in the Midwest. For property crime, the Northeast and South showed clearance rates of 19.8 percent and 16.1 percent, respectively. The Midwest and West recorded clearance rates of 15.9 percent and 14.8 percent, respectively. (See Table 26.)

2001 Clearances for Community Types

Among community types, cities collectively cleared 19.4 percent of Crime Index offenses, 44.0 percent of violent crimes, and 16.2 percent of property crimes. Among city groupings, cities with populations of 10,000 to 24,999 showed the highest clearance rate for Crime Index offenses—23.9 percent. In 2001, these cities collectively also had the highest property crime clearance rate—21.2 percent. The highest percentage of violent crimes cleared—59.7 percent—occurred in cities with less than 10,000 inhabitants. Among the remaining community types, 19.4 percent of Index offenses were cleared in suburban counties, as were 53.6 percent of violent crimes, and 15.2 percent of property crimes. Rural county law enforcement agencies recorded a 23.0-percent clearance rate for Crime Index offenses. Additionally, rural counties had a violent crime clearance rate of 62.0 percent and a property crime clearance rate of 18.1 percent. (See Table 25.)

Clearances Involving Only Persons Under 18 Years of Age

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as a clearance by arrest, even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances. Therefore, because the juvenile clearance percentages in this publication include only the offenses in which there were no adults involved, these figures underestimate juvenile involvement in crime.

Of the Crime Index offenses cleared by law enforcement, 18.6 percent involved only juveniles. In addition, crimes committed by only juveniles accounted for 12.1 percent of violent crime clearances and 21.1 percent of property crime clearances. (See Table 28.)

By region, the Midwest had the largest percentage of clearances for Crime Index offenses involving only juveniles—23.0 percent. In the West, juveniles alone accounted for 20.9 percent of the clearances; in the Northeast, 17.5 percent; and in the South, 15.6 percent.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any clearance tables (Tables 25-28). See special report, Section V.

[2] Because arson is reported to the FBI separately from other offenses, the number of agency reports used in arson clearance rates is less than those used in compiling other Crime Index offense clearance rates. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[5] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[6] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any clearance tables (Tables 25-28). See special report, Section V.

[2] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape category.

[3] Because arson is reported to the FBI separately from other offenses, the number of agency reports used in arson clearance rates is less than those used in compiling other Crime Index offense clearance rates. It is necessary to report arson clearances by detailed property classification as specified on the *Monthly Return of Arson Offenses Known to Law Enforcement* to be included in this table, and so clearances in this table may differ from other clearance tables.

[4] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

---

[1] The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any clearance tables (Tables 25-28). See special report, Section V.

[2] Because arson is reported to the FBI separately from other offenses, the number of agency reports used in arson clearance rates is less than those used in compiling other Crime Index offense clearance rates. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

[5] Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

[6] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

SECTION IV

Persons Arrested

In protecting the public, law officers rely on their powers of arrest, which provide them with the legal authority to deprive deviant individuals of their liberty and hold them accountable for antisocial behavior. Because arrests are the ultimate goal of criminal investigations, the level of arrests is often viewed as a measure of police effectiveness. Although there is considerable variation in the allocation of law enforcement resources from place to place and even from time to time within the same agency, arrests for serious crime (e.g., murder, rape, robbery) are strongly pursued in all venues.

For UCR reporting purposes, one arrest is counted for each separate occasion in which an individual is taken into custody, notified to appear, or cited for an offense. Because one individual may be arrested several times during the year for different offenses, the arrest figures in this section should not be viewed as an annual accounting of the number of persons arrested but, rather, as an index of the number of arrests made by law enforcement.

Table 4.1

Arrests for Drug Abuse Violations
by Region, 2001

Drug abuse violations	*United States total*	*North-eastern states*	*Mid-western states*	*Southern states*	*Western states*
Total[1]	100.0	100.0	100.0	100.0	100.0
Sale/Manufacturing:[1]	19.4	27.3	19.2	18.3	16.6
Heroin or cocaine and their derivatives	9.7	18.8	5.7	10.1	6.2
Marijuana	5.2	6.5	7.5	4.6	4.4

Other dangerous nonnarcotic drugs	3.1	1.1	4.7	1.5	5.1
Possession:[1]	80.6	72.7	80.8	81.7	83.4
Heroin or cocaine and their derivatives	23.1	25.2	13.3	23.5	25.1
Marijuana	40.4	41.6	51.6	48.0	28.5
Synthetic or manufactured drugs	2.7	1.7	2.7	3.5	2.4
Other dangerous nonnarcotic drugs	14.4	4.2	13.1	6.6	27.4

[1] Because of rounding, the percentages may not add to total.

National Distributions

The Nation's law enforcement made an estimated 13.7 million arrests for criminal offenses (excluding traffic violations) during 2001. Approximately 2.2 million of the estimated arrests for 2001 involved Crime Index offenses, which accounted for 16.4 percent of total arrests. (See Table 29.) During 2001, there was an overall decrease of 2.1 percent from the number of arrests during the previous year. The total arrests for Index offenses reflected a small decrease from the prior year's total (-0.7 percent). Within the Crime Index, violent crime arrests increased slightly, 0.1 percent, and property crime arrests declined 1.0 percent. (See Table 36.)

The 5- and 10-year arrest trends indicated an 8.9-percent decrease from the 1997 arrest figure and a 0.5-percent increase from the 1992 number. (See Tables 32, 34, and 36.)

By Age, Sex, and Race

Nationally, adults made up 83.3 percent of the persons arrested in the United States during 2001. Approximately 45.9 percent of the total arrests nationwide involved persons under the age of 25, 31.4 percent were under the age of 21, and 16.7 percent of the total were under the age of 18. In terms of violent crime arrests, 44.2 percent of total arrestees were under 25 years of age, 29.0 percent were under 21 years of age, and 15.4 percent were under the age of 18. A review of arrests for property crimes indicated that 58.3 percent of arrestees were under 25 years of age, 46.7 percent were under 21 years of age, and 30.4 percent were under 18 years of age. (See Tables 38 and 41.)

Approximately 77.5 percent of arrestees nationwide were male. Males accounted for 82.7 percent of violent crime arrestees, and they comprised 69.6 percent of total arrestees for property crimes. Males were most often arrested for drug abuse violations, whereas females were most often arrested for larceny-theft. (See Table 42.)

By race, 69.5 percent of total arrestees during 2001 were white, 28.1 percent were

Table 29

Estimated Arrests
United States, 2001

Total[1, 2]	**13,699,254**	Embezzlement	20,157
		Stolen property; buying, receiving, possessing	121,972
Murder and nonnegligent manslaughter	13,653	Vandalism	270,645
Forcible rape	27,270	Weapons; carrying, possessing, etc.	165,896
Robbery	108,400	Prostitution and commercialized vice	80,854
Aggravated assault	477,809	Sex offenses (except forcible rape and prostitution)	91,828
Burglary	291,444	Drug abuse violations	1,586,902
Larceny-theft	1,160,821	Gambling	11,112
Motor vehicle theft	147,451	Offenses against the family and children	143,683
Arson	18,749	Driving under the influence	1,434,852
		Liquor laws	610,591
Violent crime[3]	627,132	Drunkenness	618,668
Property crime[4]	1,618,465	Disorderly conduct	621,394
Crime Index total[5]	2,245,597	Vagrancy	27,935
		All other offenses	3,618,164
Other assaults	1,315,807	Suspicion	3,955
Forgery and counterfeiting	113,741	Curfew and loitering law violations	142,889
Fraud	323,308	Runaways	133,259

[1] Does not include suspicion.
[2] Because of rounding, the figures may not add to total.
[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5] Includes arson.

black, and the remainder were of other races. Whites accounted for 60.2 percent of the total arrestees for violent crime and 66.0 percent of property crime arrestees. Whites were most frequently arrested for driving under the influence. Blacks were most often arrested for drug abuse violations. (See Table 43.)

Drug and Alcohol Offenses

Overall drug arrests reported for 2001 revealed a 1.4-percent decline from the 2000 figure. (See Table 36.) However, arrests for drug abuse violations have increased 40.3 percent since 1992, and juvenile arrests for these offenses have increased 121.3 percent since the 1992 report. (See Table 32.) During 2001, adults accounted for 87.2 percent of drug abuse arrests, and males accounted for 82.2 percent of the total. (See Tables 38 and 42.) Of all arrests for drug abuse violations, 40.4 percent were for possession of marijuana. Possession of heroin, cocaine, and their derivatives accounted for 23.1 percent of total drug arrests. (See Table 4.1.)

Arrests for drug- and alcohol-related offenses during 2001 accounted for an estimated 4.3 million arrests—31.0 percent of the total. Arrests for drug abuse violations were estimated at 1.6 million, and arrests for driving under the influence were estimated at 1.4 million. Approximately 610,591 arrests involved liquor law violations. Arrests for drunkenness were approximated at 618,668. (See Table 29.) Male offenders accounted for 82.4 percent of total arrests for drug and alcohol offenses during 2001. (See Table 42.)

Regional Offense Distributions and Rates

The U.S. is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

During 2001, the Northeast Region recorded an overall arrest rate of 4,014.1 per 100,000 inhabitants. The region reported an arrest rate per 100,000 people of 198.7 for violent crimes and 481.1 for property crimes. Arrest rates for individual violent crimes were measured at 3.2 murder arrests per 100,000 inhabitants, 9.6 forcible rape arrests, 45.4 robbery arrests, and 140.4 aggravated assault arrests per 100,000 inhabitants. In terms of property crimes, the rate of arrests for larceny-theft was measured at 357.8, the arrest rate for burglary was computed at 82.2, and the arrest rate for motor vehicle theft was calculated at 35.3 arrests per 100,000 in population. (See Table 30.)

The Midwest

The Midwest had a total arrest rate of 4,922.2 per 100,000 people in 2001. The regional arrest rate for violent crimes was calculated at 187.2 per 100,000; for property crimes the rate was 608.4 arrests for every 100,000 in population. Individually, the region's arrest rates for violent crime offenses were murder, 5.3; forcible rape, 11.0; robbery, 34.5; and aggravated assault, 136.4 arrests per 100,000 inhabitants. Concerning property crime arrest rates, larceny-theft arrests were computed at 460.8 per 100,000 population, burglary arrests were measured at 78.0 percent, and motor vehicle theft arrests were calculated at 64.0 arrests per 100,000 regional inhabitants. (See Table 30.)

The South

In the South, the most heavily populated region, the overall arrest rate for 2001 was recorded at 5,376.6 arrests per 100,000 in population. The violent crime arrest rate was measured at 202.1, and the property crime arrest rate was 604.4 per 100,000 inhabitants. A breakdown of the individual violent crimes showed that murder had a rate of 6.0 arrests per 100,000 population. Forcible rape arrests were measured at 9.7, robbery arrests at 38.0, and aggravated assault at 148.4 per 100,000 in population. A breakdown of the property crimes for the region showed the Southern States reported an arrest rate of 448.0 for larceny-theft, a rate of 108.9 for burglary, and a rate of 41.5 arrests per 100,000 for motor vehicle theft. (See Table 30.)

The West

In 2001, the Western Region recorded an overall arrest rate of 4,720.7 per 100,000 individuals. The violent crime arrest rate for the Western States was 289.1 per 100,000, and the property crime arrest rate was 602.4 per 100,000 regional inhabitants. Among the specific violent crime offenses, murder had an arrest rate of 4.5 per 100,000; forcible rape, 8.9; robbery, 41.5 arrests per 100,000; and aggravated assault, 234.2 arrests per 100,000 inhabitants. Within property crime arrest rates, the larceny-theft arrest rate was recorded at 399.0 per 100,000 individuals; the burglary arrest rate, 124.9; and the motor vehicle theft arrest rate, 70.2 arrests for every 100,000 in population. (See Table 30.)

In 2001, the Nation's smallest cities, those with fewer than 10,000 residents, reported the highest arrest rate, 6,308.4 for 100,000 inhabitants. Those communities also recorded a violent crime arrest rate of 179.0 and a property crime arrest rate of 618.8 per 100,000 in population. The Nation's largest cities, those with populations of more than 250,000, recorded an overall arrest rate of 5,812.0, a violent crime arrest rate of 359.0, and a property crime arrest rate of 758.8 per 100,000 inhabitants. Cities with populations ranging from 25,000 to 49,999 had the lowest overall arrest rate, 4,482.5 per 100,000 persons. The arrest rate for violent crimes in those cities was 188.0 and for property crimes, 632.6. (See Table 31.)

The Nation's rural counties recorded an overall arrest rate of 3,968.3, a violent crime arrest rate of 137.1, and a property crime arrest rate of 289.2 per 100,000 inhabitants. The overall arrest rate for suburban counties was 3,801.5, and this group reported a rate of 167.6 for violent crimes and 358.0 for property crimes per 100,000 in population. (See Table 31.)

Table 30

Number and Rate of Arrests

by Geographic Region, 2001

[Rate: Number of arrests per 100,000 inhabitants]

Offense charged	*United States total (9,511 agencies; population 192,580,262)*	*Northeast (2,329 agencies; population 35,529,176)*	*Midwest (1,950 agencies; population 34,920,523)*	*South (3,570 agencies; population 62,802,268)*	*West (1,662 agencies; population 59,328,295)*

---

[1] Includes only suburban county law enforcement agencies.

[2] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

[3] Does not include suspicion.

[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[5] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[6] Includes arson.

[7] Less than one-tenth of 1 percent.

---

[1] Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

[2] Does not include suspicion.

[3] Less than one-tenth of 1 percent.

[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[5] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[6] Includes arson.

---

[1] Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

[2] Because of rounding, the percentages may not add to total.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

---

[1] Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

[2] Because of rounding, the percentages may not add to total.

[3] Less than one-tenth of 1 percent.

[4] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[5] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[6] Includes arson.

---

[1] Includes all offenses except traffic and neglect cases.

[2] Because of rounding, the percentages may not add to total.

[3] Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

Table 69

Arrests

by State, 2001
[2001 estimated population]

---

[1] Does not include traffic arrests.

[2] Includes arson.

[3] Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4] Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[5] Drunkenness is not considered a crime in some states; therefore, the figures vary widely from state to state.

[6] See Arrest Data, Appendix I, for details.

[7] The arrest category, all other offenses, includes the arrest counts for the offenses of: offenses against the family and children, drunkenness, vagrancy, disorderly conduct, suspicion, and curfew and loitering law violations.

[8] Detroit arrest figures are not included in any arrest table; therefore, Michigan arrest totals are not comparable to previous years' data.

NOTE: Direct comparisons of arrest totals listed in this table made with prior years' issues should be made with caution as participation levels may vary. Additionally, some Part II offenses are not considered crimes in some states; therefore, figures may vary widely from state to state.

Embezzlement	Stolen property; buying, receiving, possessing	Vandalism	Weapons carrying, possessing, etc.	Prostitution and commercialized vice	Sex offenses (except forcible rape and prostitution)	Drug abuse violations	Gambling	Offenses against the family and children	Driving under the influence	Liquor laws	Drunkenness[5]	Disorderly conduct	Vagrancy	All other offenses (except traffic)	Suspicion	Curfew and loitering law violations	Runaways

SECTION V

Special Report

The Terrorist Attacks of September 11, 2001: A Compilation of Data

Like every other organization and individual in the United States, the FBI has struggled to comprehend the events of September 11, 2001. Apart from investigating the crime scenes in New York City (the World Trade Center); Somerset County, Pennsylvania; and Arlington County, Virginia (the Pentagon); following leads, and addressing a myriad of concerns resulting from these attacks, the FBI through its Uniform Crime Reporting (UCR) Program has struggled with how to report the data to the public. Begun in 1929, the UCR Program captures criminal offenses, which include murder and nonnegligent manslaughter, forcible rape, aggravated assault, robbery, burglary, larceny-theft, and motor vehicle theft, reported to local or state law enforcement agencies. In its original design, the creators of the Program probably could not conceive of heinous attacks of domestic or international terrorism being committed within the confines of this Nation. Theirs was a national crime data collection system based on the cooperation of city, county, and state law enforcement agencies voluntarily reporting crimes that were a product of the society of the time. However, that society has evolved into a more complex, global society of the twenty-first century that is faced with fighting crimes that previously had been unimaginable. The FBI recognizes that the UCR Program must evolve to be able to capture the crimes of this modern era. As it currently exists, the UCR Program is limited in its ability to report the offenses committed at the World Trade Center, in the airways above Pennsylvania, and at the Pentagon. Recognizing the limitations of the Program, yet also recognizing that many agencies and researchers will have a specific, nontraditional application for the statistical data associated with these offenses, the FBI has compiled this special report.

There will be disagreement and debate among academicians, governmental officials, law enforcement, the media, and the general public regarding the perspective from which one should view the events of September 11. Some will argue that they were an act of war; others will say they are a local crime, an international conspiracy, terrorism in its classical meaning, or a myriad of other possibilities. This special report does not attempt to join the debate nor bring any resolution to the disagreement; it merely presents the data within the limited context of UCR.

Methodology

This report uses a simple statistical approach to categorize (analyze) the victims and the offenders (terrorists) of this incident. The statistics are organized based on attributes such as age, gender, and race. It must be clearly understood that these attributes are used simply to describe those victims who were killed on September 11, 2001. Since the crimes were carried out indiscriminately to inflict the maximum pain on the greatest number of people, these attributes must not be seen as factors that have contributed to these incidents.

The statistics of September 11 are not a part of the traditional *Crime in the United States* publication because they are different from the day-to-day crimes committed in this country. Additionally, combining these statistics with our regular crime report would create many difficulties in defining and analyzing crime as we know it.

- Even though in many minds the deaths resulting from the September 11 attacks may not meet UCR's traditional definition of a criminal homicide, the UCR Program has classified those deaths for the purpose of presenting these data as murder and nonnegligent manslaughter.
- The murder count of September 11 is so high that combining it with the traditional crime statistics will have an outlier effect that skews all types of measurements in the Program's analysis. (An outlier is any extreme value, either large or small, that substantially deviates from the rest of the distribution.) However, because these tables reflect volume only, Table 8 contains the numbers of deaths in New York City, including those at the World Trade Center, and Table 10 contains the number of deaths in Somerset County, including those from the offense of September 11. These locations are appropriately footnoted.
- Data for the Pentagon will appear only in this report. To be published in Tables 8-11, Offenses Known to Law Enforcement, an agency must submit complete data for 12 months. For the Pentagon, the UCR Program has only one day of data—September 11, 2001.
- The Program does not collect occupation, and so it was unable to make a distinction and separately classify victim data for the deaths of the firefighters at the World Trade Center from the deaths of the civilians.

As explained in the introduction of this study, the limitations of the UCR Program were clearly realized in the wake of the September 11 tragedies. Like many agencies and programs, UCR is not equipped to fully capture the events of September 11 in its data collection and dissemination formats. For example, in addition to the deaths of over three thousand people, there are thousands more who were victimized that were not reported in other crime classifications such as aggravated assault. Because of the limitations of UCR summary reporting and the application of its guidelines, especially the Hierarchy Rule, agencies do not report and thus we are unable to collect and publish in this study any offense data except murder and nonnegligent manslaughter. The Hierarchy Rule requires reporting/counting only the highest offense in the Program's ordered crime listing (murder and nonnegligent manslaughter, forcible rape, aggravated assault, robbery, burglary, larceny-theft, and motor vehicle theft). However, the rule applies only to crime reporting and does not affect the number of charges for which the defendant(s) may be prosecuted in the courts. Finally, the age and gender breakdowns in the tables are consistent with standard UCR methodology.

Discussion of the Data

Victims

According to reports (current to the UCR's publication deadline), the number of victims from the World Trade Center, the Pentagon, and the Pennsylvania crash site totaled 3,047. The gender of 5 victims and the race of 139 victims were unknown. Males constituted 2,303 victims (75.6 percent) and females made up the remaining 739 (24.3 percent). (See Table 5.1.) Of the total victims, 2,435 (79.9 percent) were white, 286 (9.4 percent) were black, and 187 (6.1 percent) were of other races. (See Table 5.1.)

An analysis of all victims by gender and race showed that the highest percentage of all victims of the events of September 11 were white males (62.6 percent), followed by white females (17.3 percent), black males (5.6 percent), and black females (3.8 percent). In the race category other, 4.2 percent were males and 2.0 percent were females. Race was unknown for 4.6 percent of the victims.

---

[1] Includes 1 Asian or Pacific Islander victim.

[2] Because of rounding, the percentages may not add to total.

[3] Does not include unknown ages.

Further, a breakdown by race and gender shows that white males made up the majority of the victims at each of the three locations. The majority of black victims at the World Trade Center were male, but the majority of black victims at the Pentagon and the Pennsylvania crash sites were female. (See Table 5.1.)

Victims: Age, Gender, and Race

Nine victims of the events of September 11 were under the age of 18. Of this total, 5 were under 5 years old. All 5 of these juveniles were victims at the World Trade Center: 3 were male and 2 were female; 2 were white and 3 were of unknown race. The remaining 4 juvenile victims were at the Pentagon: a white female aged 5 to 8; 2 black males and 1 black female aged 9 to 12. (See Tables 5.2–5.4.)

The vast majority, 98.6 percent (3,004), of all the victims where age was known were over age 18. The modal age category for all victims was 35 to 39. However, when broken down by gender, the female victims were slightly younger. The modal age category for females was 30 to 34. The modal age category by race was again 35 to 39, excluding the other race category, which had a slightly younger modal age category of 30 to 34. (See Table 5.2.)

The same general statistics for age remain true for the victims at the World Trade Center, mainly because they constitute the majority of the victims—92.6 percent (2,823). (See Table 5.3.) For the Pentagon, the modal age category is again 35 to 39. However, the most frequent age category for females was 45 to 49, reflecting a slightly older set of victims at the Pentagon. (See Table 5.4.) The most frequent age category of the Pennsylvania crash site was 35 to 39. (See Table 5.5.)

Offenders: Age, Gender, and Race

Nineteen offenders were directly involved in the events of September 11—10 at the World Trade Center, 5 at the Pentagon, and 4 in Pennsylvania. All the offenders were white males. Four of the 19 were under the age of 22. Twelve of the offenders were aged 20 to 24, and the remaining 7 were aged 25 to 34. The oldest offender (aged 30 to 34) was involved with the events at the World Trade Center. (See Table 5.6.)

Table 5.6

Murder Offenders of 9/11/2001 Terrorist Attacks

[1] All offenders are white males.
[2] Because of rounding, the percentages may not add to total.

Law Enforcement Officers Killed in the Line of Duty

The UCR Program through its Law Enforcement Officers Killed and Assaulted Program separately collects information on law enforcement officers killed and assaulted in the line of duty. The 71 law enforcement officers killed in the line of duty as a result of the attacks on the World Trade Center include 37 officers with the Port Authority of New York and New Jersey Police Department, 23 with the New York Police Department, 5 with the New York Office of Tax Enforcement, 3 with the State of New York Unified Court System, 1 fire marshal with the New York City Fire Department, 1 agent with the U. S. Secret Service, and 1 agent with the FBI. One refuge law enforcement officer with the U. S. Fish and Wildlife Service was killed in the crash in Somerset County, Pennsylvania. These data are included in the tables of this study. A more complete breakdown of these data appears in *Law Enforcement Officers Killed and Assaulted 2001.*

Summary and Conclusion

It is important to note that data for this publication were provided by law enforcement agencies. The 3,047 victims were those for whom law enforcement agencies involved in these incidents were able to supply supplemental homicide data, identifying age, gender, and race information on 2,303 males and 739 females. Of the total victims, the Pentagon was unable to provide supplemental homicide reports on 5. Readers of this report are cautioned not to confuse identifying a victim's age, gender, and race with being able to identify an individual through fingerprints, dental records, or DNA. It may be months or years before some victims of this tragedy will be positively identified. Again, the purpose of this special report is to provide statistical data to those who for their specific reasons will find these numbers useful. Finally, for reasons stated earlier, readers are cautioned about combining these data with the other statistics presented in the book to perform any meaningful analyses.

Injuries from Violent Crime, 2000: A Study Using NIBRS Data

Introduction

An important tool for law enforcement in the war against crime is the ability to analyze and understand when and where crime takes place, what form it takes, and the characteristics of its victims and offenders. Armed with such information, law enforcement can support its case to acquire the resources it needs to fight crime. As a result, short-term and long-term strategies can be developed to chart the ways and means of combating both domestic and international enterprises of criminal activities. One major goal of the Uniform Crime Reporting (UCR) Program is to generate a reliable set of criminal statistics in order to depict a nationwide view of crime in America based on the data voluntarily submitted by local and state law enforcement agencies.

Since 1930, the UCR Program has remained virtually unchanged in its method of reporting the steadily increasing diversity and complexity of crime. In order to fulfill the need for more comprehensive crime data to meet the demands of modern society, the National Incident-Based Reporting System (NIBRS) was developed.

The strength of NIBRS is the emphasis on criminal incidents, which permits analysis of the relationships between and among victim, offender, and offense. For example, NIBRS provides information about the age, sex, and race of the victim(s) and offender(s) of each crime category, characteristics available only for the offense of murder under the traditional UCR Summary Reporting System. Obviously, the NIBRS data provide rich and detailed information about the incidence of crime and its victims and offenders. The highly disaggregated NIBRS data allow users to extract specific information about crime and its dynamics. Consequently, the quality, breadth, and depth of the information derived from NIBRS is far superior to that provided by the summary system. Although NIBRS data are not yet nationally representative, this report demonstrates their potential by assessing the severity of personal injury resulting from violent crimes.

Objectives

The objective of this research is to demonstrate the versatility of these data by analyzing the injuries associated with violent crime, using the classifications *major*, *minor*, and *none*. The specific objectives of the study are to present and discuss the number of victims by injury type and (1) selected offense; (2) location; (3) weapon type; (4) victim age, sex, and race; (5) relationship of victim to offender; and (6) offender age, sex, and race.

Methodology

Offenses in NIBRS are classified as *crimes against persons, property, or society*. Incidents can involve more than one offense, victim, or offender. For crime counting purposes, one offense is counted for each victim of *crimes against persons*, and one offense is counted for each distinct incident of *crimes against property* and *crimes against society*, regardless of the number of victims. All violent crimes involve force or threat of force. Since the primary objective of this research was to examine the injuries associated with violent crime, the offenses considered in this research were kidnaping/abduction, forcible sex offenses (forcible rape, forcible sodomy, sexual assault with an object, and forcible fondling), aggra-

Table 5.7

Number of Victims
by Selected Offense and Injury Type, 2000

		Injury		
Selected Offenses	*Total*[1]	*Major*	*Minor*	*None*
Kidnaping/abduction	6,905	391	1,778	4,736
Forcible rape	13,856	867	3,215	9,774
Forcible sodomy	3,562	180	508	2,874
Sexual assault with an object	2,347	98	405	1,844
Forcible fondling	17,365	234	1,524	15,607
Aggravated assault	117,507	28,155	39,123	50,229
Robbery	34,915	2,414	7,486	25,015

[1] Victims of more than one offense within an incident are counted within each appropriate offense category.

vated assault, and robbery. (The violent offense of murder was excluded from this list because the victims of murder suffer the ultimate injury—death. Although the violent crime of robbery is classified as a crime against *property,* it was included in this study because it involves force or threat of force to the victim(s) even though its objective is to obtain money or property.

The injury classifications in this study were limited to major, minor, and none. Injuries included under *major* are apparent broken bones, possible internal injuries, severe lacerations, loss of teeth, unconsciousness, or other major injury. Apparent *minor* injury and *none* were listed as separate categories. Injuries as related to the characteristics of the offense; location; weapon type; the age, sex and race of the victim(s); the relationship of the victim to the offender; and the age, sex, and race of the offender(s) were examined in detail in this report.

Table 5.8

Number of Victims
by Location and Injury Type, 2000

Other/unknown	11,834	1,961	3,079	6,794

[1] If a victim suffers more than one offense at the same location during the same incident, the victim is counted once within that location. If a victim suffers more than one offense at different locations during the same incident, the victim is counted within each appropriate location.

Although the statistics shown are an accurate depiction of reports from those law enforcement agencies participating in NIBRS data collection, they may not be representative nationally. However, as more law enforcement agencies provide data in the NIBRS format, the data will lend themselves to more in-depth national analysis.

Discussion of the Data

Criminal incidents reported to the FBI's UCR Program through NIBRS in 2000 involving one or more of the selected violent crime offenses were extracted from the complete NIBRS data set to become the focus of analysis for this report. The 2000 file included data from 3,157 law enforcement agencies in 19 states. These agencies jointly covered a population of 43.7 million or 16 percent of the Nation's inhabitants. The analysis of the characteristics of violent crime incidents was limited to the 2000 NIBRS data.

In NIBRS, data are collected on each single incident and arrest within 22 crime categories comprised of 46 specific crimes (Group A offenses). For each offense known to police within these categories, incident, victim, property, offender, and arrestee information are gathered when available. In addition to Group A offenses, there are 11 Group B offense categories for which arrests are reported. As opposed to the traditional UCR Summary Reporting System, NIBRS is incident-based; therefore, opportunities exist for the reporting of the complete description of the multiple characteristics within an incident. The major difference between the Summary Reporting System and NIBRS is the degree of detail in reporting. For this study, the analysis of these factors is limited to the 2000 NIBRS data.

During the year 2000, 3,157 agencies submitted a total of 2,672,924 Group A incident reports to the FBI. These reports contained information on 2,974,962 offenses, 2,887,983 victims, and 2,071,229 known offenders. Known means at least one characteristic (age, sex, or race) of the offender was reported. At least one of the selected violent crimes was involved in 6 percent of the incidents.

Table 5.9

Number of Victims
by Weapon and Injury Type, 2000

Weapon Type	*Total*[1]	*Injury*		
		Major	*Minor*	*None*
Firearm(s)[2]	36,265	3,599	4,027	28,639
Dangerous weapons[3] (knives, clubs, etc.)	62,413	14,023	20,830	27,560
Personal weapons[4] (hands, fists, feet, etc.)	59,703	9,709	20,087	29,907
Firearms with dangerous and/or personal weapons[5]	2,852	452	824	1,576
Other weapon combinations[6]	7,334	2,149	3,120	2,065
Unknown	7,998	1,272	1,749	4,977
None	17,612	827	2,701	14,084

[1] If a victim suffers more than one offense with the same weapon type, the victim is counted once within that weapon type. If the victim suffers more than one offense with different weapon types, the victim is counted within each appropriate weapon type.

[2] Includes offenses committed with one or more firearm(s) but no other weapon type.

[3] Includes offenses committed with one or more dangerous weapon(s) but no other weapon type.

[4] Includes offenses committed with personal weapons and no other weapon type.

[5] Includes offenses committed with firearms and any other weapon type.

[6] Includes offenses committed with any weapon combination excluding firearm(s).

Even though criminal incidents can involve more than one offense, victim, or offender, most involve a single offense, victim, or offender. Sixty-four percent of the 2,672,924 crime incidents involved only one individual (person) victim, 92.1 percent involved a single offense, and 56.1 percent a single offender.

Selected Offenses

Among the offenses considered in this report, aggravated assault was the violent crime accounting for the most victims (117,507). This offense also showed the highest percentage of victim injury. Over 57 percent of the aggravated assault victims were reported to have suffered injury, 24.0 percent major and 33.3 percent minor. In terms of percentages, kidnaping/abduction was the offense next most likely to result in injury. The 6,905 victims of kidnaping/abduction suffered personal injury 31.4 percent of the time: 5.7 percent major and 25.7 percent minor. Victims of forcible sex offenses most frequently suffered no personal injury. Most victims of a forcible sex offense suffered forcible fondling (17,365), but victims of this offense were least likely to suffer an injury (10.1 percent). Forcible rape followed in number of victims (13,856) and resulted in the highest percentage of injuries among the forcible sex offenses, 29.5 percent. Of the 34,915 victims of robbery, 71.6 percent reportedly suffered no injury; 21.4 percent suffered minor injury and 6.9 percent, major injury. Because persons can be victims of more than one offense in a criminal incident, they were included in the counts for each relevant offense. Thus, the number of victims in Table 5.7 is correct for each offense category but cannot be summed to a total of persons victimized.

Location

Victims of violent crimes (kidnaping/abduction, forcible rape, forcible sodomy, sexual assault with an object, forcible fondling, aggravated assault and/or robbery) in bars and nightclubs were more likely to suffer major injury than minor ones or none. Bar/nightclub was the only location where victims of major injury (39.4 percent) outnumbered those experiencing minor injury or none. The location with the highest number of victims (97,589) was residence/home, having 2.6 times as many victims as highway/road/alley, the next most frequent location. Of persons victimized in residences, 45.3 percent were injured (16.1 percent major and 29.3 percent minor). Violent offenses resulted in injury to 44.5 percent (17.6 percent major and 26.9 percent minor) of those victimized on highways/roads/alleys. In a single criminal incident, a person can be victimized in more than one location. In Table 5.8, the victims were included in the counts for each appropriate location. Thus, the number of victims is correct for each location but cannot be summed to a total of persons victimized.

Weapons

An examination of victims by type of weapon and type of injury showed that persons attacked with dangerous weapons (knives, clubs, etc.) as well as those attacked with personal weapons (hands, fists, feet, etc.) outnumbered those who had firearms used against them. Twenty-one percent of the victims who had firearms used against them, 55.8 percent of the victims attacked with other dangerous weapons (knives, clubs, etc.), and 49.9 percent of the victims attacked with personal weapons (hands, fists, and feet, etc.) were injured. Considering severity of injury for these three weapons categories, one finds that 22.5 percent of the victims of the dangerous weapons classification, 16.3 percent of those attacked with personal weapons, and 9.9 percent of those against whom firearms were used suffered major injuries. Victims can suffer more than one offense with different weapon types within one criminal incident. They are, therefore, accounted for in each appropriate weapon category in Table 5.9.

Victim Characteristics

Of the 193,801 victims of violent crime considered in this report, 16.5 percent experienced major injury; 27.5 percent, minor injury; and 56.1 percent, no injury. When looking at the data by age, one finds that persons under the age of 18 accounted for 25.8 percent of all victims and 13.9 percent of all persons suffering major injury. Persons aged 18 through 45 accounted for 61.3 percent of the victims and 73.5 percent of the major injuries. In the 26- through 45-year-old age group, victims experiencing injury outnumbered those experiencing no injury.

Table 5.10

Number of Victims

by Victim Age, Sex, Race, and Injury Type, 2000

Victim Characteristics	*Total*	*Injury* *Major*	*Minor*	*None*
Victim Age				
Total	**193,801**	**31,966**	**53,206**	**108,629**
Infant (under 1)	373	127	51	195
1 to 9	13,676	823	2,271	10,582
10 to 12	8,055	485	1,570	6,000
13 to 17	27,884	2,997	6,595	18,292
18 to 21	27,576	4,984	7,911	14,681
22 to 25	20,880	4,137	6,270	10,473
26 to 35	39,767	7,866	12,316	19,585
36 to 45	30,637	6,495	9,547	14,595
46 to 55	12,317	2,353	3,438	6,526
56 to 65	3,909	598	1,044	2,267
Over 65	2,964	438	759	1,767
Unknown age	5,763	663	1,434	3,666
Victim Sex				
Total	**193,801**	**31,966**	**53,206**	**108,629**
Male	98,817	21,494	27,190	50,133
Female	93,889	10,350	25,848	57,691
Unknown sex	1,095	122	168	805
Victim Race				
Total	**193,801**	**31,966**	**53,206**	**108,629**
White	127,708	18,724	35,745	73,239
Black	57,877	12,305	15,271	30,301
American Indian/Alaskan Native	614	138	167	309
Asian/Pacific Islander	1,368	201	316	851
Unknown race	6,234	598	1,707	3,929

Examining the data by gender, one finds that more males (51.0 percent) than females (48.4 percent) were victims of violent crime. Of the male victims, 49.3 percent were injured, and for females, 38.6 percent were injured. Males accounted for over two-thirds of the victims suffering major injury.

An examination of the data by race showed that whites accounted for 58.6 percent of the victims suffering major injury and blacks accounted for 38.5 percent. However, within each racial cohort, the data showed that 21.3 percent of black victims and 14.7 percent of white victims suffered major injury. Conversely, 28.0 percent of white victims and 26.4 percent of black victims suffered minor injury. Combined, the Asian/Pacific Islander and American Indian/Alaskan Native race categories accounted for 1.0 percent of the total victims. No racial group had higher percentages for injury than for no injury. (In the above discussion of victim age, gender, and race, the percentages were calculated from data in Table 5.10 and include the unknowns in each category.)

Relationships

In NIBRS when an offender perpetrates a crime against person or a robbery against the victim, the relationship of the victim to the offender is recorded, unless nothing is known about the offender. In incidents where victims knew or were related to one or all of their assailants, about half (46.3 to 56.4 percent) of the victims were injured. In instances where the offender was a stranger, 34.8 percent of the victims were injured. (See Table 5.11.)

Offender Characteristics

Persons can be victimized by more than one offender in a single incident. Because of this multiplicity, it is possible for victims to be counted differently in separate portions of Table 5.12. The offenders in a multiple-offender incident could be in different age, sex, or racial

Table 5.11

Percent Distribution of Victims
by Relationship of the Victim to the Offender and Injury Type, 2000

		Injury		
Relationship of Victim to Offender[1]	*Total*[2]	*Major*	*Minor*	*None*
Family only[3]	100.0	15.2	31.1	53.7
Family and other offenders[4]	100.0	24.4	26.1	49.5
Known offenders only[5]	100.0	17.6	29.1	53.2
Known offenders and strangers[6]	100.0	23.3	33.1	43.6
Stranger(s) only[7]	100.0	13.4	21.4	65.2
All other[8]	100.0	17.2	24.6	58.3

[1] Does not include the victims in incidents where nothing is known about the offender.
[2] Because of rounding, percentages may not add to total.
[3] Regardless of number, all offenders are related to victim.
[4] At least one offender was related to victim.
[5] Regardless of number, victim was acquainted with all.
[6] At least one offender was known to victim. No offenders were related to victims.
[7] Regardless of number, all offenders were strangers to victims.
[8] Regardless of number, offenders were mutual combatants (victim was offender) or unknown.

groups; therefore, a victim could be counted more than once in any portion of Table 5.12. (See footnote for example.) In addition, information about offenders is frequently incomplete, especially in connection with incidents that have not been cleared. Table 5.12 shows all offender data as reported; that is, any one or a combination of characteristics (age, sex, or race) may have been reported.

The percentages of injury and no injury to persons victimized varied somewhat when viewed by a breakdown of offender age. The percentages of victims suffering no injury ranged from 51.9 when the offender was aged 26 through 35 and aged 36 through 45 to 70.5 when the offender was a juvenile aged 10 through 12. The variance was less when one looks at offender gender. Nearly half (46.0 percent) of the victims of females escaped injury, as did 57.8 percent of those victimized by males. An examination of the race of the offenders showed the percentage of no injury was more than 50 percent for victims in all categories except American Indian/Alaskan Native. Persons victimized by offenders of this racial group accounted for the smallest number of violent crime victims. (See Table 5.12.)

Summary and Conclusion

The findings from this study showed that most of the time, victims of violent crime (excluding murder) reportedly suffer minor or no injuries. Major injuries to victims were reportedly inflicted least often. When compared with victims of other offenses, victims of aggravated assault suffered major injuries most often. Overall, most victims suffered a violent crime at the location of residence/home. The weapon data revealed that of firearms, personal weapons, and dangerous weapons, the weapons used to inflict major injury on most victims were dangerous weapons such as knives, clubs, etc. A breakdown of age groups showed that infants and victims aged 36 to 45 had the highest percentages of major injury. The data concerning victim gender revealed that males most often suffered major injury. Within each racial cohort, American Indian/Alaskan Native was the race of victims most often experiencing a major injury, followed by blacks. More victims were injured by relatives or acquaintances than by strangers. In terms of known offenders, most victims had major injuries inflicted upon them by someone in the age group 22 to 25. More victims were injured by males than by females.

It must be remembered that the general conclusions drawn from this analysis are limited to the jurisdictions participating in NIBRS. However, the report demonstrates that the NIBRS data can be used effectively for analyzing many factors of violent crime by providing richer and more detailed information about the incidence of crime and its victims, offenses, and offenders than the traditional summary UCR data collection system. Although the operation of NIBRS is limited to those data received from 19 states, the data are considered sufficiently comprehensive for the purpose of demonstrating the utility of NIBRS. As NIBRS participation grows throughout the law enforcement community, so will the utility of the data and the ability to do complex analysis on a wide array of criminal justice issues. That ability will bring with it an understanding of crime never before possible. The information obtained from these types of analyses may provide a significant strategic advantage in designing a long-term crime fighting scheme. It will also help the public to understand the dynamics of crime not only nationally, but regionally and locally as well.

Table 5.12

Number of Victims

by Offender Age, Sex, Race, and Injury Type, 2000

Offender Sex				
Male	152,539	24,309	40,086	88,144
Female	31,571	5,929	11,120	14,522
Unknown sex	6,236	1,437	1,460	3,339
Offender Race				
White	99,506	14,716	28,497	56,293
Black	72,971	13,624	19,017	40,330
American Indian/Alaskan Native	694	154	213	327
Asian/Pacific Islander	1,010	176	280	554
Unknown race	11,588	2,101	2,888	6,599

Note: All counts relate to victims and the known characteristics (age, sex, race) of their assailants. Because of offender multiplicity, victims may be counted in one or more categories. For example, a person victimized by two 15 year olds, one male and one female, would be scored once in the age portion of the table, but twice in the sex portion. The objective of the table is to show the severity of injury inflicted by offender characteristic.

SECTION VI

Law Enforcement Personnel

The requirements for law enforcement service vary greatly from one locale to another based upon each jurisdiction's unique demographic traits and characteristics. A small community situated between two large cities, for example, may require a greater number of law enforcement personnel than a community of the same size that has no urban center nearby. Similarly, the needs of a community having a highly mobile or seasonal population may be very different from those of a city with a relatively stable population. A community that incorporates legal gambling establishments will have different law enforcement challenges than one in which the presence of a large military base is the dominant influence, just as a small college town will have different needs than one comprised predominantly of retirees.

The functions of law enforcement are also significantly diverse throughout the Nation. The responsibilities of state police and highway patrol agencies vary considerably from one jurisdiction to another. Their duties range from traffic enforcement on state highways and interstate roadways to major investigative responsibilities for all violent crimes committed statewide. In certain areas, sheriffs' responsibilities are limited exclusively to civil functions, sole enforcement for state and local courts and/or the administration of the county jail facilities. In others, the sheriffs may be the only law enforcement presence in remote locations covering large geographical zones. Nationally, the overall role of law enforcement continues to be expanded and redefined in light of the constant threat from international and domestic terrorism. When attempting any comparison of law enforcement employee rates, the data user must consider these differing service requirements and responsibilities.

The data presented in the following tables represent national, regional, and state averages; they should be viewed as guides or indicators, not as recommended or preferred police staffing levels. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

This edition of *Crime in the United States* contains a new table, Law Enforcement Employees as of October 31, 2001, by Other Agencies by State. Table 82 supplies employee data for 171 law enforcement agencies charged with serving a broad range of specific organizations/entities. These county and state agencies serve the Nation's transit systems, parks and forests, tribal reservations, hospitals, and school districts (including educational institutions not categorized as colleges or universities). Drug and narcotics units and task forces are included in Table 82, along with county detectives and prosecutorial law enforcement staff. Collectively, 26.9 percent of the agencies listed serve some form of mass transit (airports, seaports, railways) and 25.7 percent are associated with schools or school districts. The majority of these agencies have concurrent jurisdiction with local law enforcement; therefore, no population is assigned to them.

Law Enforcement Rate

A national average of 2.5 full-time officers were employed for every 1,000 inhabitants in the United States as of October 31, 2001. Including full-time civilian employees, the overall law enforcement rate was 3.5 per 1,000 inhabitants. (Based on Table 74). The 13,530 city, county, and state police agencies reporting in 2001 collectively employed 659,104 officers and 279,926 civilian employees and provided law enforcement service to approximately 268 million of the Nation's inhabitants. (See Table 74.) A listing of reported full-time law enforcement officers and civilian employees by state is provided in Table 77.

The Nation's cities collectively reported an average of 3.1 law enforcement employees per 1,000 inhabitants. Cities with populations of 1 million and over had the highest rate with 4.7 employees per 1,000. Suburban and rural counties had rates of 4.4 and 4.2 employees per 1,000 population, respectively. (Based on Table 74.)

Regionally, the city law enforcement employee rate was 3.6 per 1,000 inhabitants in the Northeast, 3.5 in the South, 2.8 in the Midwest, and 2.4 in the West. (See Table 70.)

Sworn Personnel

The national rate for all cities, based solely on sworn law enforcement personnel (excluding civilians), was 2.4 officers per 1,000 inhabitants. By city population grouping, the rates ranged from 3.5 officers per 1,000 inhabitants for cities with populations of 1 million and over to 1.8 in cities with 25,000 to 99,999 inhabitants. Suburban and rural counties had rates of 2.7 and 2.5 officers per 1,000 in population, respectively. (Based on Table 74.) By region, cities in the North had the highest rate of sworn officers to population, 2.8 per 1,000 followed by cities in the South with 2.7, the Midwest cities with 2.2, and the West with 1.7 officers per 1,000 inhabitants. (See Table 71.)

Both nationally and in cities, males made up 88.8 percent of all sworn officers. Males accounted for 91.9 percent of sworn officers in rural counties and 87.1 percent in suburban counties. (See Table 74.)

Table 79 provides a listing of reported full-time law enforcement officers and civilian employees by university and college for each state. In 2001, 602 participating agencies provided law enforcement services on college and university campuses. Sworn officers comprised 65.8 percent of the staff in agencies that submitted employment data.

Civilian Employees

Of the total law enforcement employee force in the United States in 2001, civilians constituted 29.8 percent. In cities, civilians represented 23.2 percent of the police employees and made up 39.3 percent of the staff in both suburban and rural counties. (See Table 75.) Of all civilian employees, 62.7 percent were female. (See Table 74.)

Law Enforcement Officers Killed and Assaulted

Seventy law enforcement officers were feloniously slain in the line of duty in 2001, 19 more than in the previous year. An additional 78 officers were accidentally killed during the performance of their official duties in 2001—7.1 percent less than the 2000 total of 84 officers accidentally killed.

Extensive data on line-of-duty deaths and assaults on city, county, state, and federal officers can be found in the Uniform Crime Reports publication, *Law Enforcement Officers Killed and Assaulted.*

---

[1] The number of agencies used to compile these figures differs from the other Law Enforcement Officer tables because agencies with no resident population are excluded from this table. These agencies include those associated with universities and colleges (see Table 79) and other agencies (see Table 82), as well as some state agencies that have concurrent jurisdiction with other local law enforcement.

[2] Because of rounding, the percentages may not add to totals.

[1] Data reported are the number of law enforcement employees for the state of New Jersey.

[2] Due to the events of September 11, 2001, data for this table are not available.

Note: Caution should be used when comparing data from one state to that of another. The responsibilities of the various state police, highway patrol, and department of public safety agencies range from full law enforcement duties to only traffic patrol, which can impact both level of employment for agencies as well as the ratio of sworn officers to civilians employed. Any valid comparison must take these factors and the other identified crime factors (see page iv) into consideration.

Table 77

SECTION VII

APPENDIX I – Methodology

Uniform Crime Reporting (UCR) Program contributors forward crime data to the FBI either directly from local law enforcement agencies or through state UCR Programs in 46 states and the District of Columbia. The FBI provides continuing guidance and support to individual contributing agencies in those states that do not have a state Program.

State UCR Programs are very effective liaisons between local contributors and the FBI. Many of the Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these state agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the implementation of state crime reporting Programs, the national UCR Program ceased direct collection of data from individual law enforcement agencies within those states. Currently, the state data collection agency forwards information it receives from local agencies to the national Program.

The criteria established for state Programs ensure consistency and comparability in the data submitted to the national Program, as well as regular and timely reporting. These criteria are: (1) The state Program must conform to national UCR Program standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and demonstrate acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national UCR Program. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in recordkeeping practices and crime-reporting procedures. (5) The state agency must furnish the FBI with all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet deadlines established for publication of the national Uniform Crime Reports.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality. National UCR Program staff have direct contact with individual contributors within the state as necessary in connection with crime reporting matters, coordinating such contact with the state agency. On request, staff members conduct training programs within the state on law enforcement recordkeeping and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index (Part I) offenses brought to their attention each month. Specifically, the Index crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. Agencies report to the FBI the number of actual offenses known regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are cleared in one of two ways: (1) by arrest of at least one person, who is charged and turned over to the court for prosecution, or (2) by exceptional means when some element beyond law enforcement control precludes the arrest of a known offender. Law enforcement agencies also report the number of Index crime clearances that involve only offenders under the age of 18, the value of property stolen and recovered in connection with the offenses, and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection of Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Monthly data are also collected on law enforcement officers killed or assaulted. The number of full-time sworn and civilian personnel are reported as of October 31 of each year.

At the end of each quarter, summary information is collected on hate crimes, i.e., specific offenses that were motivated by an offender's bias against the race, religion, ethnic origin, sexual orientation, or physical or mental disability of the victim. Hate crime data from those agencies participating in the National Incident-Based Reporting System (NIBRS) are submitted monthly.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime count, UCR staff compare monthly reports with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program, and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease becomes the subject of a special inquiry. Changes in crime reporting procedures or annexations can influence the level of reported crime. When this occurs, the figures for specific crime categories or totals, if necessary, are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials on crime reporting procedures. Throughout the country, the national UCR Program maintains liaison with state Programs and law enforcement personnel and holds training sessions to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and its remedial efforts are unsuccessful, personnel from the FBI's Criminal Justice Information Services Division may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook,* which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Because a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records.*

To enhance communication among Program participants, letters to UCR contributors and UCR *State Program Bulletins* are produced as needed. These provide policy updates and new information, as well as clarification of reporting issues.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the accuracy of the statistics depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards, which cannot be resolved by the national UCR Program, may be brought to the attention of the Criminal Justice

Information Systems Committees of the International Association of Chiefs of Police and the National Sheriffs' Association.

Arrest Data

Florida state arrest data are not included in Tables 30–68. Limited arrest data were received from Illinois, Kansas, Kentucky, Montana, South Carolina, South Dakota, and Wisconsin. No 2001 arrest data were received from the District of Columbia. Complete 12-month arrest figures for New York City were not available for inclusion in this book. Arrest totals for these areas, however, were estimated for inclusion in Table 29, "Estimated Arrests, United States, 2001."

Population

Prior to preparation of 2001 Uniform Crime Reporting (UCR) Program population estimates, 2000 Bureau of the Census (BOC) decennial data were incorporated into the UCR master file and adjustments for over or under estimation of 2000 UCR population estimates were performed. In this edition, the state and national population figures are BOC 2001 state and national provisional estimates. Population figures for individual jurisdictions were updated by applying 2001 state growth rates to 2000 BOC city/county decennial data to obtain 2001 city/county population estimates. The state growth rates were calculated using 2000 resident population counts and 2001 BOC state provisional estimates. The estimate of the U.S. population showed a 1.2-percent increase from 2000 to 2001.

NIBRS Conversion

Several states provide their UCR data in the expanded NIBRS format. For presentation in this book, NIBRS data were converted to the historical summary UCR formats. The NIBRS database was constructed to allow for such conversion so that UCR's long-running time series could continue.

Crime Trends

By showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in making any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. For example, upon receiving 1995 aggravated assault figures for the state of Kentucky, it was determined the 1994 aggravated assault figures previously submitted were not valid; therefore, the Kentucky aggravated assault figures were not included in Tables 12 through 15 of the 1995 edition. The 1994 estimates in certain offense categories were updated for Delaware, Kansas, and Kentucky. In addition, Montana figures for 1995 were updated to show the actual offense data which were received after publication of *Crime in the United States, 1995*. These updates appear in the national trends.

Offense Estimation

Tables 1 through 5 and 7 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies. The size of agency; type of jurisdiction, e.g., police department versus sheriff's office; and geographic location are considered in the estimation process.

Due to the efforts to convert to NIBRS in recent years, it has become necessary to estimate totals for some states. The inability of some state UCR Programs to provide forcible rape figures in accordance with UCR guidelines and other problems at the state level have also required unique estimation procedures. A summary of state-specific and offense-specific estimation procedures follows.

Year	State(s)	Reason for Estimation	Estimation Method
1985	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
1986	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
1987	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
1988	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
	Florida, Kentucky	Reporting problems at the state level resulted in no usable data.	State totals were estimated by updating previous valid annual totals for individual jurisdictions, subdivided by population group. Percent changes for each offense within each population group of the geographic divisions in which the states reside were applied to the previous valid annual totals. The state totals were compiled from the sums of the population group estimates.
1989	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
1990	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
1991	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
	Iowa	NIBRS conversion efforts resulted in estimation for Iowa.	State totals were estimated by updating previous valid annual totals for individual jurisdictions, subdivided by population group. Percent changes for each offense within each population group of the geographic divisions in which the states reside were applied to the previous valid annual totals. The state totals were compiled from the sums of the population group estimates.
1992	Illinois	The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
1993	Michigan, Minnesota	The state UCR Programs were unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to each state.
	Kansas	NIBRS conversion efforts resulted in estimation for Kansas.	Kansas totals were estimated by updating previous valid annual totals for individual jurisdictions, subdivided by population group. Percent changes for each offense within each population group of the West North Central Division were applied to the previous valid annual totals. The state totals were compiled from the sums of the population group estimates.
	Illinois	NIBRS conversion efforts resulted in estimation for Illinois.	Since valid annual totals were available for approximately 60 Illinois agencies, those counts were maintained. The counts for the remaining jurisdictions were replaced with the most recent valid annual totals or were generated using standard estimation procedures. The results of all sources were then combined to arrive at the 1993 state total for Illinois.
		The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
1994	Illinois	NIBRS conversion efforts resulted in estimation for Illinois.	Illinois state totals were generated using only the valid crime rates for the East North Central Division. Within each population group, the state's offense totals were estimated based on the rate per 100,000 inhabitants within the remainder of the division.

Year	State(s)	Reason for Estimation	Estimation Method
		The state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	The rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to the state.
	Kansas	NIBRS conversion efforts resulted in estimation for Kansas.	Kansas state totals were generated using only the valid crime rates for the West North Central Division. Within each population group, the state's offense totals were estimated based on the rate per 100,000 inhabitants within the remainder of the division.
	Montana	The state UCR Program was unable to provide complete 1994 offense figures in accordance with UCR guidelines.	Montana totals were estimated by updating previous valid annual totals for individual jurisdictions, subdivided by population group. Percent changes for each offense within each population group of the Mountain Division were applied to the previous valid annual totals. The state totals were compiled from the sums of the population group estimates.
1995	Kansas	The state UCR Program was unable to provide complete 1995 offense figures in accordance with UCR guidelines.	The Kansas State UCR Program was able to provide valid 1994 state totals which were then updated using 1995 crime trends for the West North Central Division.
	Illinois	The state UCR Program was unable to provide complete 1995 offense figures in accordance with UCR guidelines.	Valid Crime Index counts were available for most of the largest cities. For other agencies, the only available counts were generated without application of the UCR Hierarchy Rule. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the total supplied by the Illinois State Program (which was inflated because of the nonapplication of the Hierarchy Rule) was reduced by the proportion of multiple offenses reported within single incidents in the available NIBRS data. Valid totals for the large cities were excluded from the reduction process.
	Montana	The state UCR Program was unable to provide complete 1995 offense figures in accordance with UCR guidelines.	Montana state estimates were computed by updating the previous valid annual totals using the 1994 versus 1995 percent changes for the Mountain States.
1996	Florida	The state UCR Program was unable to provide complete 1996 offense figures in accordance with UCR guidelines.	The state UCR Program was able to provide an aggregated state total; data received from 94 individual Florida agencies are shown in the 1996 jurisdictional figures presented in Tables 8 through 11.
	Illinois	The state UCR Program was unable to provide complete 1996 offense figures in accordance with UCR guidelines.	Valid Crime Index counts were available for most of the largest cities. For other agencies, the only available counts were generated without application of the UCR Hierarchy Rule. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the total supplied by the Illinois State Program (which was inflated because of the nonapplication of the Hierarchy Rule) was reduced by the proportion of multiple offenses reported within single incidents in the available NIBRS data. Valid totals for the large cities were excluded from the reduction process.
	Kansas	The state UCR Program was unable to provide complete 1996 offense figures in accordance with UCR guidelines.	Annual figures were extrapolated from 1996 January-June state totals provided by the Kansas State UCR Program.
	Kentucky, Montana	The state UCR Programs were unable to provide complete 1996 offense figures in accordance with UCR guidelines.	The 1995 and 1996 percent changes within each geographic division were applied to valid 1995 state totals to generate 1996 state totals.
1997	Illinois	The state UCR Program was unable to provide complete 1997 offense figures in accordance with UCR guidelines.	Valid Crime Index counts were available for most of the largest cities. For other agencies, the only available counts were generated without application of the UCR Hierarchy Rule. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the total supplied by the Illinois State Program (which was inflated because of the nonapplication of the Hierarchy Rule) was reduced by the proportion of multiple offenses reported within single incidents in the available NIBRS data. Valid totals for the large cities were excluded from the reduction process.

Year	State(s)	Reason for Estimation	Estimation Method
	Kansas	The state UCR Program was unable to provide complete 1997 offense figures in accordance with UCR guidelines.	The Kansas state estimate was extrapolated from 1996 January-June state totals provided by the Kansas State UCR Program.
	Kentucky, Montana, New Hampshire, Vermont	The state UCR Programs were unable to provide complete 1997 offense figures in accordance with UCR guidelines.	The 1996 and 1997 percent changes registered for each geographic division in which the states of Kentucky, Montana, New Hampshire, and Vermont are categorized were applied to valid 1996 state totals to affect 1997 state totals.
1998	Delaware	Forcible rape figures supplied by the Delaware State Bureau of Investigation were not in accordance with national UCR guidelines.	The 1998 forcible rape total for Delaware was estimated by reducing the number of reported offenses by the proportion of male forcible rape victims statewide.
	Kentucky, Montana, New Hampshire, Wisconsin	The state UCR Programs were unable to provide complete 1998 offense figures in accordance with UCR guidelines.	State totals were estimated by using the 1997 figures for the nonreporting areas and applying 1997 versus 1998 percentage changes for the division in which each state is located. The estimates for the nonreporting areas were then increased by any actual 1998 crime counts received.
	Kansas	The state UCR Program was unable to provide complete 1998 offense figures in accordance with UCR guidelines.	To arrive at 1998 estimates, 1997 state totals supplied by the Kansas State UCR Program were updated using 1998 crime trends for the West North Central Division.
	Vermont	Due to changes in reporting procedures, the 1997 Vermont Crime Index offense totals were not comparable to those for 1998.	The 1998 Vermont Crime Index offense totals were excluded from Table 4. The 1997 Vermont state estimates were, however, retained in the aggregate national, regional, and divisional volume and rate totals.
	Illinois	The state UCR Program was unable to provide complete 1998 offense figures in accordance with UCR guidelines.	Valid Crime Index counts were available for most of the largest cities. For other agencies, the only available counts were generated without application of the UCR Hierarchy Rule. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the total supplied by the Illinois State Program (which was inflated because of the nonapplication of the Hierarchy Rule) was reduced by the proportion of multiple offenses reported within single incidents in the available NIBRS data. Valid totals for the large cities were excluded from the reduction process.
1999	Illinois	The state UCR Program was unable to provide complete 1999 offense figures in accordance with UCR guidelines.	Valid Crime Index counts were available for most of the largest cities. For other agencies, the only available counts were generated without application of the UCR Hierarchy Rule. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the total supplied by the Illinois State Program (which was inflated because of the nonapplication of the Hierarchy Rule) was reduced by the proportion of multiple offenses reported within single incidents in the available NIBRS data. Valid totals for the large cities were excluded from the reduction process.
	Maine	The Maine Department of Public Safety was unable to provide complete 1999 offense figures in accordance with UCR guidelines.	The Maine Department of Public Safety forwarded monthly January through October crime counts for each law enforcement contributor; since 12 months of data were not received, the national Program estimated for the missing data following standard estimation procedures to arrive at a 1999 state total.
	Kansas, Kentucky, Montana	The state UCR Programs were unable to provide complete 1999 offense figures in accordance with UCR guidelines.	To arrive at 1999 estimates for Kansas, Kentucky, and Montana, 1998 state totals supplied by each state Uniform Crime Reporting Program were updated using 1999 crime trends for the divisions in which each state is located.
	New Hampshire	The state UCR Program was unable to provide complete 1999 offense figures in accordance with UCR guidelines.	The state total for New Hampshire was estimated by using the 1998 figures for the 1999 nonreporting areas and applying the 2-year percent change for the New England Division.
2000	Kansas	The state UCR Program was unable to provide complete 2000 offense figures in accordance with UCR guidelines.	To arrive at 2000 estimates for Kansas, 1999 state estimates were updated using 2000 crime trends for the division in which it is located.
	Kentucky, Montana	The state UCR Program was unable to provide complete 2000 offense figures in accordance with UCR guidelines.	To arrive at 2000 estimates for Kentucky and Montana, 1999 state totals supplied by each state's Uniform Crime Reporting Program were updated using 2000 crime trends for the divisions in which each is located.

Year	State(s)	Reason for Estimation	Estimation Method
	llinois	The state UCR Program was unable to provide complete 2000 offense figures or forcible rape figures in accordance with UCR guidelines.	Valid Crime Index counts were available for most of the largest cities. For other agencies, the only available counts were generated without application of the UCR Hierarchy Rule. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident be counted.) To arrive at a comparable state estimate to be included in national compilation, the total supplied by the Illinois State Program (which was inflated due to the nonapplication of the Hierarchy Rule) was reduced by the proportion of multiple offenses reported within single incidents in the available NIBRS data. Valid totals for the large cities were excluded from the reduction process.
2001	Kentucky	The State UCR Program was unable to provide complete 2000 offense figures in accordance with UCR guidelines.	To arrive at the 2001 estimate for Kentucky, the 2000 state estimates were updated using 2001 crime trends reported for the East South Central Division in which it is located.
	Illinois	The state UCR Program submitted complete data for only 7 agencies within the state. Additionally, the state UCR Program was unable to provide forcible rape figures in accordance with UCR guidelines.	Valid Crime Index counts were available for most of the largest cities. For other agencies, the only available counts were generated without application of the UCR Hierarchy Rule. (The Hierarchy Rule requires that only the most serious offense in a multiple-offense criminal incident is counted.) To arrive at a comparable state estimate to be included in national compilations, the total supplied by the Illinois State Program (which was inflated because of the nonapplication of the Hierarchy Rule) was reduced by the proportion of multiple offenses reported within single incidents in the available NIBRS data. Valid totals for the large cities were excluded from the reduction process.

Table Methodology

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 8 through 11, which show specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated on varied levels of submission. With the exception of the tables which consist of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Designed to assist the reader, this table explains the construction of many of this book's tabular presentations.

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year.	The 2001 statistics are consistent with Table 2. Pre-2001 crime statistics may have been updated and, hence, may not be consistent with prior publications. Population statistics represent July 1 provisional estimations for each year except 1990 and 2000, which are Bureau of the Census decennial census data (see the Population section in this appendix).	Represents an estimation of national reported crime activity from 1982 to 2001.
2	All law enforcement agencies in the UCR Program. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports.	Statistics are aggregated from individual state statistics as shown in Table 5. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	Represents an estimation of national reported crime activity in 2001.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 2001).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on Bureau of the Census provisional estimates for 2001.	Represents the 2001 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 2000 and 2001.	The 2001 statistics are aggregated from individual state statistics as shown in Table 5. Population statistics represent Bureau of the Census decennial counts for 2000 and provisional estimates for 2001.	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic factors.
5	All law enforcement agencies in the UCR Program. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports.	Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix). Statistics under the heading Area Actually Reporting represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading Estimated Totals represent the above plus estimated offense totals for agencies having less than 3 months of offense reports.	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic factors.
6	All law enforcement agencies in the UCR Program. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense statistics for 2001.	Statistics are published for all Metropolitan Statistical Areas (MSAs) having at least 75% reporting and for which the central city/cities submitted 12 months of data in 2001. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and	Represents an estimation of the reported crime activity for Index offenses at individual MSA level. Any comparison of UCR statistics should take into consideration demographic factors.

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
		2001 provisional estimates (see the Population section in this appendix). The statistics under the heading Area Actually Reporting represent reported offense totals for agencies submitting all 12 months of offense reports plus estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading Estimated Total represent the above plus the estimated offense totals for agencies submitting less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (see App. II).	
7	All law enforcement agencies in the UCR Program. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year.	Offense totals are for all Index offense categories other than aggravated assault.	Represents an estimation of national reported crime activity from 1997 to 2001. Aggravated assault is excluded from Table 7, because if money or property is taken in connection with an assault, the offense is robbery.
8	All law enforcement agencies submitting complete reports for 12 months in 2001.	Cities and Towns are defined to be agencies in Population Groups I through V (App. III). Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic factors.
9	All university/college law enforcement agencies submitting complete reports for 12 months in 2001.	The 1999 student enrollment figures, which are provided by the U.S. Department of Education, are the most recent available. They include full- and part-time students. No adjustments to equate part-time enrollments into full-time equivalents have been made.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, and other demographic factors.
10	All law enforcement agencies submitting complete reports for 12 months in 2001.	Suburban Counties are defined as the areas covered by noncity agencies within an MSA (App. III). Population classifications of suburban counties are based on 2001 UCR estimates for individual agencies (see the Population section in this appendix).	Represents crime reported to individual law enforcement agencies in suburban counties, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
11	All law enforcement agencies submitting complete reports for 12 months in 2001.	Rural Counties are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on 2001 UCR estimates for individual agencies (see the Population section in this appendix).	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
12-15	All law enforcement agencies submitting complete reports for at least 6 common months in 2000 and 2001.	The 2001 crime trend statistics are 2-year comparisons based on 2001 reported crime activity. Only common reported months for individual agencies are included in 2001 trend calculations. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix). See Appendix III for UCR population breakdowns. Note that Suburban and Nonsuburban Cities are all municipal agencies other than central cities in MSAs.	
16-19	All law enforcement agencies submitting complete reports for 12 months in 2001.	The 2001 crime rates are the ratios of the aggregated 2001 crime volumes and the aggregated 2001 populations of the contributing agencies. Population statistics for 2001 represent estimates based upon the percent change in state population	The forcible rape figures furnished by the Delaware and Illinois state-level UCR Programs were not in accordance with national guidelines. For inclusion in these tables, the Delaware and Illinois forcible rape figures were estimated by using the national

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
		from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix). See Appendix III for UCR population breakdowns. Note that Suburban and Nonsuburban Cities are all municipal agencies other than central cities in MSAs.	rates for each population group applied to the population by group for Delaware and Illinois agencies supplying all 12 months of data. Slight decrease in national coverage for Table 19 due to editing procedure and lower submission rate.
20	All law enforcement agencies submitting Supplementary Homicide Report (SHR) data in 2001.	The weapon totals are the aggregate for each murder victim recorded on the SHRs for calendar year 2001.	The SHR is the monthly report form concerning homicides. It details victim and offender characteristics, circumstances, weapons used, etc.
21, 22	All law enforcement agencies submitting complete reports for 12 months in 2001.	The weapon totals are aggregated 2001 totals. Population statistics represent 2001 UCR estimates.	
23, 24	All law enforcement agencies submitting complete reports for at least 6 months in 2001.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total of each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete data for 2000 and 2001.	Aggravated assault is excluded from Table 23. For UCR Program purposes, the taking of money or property in connection with an assault is reported as robbery.
25-28	All law enforcement agencies submitting complete reports for at least 6 months in 2001.	The 2001 clearance rates are based on offense and clearance volume totals of the contributing agencies for 2001. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix). See Appendix III for UCR Program population breakdowns.	
29	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 2001).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The Total Estimated Arrests statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 31) divided by the percent of total group population reporting (according to 2001 UCR estimates for individual agencies, see the Population section in this appendix).	
30, 31	All law enforcement agencies submitting complete reports for 12 months in 2001.	The 2001 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 2001 reported arrest statistics and population. The population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix). See Appendix III for UCR population classifications/geographical configuration.	
32, 33	All law enforcement agencies submitting complete reports for 12 months in 1992 and 2001.	The arrest trends are the percentage differences between 1992 and 2001 arrest volumes aggregated from all common agencies. The population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates. (See the Population section in this appendix). Population statistics for 1992 are based upon the percent change in state population from Bureau of the Census 1991 and 1992 provisional estimates.	
34, 35	All law enforcement agencies submitting complete reports for 12 months in 1997 and 2001.	The arrest trends are the percentage differences between 1997 and 2001 arrest volumes aggregated from common agencies. The population statistics for	

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
		2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates. (See the Population section in this appendix). Population statistics for 1997 are based upon the percent change in state population from the Bureau of the Census 1996 and 1997 provisional estimates.	
36, 37	All law enforcement agencies submitting complete reports for 12 months in 2000 and 2001.	The arrest trends are 2-year comparisons between 2000 and 2001 arrest volumes aggregated from common agencies. Population statistics represent Bureau of the Census 2000 decennial census counts. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial counts and 2001 provisional estimates (see the Population section in this appendix).	
38-43	All law enforcement agencies submitting complete reports for 12 months in 2001.	Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	
44, 45	All city law enforcement agencies submitting complete reports for 12 months in 2000 and 2001.	The 2001 city arrest trends represent the percentage differences between 2000 and 2001 arrest volumes aggregated from common city agencies. City Agencies are defined to be all agencies within Population Groups I-VI (App. III). Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates. (See the Population section in this appendix.)	
46-49	All city law enforcement agencies submitting complete reports for 12 months in 2000 and 2001.	City Agencies are defined to be all agencies within Population Groups I-VI (App. III). Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of Census 2000 decennial census counts and 2001 provisional estimates (see Population section in this appendix).	
50, 51	All suburban county law enforcement agencies submitting complete reports for 12 months in 2000 and 2001.	The 2001 suburban county arrest trends represent percentage differences between 2000 and 2001 volumes aggregated from contributing agencies. Suburban Counties are defined as the areas covered by noncity agencies within an MSA (App. III). Population statistics for 2000 represent Bureau of the Census decennial census counts. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	
52-55	All suburban county law enforcement agencies submitting complete reports for 12 months in 2001.	Suburban Counties are defined as the areas covered by noncity agencies within an MSA (App. III). Population statistics for 2001 represent estimates based upon the percent change in state population from the Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	
56, 57	All rural county law enforcement agencies submitting complete reports for 12 months in 2000 and 2001.	The 2001 rural county arrest trends represent percentage differences between 2000 and 2001 volumes aggregated from contributing agencies. Rural Counties are defined as noncity agencies outside MSAs (App. III). Population statistics for	

(1) Table	(2) Database	(3) Table Construction	(4) General Comments
		2000 represent Bureau of the Census decennial census counts. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	
58-61	All rural county law enforcement agencies submitting complete reports for 12 months in 2001.	Rural Counties are defined as noncity agencies outside MSAs (App. III). Population statistics for 2001 represent estimates based upon the percent change in state population from the Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	
62, 63	All suburban area law enforcement agencies submitting complete reports for 12 months in 2000 and 2001.	The 2001 suburban area arrest trends represent percentage differences between 2000 and 2001 arrest volumes aggregated from contributing agencies. Suburban Area is defined as agencies that are within a metropolitan area excluding those that cover central cities as defined by the Office of Management and Budget (App. III). Population statistics for 2000 represent Bureau of the Census decennial census counts. Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	
64-67	All suburban area law enforcement agencies submitting complete reports for 12 months in 2001.	Suburban Area is defined as agencies that are within a metropolitan area excluding those that cover central cities as defined by the Office of Management and Budget (App. III). Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	
68	All law enforcement agencies submitting complete reports for 12 months in 2001.	Population statistics for 2001 represent estimates based upon the percent change in state population from Bureau of the Census 2000 decennial census counts and 2001 provisional estimates (see the Population section in this appendix).	Data furnished are based upon individual state age definitions for juveniles.
69	All law enforcement agencies submitting complete reports for 12 months in 2001.	Arrest totals are aggregated for individual agencies within each state. Population statistics represent Bureau of the Census provisional estimates for 2001 (see Population section in this appendix).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.

APPENDIX II – Offenses in Uniform Crime Reporting

The Uniform Crime Reporting Program classifies offenses into two groups, Part I and Part II. Each month contributing agencies submit information on the number of Part I (Crime Index) offenses known to law enforcement; those cleared by arrest or exceptional means; and the age, sex, and race of persons arrested. Contributors provide only arrest data for Part II offenses.

The **Part I** offenses are defined below:

Criminal homicide—a.) Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, and accidental deaths are excluded. The Program classifies justifiable homicides separately and limits the definition to: (1) the killing of a felon by a law enforcement officer in the line of duty; or (2) the killing of a felon, during the commission of a felony, by a private citizen. b.) Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape—The carnal knowledge of a female forcibly and against her will. Rapes by force and attempts or assaults to rape regardless of the age of the victim are included. Statutory offenses (no force used—victim under age of consent) are excluded.

Robbery—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary (breaking or entering)—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft)—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, confidence games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Motorboats, construction equipment, airplanes, and farming equipment are specifically excluded from this category.

Arson—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The **Part II** offenses are defined below:

Other assaults (simple)—Assaults and attempted assaults where no weapons are used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting—Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud—Fraudulent conversion and obtaining money or property by false pretenses. Confidence games and bad checks, except forgeries and counterfeiting, are included.

Embezzlement—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing—Buying, receiving, and possessing stolen property, including attempts.

Vandalism—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control. Attempts are included.

Weapons; carrying, possessing, etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Attempts are included.

Prostitution and commercialized vice—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice)—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations—State and/or local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs. The following drug categories are specified: opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, benzedrine).

Gambling—Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children—Nonsupport, neglect, desertion, or abuse of family and children. Attempts are included.

Driving under the influence—Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws—State and/or local liquor law violations except drunkenness and driving under the influence. Federal violations are excluded.

Drunkenness—Offenses relating to drunkenness or intoxication. Driving under the influence is excluded.

Disorderly conduct—Breach of the peace.

Vagrancy—Begging, loitering, etc. Includes prosecutions under the charge of suspicious person.

All other offenses—All violations of state and/or local laws except those listed above and traffic offenses.

Suspicion—No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws (persons under age 18)—Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways (persons under age 18)—Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III – Uniform Crime Reporting Area Definitions

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. Further breakdowns rely on population figures and proximity to metropolitan areas. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of counties but outside cities, and local police report crimes committed within the city limits.

Community Types

Uniform Crime Reporting (UCR) data are often presented in aggregations representing three types of communities:

1. Metropolitan Statistical Areas (MSAs)—Each MSA includes a central city of at least 50,000 people or an urbanized area of at least 50,000. The county containing the central city and other contiguous counties having strong economic and social ties to the central city and county are also included. Counties in an MSA are designated suburban for UCR purposes. An MSA may cross state lines. The MSA concept facilitates the analysis and presentation of uniform statistical data on metropolitan areas by establishing reporting units which represent major population centers. Due to changes in the geographic composition of MSAs, no year-to-year comparisons of data for those areas should be attempted.

New England MSAs are composed of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSAs. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural areas.

MSAs made up approximately 79.9 percent of the total United States population in 2001. Some presentations in this book refer to suburban areas. A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded. The concept of suburban area is especially important because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

2. Cities Outside MSAs—Cities outside MSAs are mostly incorporated. They comprised 8.0 percent of the 2001 population of the United States.

3. Rural Counties Outside MSAs—Rural counties are composed of mostly unincorporated areas. Law enforcement agencies in rural counties cover areas that are not under the jurisdiction of city police departments. Rural county law enforcement agencies served 12.1 percent of the national population in 2001.

The following is an illustration of the community types:

	MSA	NON-MSA
CITIES	CENTRAL CITIES 50,000 AND OVER	CITIES OUTSIDE METROPLITAN AREAS
	SUBURBAN CITIES	
COUNTIES (including unincorporated areas)	SUBURBAN COUNTIES	RURAL COUNTIES

Population Groups

The population group classifications used by the UCR Program are:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City[1]	Less than 10,000
VIII (Rural County)	County[2]	N/A
IX (Suburban County)	County[2]	N/A

[1] Includes universities and colleges to which no population is attributed.

[2] Includes state police to which no population is attributed.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year because of population growth, geopolitical consolidation, municipal incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. (See Appendix I for a more comprehensive explanation of population estimations.)

The following table shows the number of UCR contributing agencies within each population group for 2001.

Population Group	*Number of Agencies*	*Population Covered*
I	70	52,194,574
II	170	25,241,834
III	415	28,433,360
IV	794	27,588,722
V	1,856	29,412,579
VI[1]	8,463	25,860,112
VIII (Rural County)[2]	3,413	34,454,583
IX (Suburban County)[2]	1,790	61,611,123
Total	16,971	284,796,887

[1] Includes universities and colleges to which no population is attributed.

[2] Includes state police to which no population is attributed.

Regions and Divisions

As shown in the accompanying map, the United States is composed of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further separated into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

APPENDIX IV – The Nation's Two Crime Measures

The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and impact of crime in the Nation: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Each of these programs produces valuable information about aspects of the Nation's crime problem. Because the UCR and NCVS programs are conducted for different purposes, use different methods, and focus on somewhat different aspects of crime, the information they produce together provides a more comprehensive panorama of the Nation's crime problem than either could produce alone.

Uniform Crime Reports

The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities: homicide, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. Arrests are reported for 21 additional crime categories.

The UCR data are compiled from monthly law enforcement reports or individual crime incident records transmitted directly to the FBI or to centralized state agencies that then report to the FBI. Each report submitted to the UCR Program is examined thoroughly for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies.

In 2001, law enforcement agencies active in the UCR Program represented approximately 255 million United States inhabitants—89.6 percent of the total population.

The UCR Program provides crime counts for the Nation as a whole, as well as for regions, states, counties, cities, and towns. This permits studies among neighboring jurisdictions and among those with similar populations and other common characteristics.

UCR findings for each calendar year are published in a preliminary release in the spring of the following calendar year, then succeeded by a detailed annual report, *Crime in the United States*, issued in the fall. In addition to crime counts and trends, this report includes data on crimes cleared, persons arrested (age, sex, and race), law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims and offenders; victim-offender relationships; weapons used; and circumstances surrounding the homicides). Other periodic reports are also available from the UCR Program.

The UCR Program is continually converting to the more comprehensive and detailed National Incident-Based Reporting System (NIBRS). NIBRS can provide detailed information about each criminal incident in 22 broad categories of offenses.

National Crime Victimization Survey

The Bureau of Justice Statistics' NCVS, which began in 1973, provides a detailed picture of crime incidents, victims, and trends. After a substantial period of research, the survey completed an intensive methodological redesign in 1993. The redesign was undertaken to improve the questions used to uncover crime, update the survey methods, and broaden the scope of crimes measured. The redesigned survey collects detailed information on the frequency and nature of the crimes of rape, sexual assault, personal robbery, aggravated and simple assault, household burglary, theft, and motor vehicle theft. It does not measure homicide or commercial crimes (such as burglaries of stores).

Two times a year, U.S. Bureau of the Census personnel interview all household members at least 12 years old in a nationally representative sample of approximately 49,000 households (about 80,000 people). Approximately 160,000 interviews are conducted annually. Households stay in the sample for 3 years. New households rotate into the sample on an ongoing basis.

The NCVS collects information on crimes suffered by individuals and households, whether or not those crimes were reported to law enforcement. It estimates the proportion of each crime type reported to law enforcement, and it summarizes the reasons that victims give for reporting or not reporting.

The survey provides information about victims (age, sex, race, ethnicity, marital status, income, and educational level), offenders (sex, race, approximate age, and victim-offender relationship), and the crimes (time and place of occurrence, use of weapons, nature of injury, and economic consequences). Questions also cover the experiences of victims with the criminal justice system, self-protective measures used by victims, and possible substance abuse by offenders. Supplements are added periodically to the survey to obtain detailed information on topics like school crime.

The first data from the redesigned NCVS were published in a BJS bulletin in June 1995. BJS publication of NCVS data includes *Criminal Victimization in the United States*, an annual report that covers the broad range of detailed information collected by the NCVS. BJS publishes detailed reports on topics such as crime against women, urban crime, and gun use in crime. The NCVS data files are archived at the National Archive of Criminal Justice Data at the University of Michigan to enable researchers to perform independent analyses.

Comparing UCR and NCVS

Because the NCVS was designed to complement the UCR Program, the two programs share many similarities. As much as their different collection methods permit, the two measure the same subset of serious crimes, defined alike. Both programs cover rape, robbery, aggravated assault, burglary, theft, and motor vehicle theft. Rape, robbery, theft, and motor vehicle theft are defined virtually identically by both the UCR and NCVS. (While rape is defined analogously, the UCR Crime Index measures the crime against women only, and the NCVS measures it against both sexes.)

There are also significant differences between the two programs. First, the two programs were created to serve different purposes. The UCR Program's primary objective is to provide a reliable set of criminal justice statistics for law enforcement administration, operation, and management. The NCVS was established to provide previously unavailable information about crime (including crime not reported to police), victims, and offenders.

Second, the two programs measure an overlapping but nonidentical set of crimes. The NCVS includes crimes both reported and not reported to law enforcement. The NCVS excludes, but the UCR includes, homicide, arson, commercial crimes, and crimes against children under age 12. The UCR captures crimes reported to law enforcement, but it excludes simple assaults and sexual assaults other than forcible rape from the Crime Index.

Third, because of methodology, the NCVS and UCR definitions of some crimes differ. For example, the UCR defines burglary as the unlawful entry or attempted entry of a structure to commit a felony or theft. The NCVS, not wanting to ask victims to ascertain offender motives, defines burglary as the entry or attempted entry of a residence by a person who had no right to be there.

Fourth, for property crimes (burglary, theft, and motor vehicle theft), the two programs calculate crime rates using different bases. The UCR rates for these crimes are per capita (number of crimes per 100,000 persons), whereas the NCVS rates for these crimes are per household (number of crimes per 1,000 households). Because the number of households may not grow at the same rate each year as the total population, trend data for rates of property crimes measured by the two programs may not be comparable.

In addition, some differences in the data from the two programs may result from sampling variation in the NCVS and from estimating for nonresponse in the UCR. The NCVS estimates are derived from interviewing a sample and are, therefore, subject to a margin of error. Rigorous statistical methods are used to calculate confidence intervals around all survey estimates. Trend data in NCVS reports are described as genuine only if there is at least a 90-percent certainty that the measured changes are not the result of sampling variation. The UCR data are based on the actual counts of offenses reported by law enforcement jurisdictions. In some circumstances, UCR data are estimated for nonparticipating jurisdictions or those reporting partial data.

Apparent discrepancies between statistics from the two programs can usually be accounted for by their definitional and procedural differences or resolved by comparing NCVS sampling variations (confidence intervals) of those crimes said to have been reported to police with UCR statistics.

For most types of crimes measured by both the UCR and NCVS, analysts familiar with the programs can exclude from analysis those aspects of crime not common to both. Resulting long-term trend lines can be brought into close concordance. The impact of such adjustments is most striking for robbery, burglary, and motor vehicle theft, whose definitions most closely coincide.

With robbery, annual victimization rates are based only on NCVS robberies reported to the police. It is also possible to remove UCR robberies of commercial establishments such as gas stations, convenience stores, and banks from analysis. When the resulting NCVS police-reported robbery rates are compared to UCR noncommercial robbery rates, the results reveal closely corresponding long-term trends.

Each program has unique strengths. The UCR provides a measure of the number of crimes reported to law enforcement agencies throughout the country. The UCR's Supplementary Homicide Reports provide the most reliable, timely data on the extent and nature of homicides in the Nation. The NCVS is the primary source of information on the characteristics of criminal victimization and on the number and types of crimes not reported to law enforcement authorities.

By understanding the strengths and limitations of each program, it is possible to use the UCR and NCVS to achieve a greater understanding of crime trends and the nature of crime in the United States. For example, changes in police procedures, shifting attitudes towards crime and police, and other societal changes can affect the extent to which people report and law enforcement agencies record crime. NCVS and UCR data can be used in concert to explore why trends in reported and police-recorded crime may differ.

APPENDIX V – Directory of State Uniform Crime Reporting Programs

Alabama

Alabama Criminal Justice
Information Center
Suite 350
770 Washington Avenue
Montgomery, Alabama 36104

Evaluation Form For
Crime in the United States, 2001

1. For what purpose did you use this issue of *Crime in the United States?*

2. Was the publication adequate for that purpose?

___Quite adequate
___Adequate
___Somewhat adequate
___Not adequate
___Quite inadequate

3. Are there presentations not included that you would find particularly useful?

4. What changes, if any, would you recommend for subsequent issues?

5. Can you point out specific table notes or presentations which are not clear or additional terms which need to be defined?

6. In what capacity did you use *Crime in the United States?*

___ Criminal justice/law enforcement agency employee *(specify functional area)*
___ Other government employee
___ Private citizen
___ Educator
___Researcher
___Student
___Legislator
___Media
___Other *(specify)*

7. Add any additional comments you care to make.
